For descriptive note see Annual for 1945.

"Henry Morgenthau's little book, Germany Is Our Problem, ought to be very widely read and pondered. Some who want to preserve Germany as a pawn against Russia have tried to give the impression that there is something vindictive about the Morgenthau plan for preventing a third German war. Nothing in this easily read book bears out that impression." D. F. Fleming

+ Am Pol Sci R 40:167 F '46 500w

"Here is a clear statement of the famous 'Morgenthau Plan' about which so much discussion has raged. The reader's reaction to it will pretty much be conditioned by his own predilections. Advocates of a soft peace will not approve all that the former Secretary of the Treasury proposes in order thoroughly to disarm Germany, but they must admit that his approach is not motivated by revenge but by a desire to make this peace 'stick.'"

"No one can read this thoughtful and provocative book without becoming deeply troubled about the problem of Germany. . . . It would be difficult to find any real flaw in Mr. Morgenthau's argument; if forced to choose between him and his critics, the reviewer would find himself defending his thesis every time. But the fact remains that a limited amount of heavy industry could be restored to Germany without providing the basis for a new war industry. The crucial question is how much can safely be restored. If Germany is deprived of the essential resources of Silesia, the Saar, and the Ruhr, it might be permitted to turn out from three to five million tons of steel a year without peril. Anything beyond that would create the dangers which Mr. Morgenthau so forcefully describes." M. S. Stewart

"In brief, the author's heresy calls for a new board including an extra 'corridor' on each side. . . [However] in a sense all that the author says about chess is incidental; it could have been compressed into a few pages. Yet the loss would have been considerable. For Mr. Morley has made literature out of what might have become a mere manual. Like 'The Compleat Angler,' this book does not require that the reader have a knowledge of the sport discussed. Essentially it is a garland of Shandean wit, lay philosophy and family saga. The author . . . carries on a continued or serial portrait of his father, Frank Morley, whose superiority to his young son at chess was indirectly responsible for the present work. Brothers Christopher and Felix turn up in the footnotes as indulgent wayside critics of F. V.'s motions." N Y Times

He traces their history from its shadowy beginnings in the third or second millennium Before Christ, through the Maya Old Empire (A.D. 317-987), their first and greatest period of cultural brilliance, through the Maya New Empire, which witnessed their Renaissance and final decline (A.D. 987-1542) until after the Spanish Conquest (A.D. 1542-1697)." Booklist 43:153 Ja 15 '47

"As director of the Carnegie Institution's excavation and restoration projects in the heart of the New Maya Empire at Chichen Itza, and as cultural envoy extraordinary to these two vanished empires and their present-day descendants, Dr. Morley has made so many discoveries, fought so many controversial battles, published so many reports, digested so thoroughly all the archaeological records and manuscript accounts, that to say 'Maya' is to think of Morley and to say 'Morley,' to think of the Maya civilization. Now he has distilled the essence of this lifetime of research into a single account of all our knowledge and conjecture to date concerning this ancient people and their civilization. The result is a book at once scholarly and popular." B. D. Wolfe

He has contributed far more in his book of thirty years ago, 'An Introduction to the Study of the Maya Hieroglyphs,' in his five-volume hieroglyphic analysis, 'The Inscriptions of Peten,' and in the many papers that have appeared between. If he were as fine a writer as he is an archaeologist, 'The Ancient Maya' might be a 'Rise and Fall of the Roman Empire.' It remains—as Morley intended it to be—a thorough, scholarly, readable and rich statement of what made the hidden life of the great Maya people. . . Whatever its faults, 'The Ancient Maya' remains our most complete, our most authoritative statement on the unique civilization of Guatemala and Yucatan, which flourished from shortly before the birth of Christ until the Spanish destruction—I cannot call it discovery or conquest. The book is soundly critical in text, and it is brilliantly and splendidly illustrated." Kenneth MacGowan

759.1 Paintings, American 46-11990

Forty reproductions, two in color, of the paintings of an eighty-six year old New York state farm woman, representing her work of the last eight or ten years. Included are comments by Grandma Moses on the paintings, a brief autobiography, and an introduction by Louis Bromfield.

"The book, by a skillful blending of autobiographical, biographical, and critical text, manages to give an unusually clear and vivid account of how an unschooled person happens to turn to painting, and why, and what happens then."

"The label applied to Grandma Moses as a painter . . . is that of 'primitive'. . . The label does not tell the whole story, however. No label can quite fit the intimate, personal quality of her pictures. They are pictures of a familiar, remembered scene, first—and paintings in the technical sense, last. They are concerned with representation and with composition not at all. Technically crude, yet fundamentally sound, her paintings give a bright-colored impression of a life where all is serene and harmonious, as well as fresh and lively." W. E. Parker

Informal biography of Henry Murger, son of a Paris janitor, who grew up to be an author and poet, and one of the original group of Bohemians, Index.

"Arthur Moss spent many years as correspondent and as editor of various little magazines in Paris; Evalyn Marvel, his wife, worked as Paris staff correspondent of Universal News and also worked on a magazine there. They do understand their setting, and they have taken pains to get at the facts of Murger's life. The result is weakened by their refusal to consider their task as straight-out biography; the fictionalized approach—at least as it is here used—does not suit the theme nearly as well as a more thorough biographical and social study might. Just the same, there is a certain freshness and liveliness about the book." J. H. Jackson

Rather it is an attempt to study the influence of the man upon the movement and the movement upon the man. For this reason little is said of Roosevelt's early career and much has been made of the months in 1909 and 1910 when the ex-president was out of the country. Foreign affairs are discussed only as they affected the course of internal politics. The book is based in large part on the voluminous Roosevelt manuscripts in the Library of Congress." The record of the Indian experiences of a member of the American Field service, attached to the British Indian army in the war. In his British uniform he traveled the length of India, welcomed by the Hindus when they learned he was an American, not so welcome when they thought he was British.

"The British are invariably depicted in this book as sadists of the most bestial sort, and the Indians are always people of the utmost virtue, ready to forget their religious and national differences and unite for a greater, free India. The whole work is drawn up in such excessive extremes that this very quality defeats its own purpose. The ability of the author to comprehend the vast colonial problem is crippled by his emotional immaturity which manifests itself in extreme oversimplification and utter implausibility." E. L. "Perhaps more than any other Canadian war correspondent, Munro had a talent for grasping the basic lines of an operation and presenting them with clarity and precision. This quality is evident in his book, as it was in his best despatches; and it is united with powers of factual description which give a dramatic quality to his eye-witness accounts. . . . Circumstances prevent this book from being a complete and rounded account of the Canadian Army's operations. Munro left Italy in September, 1943, and his account of subsequent events, including the breakthrough to Rome, is brief and sketchy. Similarly, his narrative of events after the Battle of the Scheldt is reduced to a minimum, though this is the period of the desperate fighting in the Hochwald and the battle of Holland. But his is the nearest approach to an overall narrative that we possess at the moment, and it is a useful as well as a highly interesting contribution to the history of the Canadian Army." "The book uses the language, the philosophies, the views of the GI in the fox hole, the mud, the ruins. It will be unpleasantly realistic to the cultured, clean-mouthed, uncontaminated class in this country who didn't experience war's moral and mental filth. Private Joe Mack's thoughts represent the thoughts of most of our fighting men, and his dreams are the dreams that carried us through to victory. What 'The Long November' presents is the problem that is puzzling our muddled political giants: the enigma of the future of the little fellow, the straight-forward, clear-thinking GI Joe who is disillusioned and allergic to soft-soap attitudes or platitudes." NAHM, MILTON CHARLES. Aesthetic experience and its presuppositions. 554p \$4.50 Harper

701.17 Esthetics. Art—Philosophy 46-519

"The purpose of this book is to discover the components that enter into the experience of fine art, and to show the profound importance of aesthetic experience in the lives of men. It is not an analysis of individual arts or of specific works of art, except as required by the argument, but aims to show that the fine arts have their common meaning in a common experience. The author considers feeling and imagination, the form, the structure, and the end of art, symbols of communication, and the re-creative and creative aspects of both artistic production and aesthetic experience." (Publisher's note) Bibliography. Index.

"Although the book is obviously the product of a long study of aesthetics and the arts, I regret to say that I find very little in it that is instructive. It is dull, verbose, and pretentious; and where it most needs clarity, it lacks it. . . Let me conclude with a word about Nahm's scholarship. He is well informed, and even erudite, on all topics relating to the history of aesthetics; yet I cannot see that his knowledge is put to good use." C. L. Stevenson

"This is no ordinary book. Professor Nahm is not among the authors who glibly retell an often told story nor does he add another item to the list of books which are a commodity for consumption by college students in the first place, and incidentally only an intellectual accomplishment. The author is at grips with real problems and he tackles them with a real desire for clarity. . . He zealously strives to learn from our intellectual ancestors and to insert himself into the philosophical tradition which begins with Plato. He is not entirely successful. In order to do successfully what he sets out to do he would have to emancipate himself from modernistic prejudices which block his advance and are clearly at variance with the intent of his enterprise." "From these stories one gets an overwhelming sense of the despair and misery that must have been the lot of the average Athenian during the war. In their particularities these pieces are as raw and real as documentary photographs. For that very reason, however, they are unsuccessful as short stories. They bear too close a relationship to Miss Nakos's observed experience; the reality has not been transmuted by a selective, universalizing imagination. The best of the stories is the one called 'The Madwomen,' in which, with admirable detachment, Miss Nakos tells of the effects of a woman's insanity on her husband and little girl." Nobody has ever questioned Nathan's ability to chastise, and many have been deceived by the apparent gusto with which he performs the rite. 954 India—History. India—Civilization 46-5284

"An interpretative history of India from her pre-historic Indus Valley civilization to the present period of English imperialism as seen through the microscope of a brilliant westernized humanist, written during his war-time imprisonment. This is a discovery of India in terms of her past, her geography, religion, art, racial groups. And here, too, are the 200 years of English domination and its failure. Nehru sees India stimulated by the industrial revolution brought by the British—but barred from participation and resultant prosperity for her people by imperialistic aggrandizement. Dynamic, progressive, Nehru defines the communal problem as actually a struggle between the remnants of feudal order and modernist ideas and Pakistan as an influence, a factor in strengthening those feudal elements. With Russia as another influence, Nehru proposes in answer to the Cripps' mission, full independence for India, and internationally a policy of freedom for dependent nations." (Kirkus) Index.

The past is not full brought to life or really shown to play the role in the present that historical consciousness assigns to it. Even recent history is rather pale; perhaps to avoid repeating what he has already said in *Toward Freedom*, Nehru writes of the Congress Party with a minimum of reference to the dramatic episodes of civil disobedience. . . "It took [Nehru] five months of prison solitude to pen these 581 closely printed pages, and one wonders, in passing, what will happen to his writing now that his jail-going days seem to have come to an end. India is now on the threshold of independence and the erstwhile rebel is destined to be the most important government official of a free India, since Gandhi abhors any office and will prefer to remain behind the scenes as the father of the nation. It is time, therefore, to have a fresh view of India's man of destiny, and what could be more welcome than Nehru describing his own reflection in the mirror of India's history?" "Nehru is an inspired man of action who, when imprisoned long enough, knows how to think and to write. This suffuses his work, this book as well as its predecessors, with an altogether special quality; indeed it is, practically speaking, unique. The great spirit that dwells in it gives it a life of its own in a self-determined form great and pure, like architecture or like music: this book is built like a thirteenth-century church, really, and to compare it to any of the dreary nonsense turned out by other political leaders is impossible. . . The generosity that beats like a pulse through the whole work accepts all the phenomena of life, excludes nothing, nothing at all: even the British record in India, although examined here with a clear and sorrowful eye, is not treated with bitterness. . . If there is a weakness in the whole thing—that is, in Nehru's view of the world, of which this book is a very sincere and high expression—it comes, as we might expect, from the fact that the author has been so deeply immersed in the nationalist struggle." "It would seem to be a difficult task to make a dull book out of the personality and experience of one of the most dynamic men and musicians in modern Russia. But Sergei Prokofiev's biographer has succeeded in doing just this. (Not for his music, but for the fact that it is always in time). . . . However, when you get used to the dialect and realize that it stands for a whole set of terms of reference (the whole immense Soviet system of society) the book is, within its limits, valuable. There is nothing whatever about Prokofiev's personal life in it save a few (very few) details of childhood, but this is perhaps a restful change from a good deal of biographical writing." "Neumann compresses into a brief volume an astonishing variety of facts, of sociological analysis and of historical interpretations, and his presentation will interest the general reader. But specialists will also profit from Neumann's approach. . . . The last part of the book, dealing with the immediate present, is disappointing despite some reasonable remarks on the limits and merits of the UN and the impossibility of world government at once. This section gives the impression that Neumann himself is probably much more pessimistic than he indicates, and that his optimism is somewhat forced and artificial in order not to leave his readers in a too black world. . . . One may, of course, disagree with Neumann about the selection of his material. Latin America and the Near East should perhaps have been given greater emphasis. "This study of the New York Times does justice to its subject, and that is high praise. But if the lily has not been gilded, then at least none of its beauties or virtues has been ignored in this full-color reproduction. If it is unkind to report that an air of awe and admiration runs through these chapters, then surely we can all agree that there is much in the New York Times to elicit awe and admiration. Its glories are many, and these authors have not hesitated to name them all." E. D. C.

NEWBERRY, MRS CLARE (TURLAY). Kittens' A B C. [36p] \$2 Harper

A rhyming A B C book composed of a verse and a picture of kittens or cats on each page.

Booklist 43:174 F 1 '47

"The kittens are painted in water-color, with humor and without satire, giving an effect of softness and savagery suitable to domestic kittens who never saw an alley. It is a pity that the verses which accompany each picture are so flat in sound and thought. If the rhythm of the verses were as true as the rhythm of the pictures, this would be an even more pleasing book for the very young." Marjorie Fischer

"Mrs. Newberry here employs a new technique for her expert feline portraits, painting them in water color with bold strokes of the brush. The pictures are vigorous and full of action instead of furry and gentle, as in her earlier cat books. Possibly some children will find them less lovable, but these kittens are almost as alive as real ones. The verses are good, too." K. S. White

has strong, broad, quickly caught lines, and surfaces indicating strength. There is one tomcat which, I am willing to bet, can lick anything on the block. 46-3324

"Charles King Newcomb was a minor member of the intellectual group of which Emerson, Thoreau, Alcott, and Margaret Fuller were the leaders. Emerson praised this 'youth of the subtlest mind' when he met him, a boarder at Brook Farm, in the early forties; and Emerson's friend, Caroline Sturgis, was obviously drawn to him, or at least he to her. . . Then his mother, from whom this sojourn at Brook Farm was a temporary and ineffectual escape, drew him away, and his life and capacities dwindled and narrowed. The twenty-seven volumes of his manuscript journal, his total accomplishment in this world, constitute a long and painful record of material and spiritual failure." (Sat R of Lit) These excerpts from his journals are edited with a biographical and critical introduction by Judith Kennedy Johnson. Index.

"Newcomb's editor arranges selections from his journals into topics, so that one cannot get a chronological impression of a whole man. She admirably resists the temptation to claim importance for a subject to which she has devoted so much disciplined work. Her restraint, the precision and subtlety with which she expresses herself, are promising virtues." W. B. Hamilton

+ *N Y Times* p12 Ap 14 '46 260w

"Beautifully written in spots, even the carefully selected passages in this volume do not reach a level of excellence that would make them intrinsically worthy of preservation. . . Dr. Johnson hints at but does not fully develop the psychological significance of the case. Perhaps this is just as well, for its morbid implications are almost too obvious. Her task was to present the journals and the facts of their composition, and this she performs competently." R. E. Spiller

Twenty-one short stories most of which originally appeared in the New Yorker. The title is from a statement of General Grant's: "Tethered as we are by the iron chain of circumstance." Each story is an incident from the outer fringes of the war, rather than the war itself.

"Edward Newhouse's wartime short stories, excellent as some of them still seem, made much better reading when they first appeared in The New Yorker. . . Newhouse undoubtedly is capable of far greater things. He can undoubtedly turn out one of the greatest of war books when he has had time for reflection, which he didn't have in the writing of 'The Iron Chain.' But his current book, despite its virtues of well-turned irony, polished dialogue and use of paradox, succeeds only in giving the impression of a David facing Goliath with a pea-shooter." J. O. The documentation is exhaustive, and masses of evidence are adduced to support the author's position in matters of dispute. With such a subject as Wagner, there is plenty of material for controversy, and Mr. Newman is by no means a gentle debater. He insists upon his points with often tiresome reiteration, and he handles his opponents without gloves. At times, carried away with his arguments, he allows himself to go a little beyond the realm of evidence into that of imagination in re-creating the thoughts of historical characters and assigning motives to them. But on the whole he is just. Recognizing the grave flaws in Wagner as a man, he is not blinded by them to his musical genius."

This appendix, entitled *Bombastes Furioso*, is concerned with the review of the third volume by the late Carl Engle in the April, 1941, issue of the *Musical Quarterly*. . . This appendix of Newman's is a very curious episode. Authors reply to their critics; but they do it in a letter or an article published at the time of the criticism; they don't give the reply—and the criticism—the status of an appendix in the book itself several years later." NICHOLSON, NORMAN. *The fire of the Lord*. 256p \$2.50 Dutton [9s 6d Nicholson]

46-4957

A first novel by an English poet and critic. The scene is a dreary English village on the coast of Cumberland. The chief characters are Benjy Fell, an elderly, half-witted itinerant preacher; Maggie Birker, the stout owner of a pastry shop who was married to Benjy in her youth; Jim, a much younger man whom Maggie later married, believing Benjy had died; and Elsie, the pious young deaf girl, who assisted Maggie in the shop, and with whom Jim fell in love.

"'The Fire' does not burn as bright as Nicholson must have wanted it to, but it still makes him a shining light among the younger men writing today. It shows not only thought and craftsmanship, but what's even more important, a capacity for further growth as a novelist." Clinton Textor

+ Book Week p7 J1 28 '46 240w

"This first novel by a young English poet has its elements of impressiveness. Its latent strength comes from his ability to project a feeling of utter drabness with fierce conviction. . . . Because of his narrative and descriptive powers Mr. Nicholson wakes warm sympathy for all men and women who are condemned to live in such a harsh environment. The names and liturgical feasts by which he subdivides his chapters and marks the passage of time in that bitter winter and early spring provide for the most part a rather sardonic ring. And his poetic sense here is in the direction of stark realism—few of his contemporaries seem able to arouse stronger momentary feelings of revulsion. His characters are less believable." — Manchester Guardian p3 S 22 '44 150w

"It is too bad that . . . the author was not able to communicate more of the immediacy of his feeling. . . . Besides saddling himself with a top-heavy narrative, Mr. Nicholson also arrests the free flow of feeling by the nagging use of flabby sentences containing inept comparisons." E. S. Holsaert

— N Y Times p12 Ag 18 '46 270w

"One suspects that the author has not yet reached his full strength, and that even the book itself has not scrambled all the way up the hill to its own effulgence. In the dignity of its conception, however, it belongs with

books of quality and accomplishment. . . . There are only two points to raise. One is the dating of the episodes, tying each to a day of specific religious significance. The story does not need such props; on the contrary, they tend to give it artificiality. Second, from his poetry Nicholson seems to have carried over a weakness for similes. Sometimes there are several similes to a page, most of them unnecessary." Libby Benedict

+ Sat R of Lit 29:13 Ag 10 '46 800w

+ Spec 173:512 D 1 '44 270w

"There is too little here, or at least too little imagination and experience is at work here, to hold the reader's interest; in any event, the dramatic trivialities are much too prolonged. Mr. Nicholson writes at first with something of verbal precision allied to a turn of slightly forced poetic metaphor, but he soon abandons this manner for one less exacting and less promising."

— Times [London] Lit Sup p461 S 23 '44 260w

"Mr. Nicholson is at his best when describing hindrances. . . . In life, absence or loss of one sense is often compensated by a natural increase in the skill or functioning of others—a blind man's hearing or a deaf man's sight is often better than average. So, too, in a writer a lack of ear for conversation will be compensated by an increase in the descriptive power of his prose, as in Walter Pater; what Dickens lacked in form he made up through the miraculous details of his pattern. Thus Mr. Nicholson, who is patently a poet, is justified in using images and descriptions to conceal his ineptness in creating character, but hardly in using the Church of England as a fig leaf to cover the nakedness of his novel." 940.27 Vienna. Congress, 1814-1815. Europe—Politics 46-7614

An English student of international affairs, both of today and yesterday, here retells the story of the Conference which attempted to settle the problems which arose after the defeat of Napoleon. In the course of this study he points out both the similarities and the differences in the problems and solutions of that time and now.

"Mr. Nicolson tells the story, both of the events preceding the Congress and the course of its deliberation, with insight, clarity, a restrained humor, and a very pleasant style. His sense of the dramatic is under complete control. His reticence on the subject of historical analogies is nicely contrived to stimulate the reader's imagination. And his understanding of the characters on his scene transforms them from historical cardboard figures into credible men and women. His book should be required reading for all commentators on foreign affairs, for all students of diplomatic history—for all men, in fact, who are willing to learn, from experience of the past, lessons which apply most urgently today." "On all scores, in the field of diplomacy, Harold Nicolson's book must rate as the book of the year and perhaps the best in a decade. It is a factual but human presentation of the perplexities of that art and it offers a knowledge of its most fundamental lessons for the price of a few hours of reading. NICOLSON, MARJORIE HOPE. Newton demands the muse; Newton's Opticks and the eighteenth century poets. (History of ideas ser) 177p \$2 Princeton univ. press

821.09 Newton, Sir Isaac—Opticks. English poetry—History and criticism A46-5141

"Isaac Newton 'Opticks' was first published in 1704, but the revolutionary theories of the nature of light and of vision which it set forth had been gradually coming to public knowledge and acceptance, through Newton's lectures at Cambridge, his communications to the Royal Society and his letters for more than 30 years. The poets of Newton's time seized on the new knowledge eagerly, used the new concepts of light and of color in their work, even attempted to popularize Newton's theories by restating them in verse. . . 'New-

ton demands the Muse!' one ardent admirer exclaimed in introducing his own poetic tribute, and thence Miss Nicolson takes the title for her thorough and yet lively and often entertaining study of what these poets thought and said. Pope, Swift, James Thomson of 'The Seasons,' and Edward Young of the 'Night Thoughts,' are the most considerable of the poets chiefly considered in Miss Nicolson's book." Book Week

901 Civilization—Philosophy 46-4813

"Subtitle: 'an Inquiry Concerning World Understanding.' To avoid further tragedy and bloodshed we must understand the ideological differences existing today. Based on this assumption the author proceeds to analyze the philosophical, political, economic and religious beliefs of America, Europe and Asia. The purpose: to arrive at a synthesis of values, free from provincialism which would insist that one set of standards only has the right to exist." (Library J) Chapter references. Index.

"It is to be regretted that this book in its present form will not meet the wide audience which it deserves, for the reason that the style and vocabulary are exceedingly involved and technical for the general reader. NOYES, ALFRED, ed. Golden book of Catholic poetry. 440p \$3.50 Lippincott

808.81 Roman Catholic poetry—Collections 46-3649

An anthology of poetry stressing the Roman Catholic faith. In his preface the editor says: "In this book the principle of selection is as follows: the main body consists of poems by Catholics, roughly from the time of Chaucer to the present day. Translations are included only when they are in themselves fine poetry. There is a section of tributary poems by non-Catholics; but these have been included only when they embody some essentially Catholic idea. In the case of Catholics I have felt free to choose poems on any subject, since Catholicism naturally touches every side of human life." Indexes.

"Hilaire Belloc and G. K. Chesterton are very fine Catholic poets and of course they are represented in Noyes' book. Belloc especially by some fine and familiar poems which have no application to devotion at all. On the other hand, Hermann Hagedorn, Belle Cooper, the Canadian Duncan Campbell Scott, John Bruini, Francis Sweeney, Mary Mannix and any number of others who have space here are commendable only for their piety. An especial irritant is the fact that Father Hopkins, whose devotional verse has yet to be surpassed by any poet, is represented by a meager three pages, while Noyes' own included poems cover 12." Between the dates set—May, 1945, to May, 1946—too many actualities pressed on a tired world, too many writers were still too close to their experiences to allow for the free play of imagination. Case histories are over numerous; gusto, that indefinable necessity, too often lacking. This, it is fair to guess, is through no shortcoming on the part of the editor. . . Mr. Brickell's introduction includes the judges' comments on many of the stories, and along with them, some penetrating exposition of his own. O'BRIEN, JOHN ANTHONY. Truths men live by; a philosophy of religion and life. 427p \$2.75 Macmillan

239 Religion and science. Christianity—Philosophy 46-4740

In this book a Catholic priest, professor of the Philosophy of religion at Notre Dame, re-examines the fundamental truths of Christianity in the light of our present-day questionings of the meaning of religion and of the relationships between science and religion.

"With its brief paragraphs grouped under separate headings, with its abundance of terse statements that appeal to the American love of a well turned phrase, with its closely packed content of solid truth, its skillful arrangement of material and its practical apologetic bibliography, this book, all in all, is the most complete single volume of popular apologetics known to the present reviewer. Each man, we are told, has one book in him; but Father O'Brien seems to have poured the lives of many men into his volume, enriching it, moreover, with the carefully gathered and highly precious experience of an outstanding teacher—himself." J. F. Cunningham

+ Cath World 164:182 N '46 350w

"Much sound and cogent argument is advanced for the reality and importance of the spiritual forces in the universe and in human life, and for the centrality of the Christian religion. There is very little special stress on distinctively Roman Catholic positions. One notes, however, the author's claim that the Catholic shrines offer 'irrefragable and convincing evidence of miracles in our own day.' His discussion of the historicity of the Gospels would be stronger if he took more account of the real critical questions."

"'Truths Men Live By' is a popularly written, thoroughly readable exposition of the fundamentals of religious belief. . . It is not, ostensibly, written as a text-book, but I shall be much surprised if it does not find its way into more than one college as a text in Christian apologetics. Father O'Brien has a deft and happy touch that gives new life to many an old argument. Occasionally his rhetorical flights strike a false note in a study of this kind, and the dialogues between various of his students and himself sometimes border on the coy. These however are minor defects in a volume that will be read with pleasure by anyone, Catholic or non-Catholic, above the high school level." L. J. Trese

"If Miss O'Brien had intended to create a Chekhovian character who confined activity to conversation, the excessive speculation on a simple matter would be more in point. But she sees Ana as a realist. And the repetitiousness, the slowness of the writing come from something more fundamental than the desire to probe a mind accurately. They appear to reflect the novelist's unconscious love of rationalization, the habit of focusing around and beyond an object rather than upon it. The same weakness explains why a book written with obvious respect for detail should sound more like a grandiose summary than a real story." I. K.

"No attempt is made at period dialogue and effects. Everything is stately and formal, but with the formality and stateliness of people of fine breeding at any time. The background is warmly and convincingly Spanish, but never once suggests the well-worn period drop-cloth. It is possibly this experiment in denial which led Miss O'Brien to decide that 'That Lady' is not a historical novel at all. She is mistaken: it is a fine one, and offers an attractive solution of the problem of combining period interest with universal, in a form acceptable to the critical reader."

"Kate O'Brien has written always better. This is her best. She had never before attempted tension. 'Without My Cloak' for example, was a cavalcade across an Irish lawn.

"The Land of Spices" was a girl's face viewed through a still lake. "For One Sweet Grape" contains love and torment, seen at a level where they too, form part of the pattern of that divine pity which Ana, too proud to ask or accept, found through her own sense of justice." Anne Fremantle

The region chiefly under consideration is the south, and within that region the elements that have greatest need of balance are Negro and white. For twenty-five years the Institute for Research in Social Studies has been occupied with this theme and has been presenting its processes and findings in Social Studies. There are other differences. The early pieces of psychological melodrama had great drive. This novel hasn't. The earlier pieces glowed with the heat O'Flaherty beat into them. 'Land' is inert, unleavened narrative. The Dubliners in 'The Informer' talked and

"My Africa is honest, passionate pleading, but it goes badly as a book to read. The poor, disjointed writing might possibly be explained by the author's incomplete familiarity with the language. Harder to accept are the poor organization of the material, the naive and unrewarding sections on the arts, and any number of pointless anecdotes. Above all, there is a too promiscuous encompassing of all Africa in casual generalizations. A tough, well documented study of British misrule in Nigeria, alone would have strengthened Mr. Ojike's case immeasurably." Max Glissen

It is just to observe this at the start, since whatever strictures one makes on this book should not obscure its remarkably stimulating value in laying hold of major and subtle themes. . . . The fundamentally questionable issue raised by this book is whether Ortega's insight has really attained any greater completeness than Dilthey's. . . . The failure to make use of either Marx or Kierkegaard is of course less excusable in Ortega than in Dilthey, who was closer to them in time. An indication that a middle of the way imagination, working with ideas that have only a half-way scope, cannot seriously deal with events that are themselves extreme. There is, however, some value in the method of 'Animal Farm,' provided it is timely, in the sense, not of newspapers, but of history, in advance of the news. sustain a fable like this one for more than a hundred pages, and Mr. Orwell does it admirably. . . . My own pleasure in this satire is greatly reduced by my realization that its object is, as usual, far less the communist system than the nature of man himself as this nature has been revealed in the latter-day development of the communist system. It is easy to admire the superb craftsmanship with which the attack is carried out, but it is not comfortable to contemplate the probable results, in terms of future history, of the traits of human character elaborated in the satire." "Mr. Orwell is a younger English critic and journalist who uses the idiom of 1946 but dwells in the tradition of Henley and Sir John Squire. He approaches his critical chores with a fully-formed political and artistic creed and you can take it or leave it. His views on subjects so diverse as Dickens, Wells, Wodehouse and Yeats are pungently stated and magnificently informed by common-sense. He is never dull, but he is sometimes naïve." J. G. E. "The essays in this provoking collection are brilliant examples of political anthropology applied to literature by a non-conforming mind."

Mr. Orwell stands apart from the imaginative writers of the Left; he spoils for trouble, dislikes his own side more than the enemy, is closer to continental writers. On the continent he found that drama and the suffering which, with mingled Quixotism and misanthropy, he always sought. It is not only this that sets him apart from the rest of the English intelligentsia. What has made him different is that, like a kind of Kipling turned upside down, he has seen the Empire and knows that the violent English political drama is enacted there and not at home." V. S. "Mr. Orwell is a moralist-critic and not an aesthete; he is interested in attitudes to Life rather than in Beauty. His own writing is forthright and vigorous, but never noticeably fine or elaborated; and in the prose literature which he criticises he distinguishes diseases of the mind and political attitudes rather than differences of style. The strength and brilliance of his criticism come from his confidence in his own sanity; he never fails to dig out and expose the perversions and affectations of others, applying a test of enlightened good sense. This robust self-confidence might make a blunt and philistine critic; in fact, it does not, because Mr. Orwell's writing always seems to reflect new and entirely independent thinking. His writing follows his thought, which is untrammelled by fashion or prejudice. He seems to live by himself intellectually and to come out to spray poison on 'the smelly little orthodoxies' which he finds growing like weeds around him." Stuart Hampshire

"None of the essays in this book is of much importance as literary criticism. Each is a shining reflection of Essayist Orwell's intelligent, often violent opinions on contemporary life in Europe and the U.S. All of the essays are open-hearted, open-minded, and filled with hot distaste for both the tightness of orthodoxy and the looseness of hedonism. They express an unusual combination of strength and gentleness in an easy, fluent prose."

+ Time 47:92 My 20 '46 1000w

"Mr. Orwell's habit in literary criticism is to make a bee-line for good sense, and in the process he is lively to watch, stimulating and purposeful. He does not, however, always strike what seems a balanced judgment; in face of the critical prejudices or prepossessions of others his desire to be fair sometimes carries him just a little beyond good sense. But his firm and vigorous independence of mind wins respect. In pursuit of reason in matters of aesthetic significance he has few inhibitions; yet he is guiltless of the show of authority which is so often the mark of the aesthetic rationalist."

"Mr. Orwin could not write badly if he tried, and he describes a countryside which he obviously knows as well as the back of his hand. PAKINGTON, HUMPHREY. Aston Kings. 285p \$2.75 Norton

46-3950

The scene of this placid novel is the English countryside; the time the 1890's. The story is about Canon Wargrave and his family, who having inherited a country estate, come to Aston Kings to enjoy the pleasures of hunting, balls, marriages for the young folks, and all the joys of country living.

"Humphrey Pakington, who has been variously compared with Trollope, 'Saki,'—and Angela Thirkell—writes with such delicious wit and such shrewd satire that he should disarm even the reader who is not ordinarily intrigued by a novel of manners. His virtuosic variety of method further holds the reader's interest: his dialogue is good and his exposition smooth and droll; there are some charming letters and a wealth of vivid, original—and relevant—description." "Mr. Humphrey Pakington's vein of bland humor, almost too gentle to deserve the name of irony, has again been exercised to advantage in his telling of the story of a late Victorian family. . . It is all continuously amusing and, allowing for the slight effect of parody, convincingly life-like." J. D. Beresford

theology in the Federated Theological faculty of the University of Chicago. This book contains an outline or summary of the religious truths he believes in, set forth in a style suitable for reading by young people and laymen. Partial contents: What is a human personality; How can we best meet suffering and evil; A look at the religion of Jesus; Three possible views of the resurrection; Sins, sorrows and successes of the church; Religion in personal daily life; A philosophy of death and immortality.

"Dr. Palmer, recently retired from the presidency of Chicago Theological Seminary, writes for the common man who wants his theology served candidly and forthrightly in modern terminology. He tears away the superstitions and needless mysteries which surround theology. He supports his thesis with rational thinking and a vigorous faith. The book will clarify the preacher's creed, start preparatory classes on their theological journey, reorient the doubter's philosophy, and set the pagan on a tour of investigation. Its perusal will send discussion groups into deeper realms, add interest to women's clubs, and give foundation to preaching." F. E. Luchs

Some parts of the book are really helpful, such as the account of various views of the resurrection, and the style is clear and suited to the nontechnical reader. It is simple, but at many points oversimple. . . . Palmer fails to convey to the reader a sense of the distressing state of religious thought and faith. Although sharing Palmer's liberalism, I protest against its easy-going optimism. . . . "Nearly all the seventeen stories in this distinguished first book have one quality in common: they illumine a turning point in the lives of the people with whom they are concerned. . . A number of the stories in this volume have appeared in magazines and, if they have affected others as they have me, must have remained bright in the memories of many readers because of their individuality, economy and nicety of substance and phrase, and the vitality with which Miss Parsons invests her characters. Re-reading them in a group with others hitherto unpublished reaffirms their effectiveness." Mary Ross

The names of the contributors alone should make anyone want to own this book, to satisfy himself that the United States is now large enough to support this thoughtful magazine. The editors' literary tact keeps destroying the political pattern. If at one moment the reader is annoyed by Sidney Hook's logic-chopping, at the next he is astonished by the inclusion of a sentiment mood-poem by James Agee, or delighted by the ebullient wit of Randall Jarrell's criticism, or compelled to think out current answers when he reads of 'The Situation in American Writing, 1939,' as thoughtfully evaluated by Anderson, Blackmur, Bogan, Farrell, Gregory, Porter, Stein, Stevens, Tate and Trilling." Spain's watchdog role (with St. Augustine as its base) continued until England's victories abroad in the Seven Years' War, when the British standard floated for some twenty years over the Castillo de San Marcos. . . . Of course, manifest destiny had already earmarked the peninsula as part of the United States—and, after a few decades of jingoistic infiltration, Washington purchased the country from Spain. . . . PAUL, LOUIS. Breakdown. 305p \$2.75 Crown 46-8060

Novel based upon the breakdown of a lovely young American newspaper woman, Ellen Croy liked her work; she loved her husband and child; she had a pleasant home and plenty of friends. But suddenly everything went wrong and Ellen attempted to escape by drinking. There follows the story of her alcoholism, her desperate struggle to make a comeback, and her success.

"To write about neurotic drinking sympathetically and still without mawkishness is almost as difficult a job as the solution of the problem itself. Louis Paul handles this assignment magnificently. . . The importance of the book lies in its frank and readable presentation of a malady which is all too common in our confused society." O. C.

+ Book Week p12 D 8 '46 170w

"Ellen's antics will shock you; her cure will seem as unreal as the author's carefully underscored quotes from the handbook. Alcoholics Anonymous, as any member knows, has wrought better miracles than this: but Mr. Paul's tribute simply does not carry conviction. He has played his material for its shock appeal, and nothing more. His melodramatic antics are as routine as the barefaced tract that serves as his final chapter: his psychiatry seems a straight quote from the textbooks most novel readers now know by heart." C. V. "If Robert Payne's romantic and image-loving style seems to obscure our understanding of China's political realities, it is no less harmful to his characters and plot. It may be 'poetical' but it is certainly not poetry, and it loses much of the strength of prose by its drifting language. China during the Manchu dynasty may have been a cloud cuckoo land, but pages full of adjectives like 'exquisite,' 'tender,' 'beautiful' or 'sommolent' make the style fade as well as the subject. Anyone who has been as much praised for his style as Robert Payne should be brought to task on a few counts at least." John Hay

"A story about China toward the close of the first decade of this century, Mr. Payne's book falls into two parts—which is its chief fault. For it is the first two-thirds of 'Torrents of Spring' which recommends it; these early sections of the novel, which describe the life of a trio of upper-class Chinese children, are as delightful an idyl of youth as I have read. In the last third of Mr. Payne's book the children achieve a premature maturity by becoming active followers of Dr. Sun Yat-sen; and this section of the novel struck me as being a bit trumped up, both psychologically and politically; also, here, the lyricism which Mr. Payne has so nicely controlled in the earlier portions of the story starts running out of hand." Diana Trilling

+ — Nation 162:634 My 25 '46 400w

"The author writes charmingly, and his picture of life among the well-to-do Chinese in the misty gorges of Szechuan, circa 1908, is decorative and appealing, but the revolutionary ferment of those days is less skillfully done."

+ — New Repub 114:741 My 20 '46 120w

"The only reason for feeling doubts about the author's ability to carry through successfully his ambitious literary plan is that once he has finished with the attractive home life of his central characters and has started his account of their revolutionary activities his familiar lyric virtues seem to get in his way. It is not that, as rebels against the collapsing Manchu order, they seem naive and innocent in their playing at revolt; that portrayal of their very natural ignorance in such matters is a brilliantly credible touch. It is merely that the narrative grows less credible and the author's mysticism comes to the fore." Richard Watts

"Like his first book 'Forever China,' Robert Payne's second, a novel called 'Torrents of Spring' contains lots of lovely descriptive writing. + Spring'd Republican p4d My 19 '46 250w

"It is a novel of fine temper, with a subtle quality of the dramatic in the composition as a whole. There are scenes and passages which stay vividly in the mind, notably the farewell message to his father that Shaofeng writes in prison, which has genuine poetic eloquence, and the ceremony in the monastery on Splendid Cloud Mountain after the death of the living Buddha. The successor to this novel should be worth waiting for."

+ Times [London] Lit Sup p545 N 17 '45 950w

"As any reader of 'Forever China' . . . will expect, the physical scene is presented with great fineness of imagery and mood, and 'Torrents of Spring' is as much a lyric cycle of the seasons as it is a story of human endeavor. There are times when the landscape so dominates the action that all the characters appear almost trivial and unimportant seen against the windy crests of the mountains or beside the swirling water of the Kialin. . . The action of the novel is at its happiest when Rose and her two brothers respond to these subtly interpreted moods of nature, and the book contains many moments of great beauty caught and held suspended as if in amber. On a less personal level of action the characters are not always completely successful in their roles. Perhaps this partial failure is the result of a too conscious and conscientious effort on the part of Mr. Payne to realize the altogether praiseworthy aim he mentions in his introductory remarks." J. J. Espey

Dealing with the period since 1870 or so, he examines the work of ten writers, attempting to trace through it 'what, in the nature of dramatic poetry, accounts for its scarcity in certain conditions.' And it is significant that of the ten authors he has chosen, only five should be actual poets." (Commonweal) Those included are: T. S. "His inclusion in his list of Henry James as a dramatist is as interesting as it is important. . . . However, what is most interesting of all will be that James, for all his rejection of it, seemed to see the theater also as a form, as well as its play. Mr. Peacock includes a long, fascinating quotation from one of the prefaces adumbrating this, and thereby exactly, although unconsciously I think, uncovers the limitations of his own book. For, while it is entirely understandable that he could find only five practicing poets in a period of almost a hundred years to support his thesis; and while his concluding essay on Tragedy and Comedy firmly interrelates these two judgments and rightly and thoroughly bases their modern lack in the chaotic moral standards of our time, it is still not possible to say he has justified his title." "I should like to describe the book as fascinating, but the semantic of the word has become so disgustingly eroded that it is inconceivable that it any longer conveys any meaning. I am therefore forced to say that Mr Peake's first novel holds one with its glittering eye. . . . Titus Groan, though long and Gothically detailed, is not wayward; it has a genuine plot in the strictest sense, and it persuades you to read on simply in order to know what will happen; in spite of its setting, there is nothing particularly dream-like about it. Its gallery of characters is wonderful." Henry Reed

+ New Statesman & Nation 31:323 My 4 '46 600w

"For anyone who likes this sort of writing and can give himself up to it, 'Titus Groan' offers a good deal of visual and narrative delight. The book, of course, is a work of sheer self-indulgence for writer and reader, a day-dream developed through the years, but for that very reason, because the author so obviously wrote to please himself and put so much of himself into it, Mr. Peake's novel seems refreshingly pure in the midst of an indifferently written commercial literature that plays so calculatingly on a few dependable reflexes. In the strict technical sense 'Titus Groan' is a work of the fancy rather than the imagination, but a fancy of such freshness, variety and visionary power that in his own modest, special way Mervyn Peake liberates and elevates as well as charms." PEAKE, M. L.—Continued

"A gorgeous, volcanic eruption of baroque nonsense, which the author, without much justification, chooses to call a novel. . . Readers who look for hidden meanings may find themselves wondering whether Mr. Peake has done anything more solemn than produce a work of extraordinary imagination while having himself a very fine time."

New Yorker 22:132 N 16 '46 140w

"It is decidedly a 'literary' work, and sophisticated in the literary sense. Mr. Peake's style is marvelous to a degree. He has no fear of words, but he respects them; uses them with profusion, but also with exactness. His effects are inspired. They have much the quality of weird clarity that some of Salvador Dalí's and Georgia O'Keeffe's paintings share. His inventiveness, his ingenuity and his humor are astonishing. One of the few things about the book that does not arouse wonder is the fact that it was seven years in the writing." Ruth Telser

+ San Francisco Chronicle p19 Ja 12 '47 400w

"Let us grant Mr. Peake the unquestionable virtuosity of his achievement, the inexhaustible piling of detail upon detail inside the frozen second of time, the poetic spurts of a language apparently antiquated. Being done, it is an amazing thing to behold, even if amazement is the only tribute we may offer." N. L. Rothman

Sat R of Lit 29:38 N 30 '46 450w

"I have carried the book round with me now for some days, and I believe I have read practically all of it. That I don't like it is easily said; because to begin with Mr. Peake writes a bad, tautological prose, and his humour, though so wearisomely crusted with grotesque, is in fact no more than facetious—but, like it or not, I desired to find a reason, a reason in the writer's soul, I mean, for the composition of this heavy fantasy. I have not found it; it seems to me to be a book without a driving force, a large, haphazard Gothic mess, carried along on vague gushes of external vision and having nowhere in it any gleam of that madness, that passionate necessity, which could be the justification of the kind of work that it purports to be." Kate O'Brien

— Spec 176:332 Mr 29 '46 160w

"In a mechanized age like our own there is every inducement to put a premium on fancy. Mr. Mervyn Peake's fancy runs to the vast, the sombre, the saturnine, the darkly opulent, the fearsomely comic, the Gothic, the ghoulish, the pictorially macabre. Largely because of the extreme length of the novel—the sheer bulk of words which he apparently finds necessary for exploiting a subterranean vein of fantasy—'Titus Groan' is very much a matter of taste. If it were half as long, or less than half, the book might be any novel-reader's fare—fresh, piquant and curiously rewarding in its fertility of invention and horrific splendour of pictorial sensibility. Spun out to some 200,000 words, however, this is in the first place a book for those addicted to the curiosities—the genuine curiosities—of contemporary literature."

Times [London] Lit Sup p137 Mr 23 '46 700w

"This first novel by an English portraitist is described by its publishers as 'gothic,' by which darkness, obliquity, mystery and decay are implied. . . Perhaps 'Titus Groan' is meant to represent a dream. Perhaps it is surrealistic. Perhaps it is just a dull book, without humor, without vitality, yet tumbling on for a dreadfully long time." 614 Public health—London. Family A46-1377

"This book, written by a doctor and a biologist on the staff of the Pioneer Health Centre in Peckham, England, is a history of the expansion of the idea that the unit is the family,

not the individual, into a working demonstration of that thesis. Begun in 1926, and suspended temporarily because of the war, the Centre has developed 'the essential elements of a technique for the practice of Health as something different and distinct from the practice of Medicine.' In a house in a South London borough, equipped with a consulting room, receptionist's office, bath and changing room, and one small clubroom, neighborhood families were invited to join this Family Club for a small weekly subscription. Here the groups were tested and studied in their physical, mental, and social aspects. . . This book is largely concerned with descriptions of 'health overhauls' and their findings, how many individuals were treated, how new members became a part of the social life of the Centre, how families were taught to practice health rules from the conception of new life, through pregnancy, birth, and infancy; how children of school age and adolescents developed in the Centre; how the right and normal concepts of courtship, mating, and homemaking were encouraged." (Scientific Bk Club R) Index.

"On the whole, this may prove to be an experiment of great historical interest. It is unfortunate that the report is so badly written. It is filled with obscure phraseology, mystical figures of speech, and turgid circumlocutions. The authors express an evangelical fervor by italicizing hundreds of words and phrases. However, these should not deter the thoughtful reader; there is here meat for thought." F. H. Hankins

Oscar Wilde: His Life and Wit is now the first book anyone should read on the subject. . . Mr. Pearson has not written a biography that one can think much of as history, psychology or literary criticism. Unless one can share his assumption that personality is a *ding an sich* and biography an art quite separate from history, psychology and criticism, the best one can say is that in a culture of pedants and philistines Mr. Pearson has written a witty apologia for the dilettante. And I don't mean Oscar Wilde." Eric Bentley

"Mr. Pearson's book makes interesting reading, for he has assembled from various sources an immense number of anecdotes and sayings, and he has managed to tell a straighter story than we usually get where Wilde is concerned. Wilde has been written about mostly by his friends, and the passionate personal controversies among them seem to have been becoming, since his death, more rather than less exacerbated. Mr. Pearson is not entangled in these disputes, and he writes with good sense and good temper. But his book is only another example of the kind of popular biography that adds little to our knowledge or understanding of its subject: non-critical, non-analytic, and, though dealing with literary matters, essentially non-literary." PEPPER, STEPHEN COBURN. Basis of criticism in the arts. 177p \$2.50 Harvard univ. press

701 Esthetics. Criticism A45-5598

"Every philosophy implies its code of criticism. Stephen Pepper reduces the legitimate world hypotheses to four. By mechanistic criticism he means the hedonistic. Pleasure is good, pain is bad, and beauty is pleasure objectified. In contextualistic criticism, not the isolated data, but the whole situation is considered. The test is vividness of experience rather than elementary pleasure. . . 'Organistic' criticism stresses the inner relatedness and coherence of things. . . Finally formistic criticism is based on the notion of the norm. Aristotle's 'Poetics,' although 'little more than a collection of notes,' is the outstanding representative of this kind. . . Mr. Pepper frankly advises an eclectic use of the four methods." Weekly Book Review

"Mr. Pepper as a critic is worth a great deal. He has honesty, earnestness, subtlety, sympathy, wide knowledge. He does not have style. Frankly, the first pages filled me with misgivings. As a rule I have little use for books on aesthetics which do not betray in their form any trace of aesthetic sense; I am reminded of blind men laying the law about colors. . . This, however, may be a false criterion. Great strategists might be incapable of handling a squad. . . Yet their strategy . . . may well be worth examining; while the best practitioners, when they theorize, are frequently beneath contempt. Mechanistically, contextualistically, organistically and formistically, Mr. Pepper's aesthetics deserves our closest attention." Albert Guerard

The element of bias in it is, as Miss Perkins acknowledges, rather large, for she was bound to Roosevelt by ties of affection, common purpose, and joint undertakings. But this leaning, which must be considered when Miss Perkins is dealing with purely political matters, does not distort her portrait of the President as a person. Unlike those who have made a cult of him, particularly the overarticulate people who have the mystifying notion that their own thoughts and emotions would unquestionably have been his, Miss Perkins knows that he was not a sun god. Cynthia Mamuta had once been a Christian and a native of Antioch, and returns to take triumphant personal vengeance on the selfless courageous bishop Ignatius, and his niece. She stirs up race and religious prejudice, she commits outrages against the Church, she causes Christians to be exiled, she reveals the Roman Commander as a convert—and finally is disillusioned and heart-broken when Caesar tries to bargain for the support of Ignatius, and ultimately—having lost the love and respect of her writer-lover, she herself repents and is accepted back into the Church." "Mrs. Petry knows what it is to live as a Negro in New York City and she also knows how to put it down on paper so that it is as scathing an indictment of our society as has ever appeared, notwithstanding the sugar-coating. Yet with all this—and to this reviewer Mrs. Petry is the most exciting new Negro writer of the last decade—still, there is a serious limitation in both the author and this book. It is difficult to detract from something that seems so nearly perfect, and from a writer with such genuine talent, yet the truth of the matter is that there is a bad sag in the last third of the book which is almost fatal." "Ann Petry has chosen to tell a story about one aspect of Negro life in America, and she has created as vivid, as spiritually and emotionally effective a novel as that rich and important theme has yet produced. 'The Street' is a work of close documentation and intimate perception. It deals with its Negro characters without condescension, without special pleading, without distortion of any kind. It is also a gripping tale peopled with utterly believable United States citizens, and overflowing with the classic pity and terror of good imaginative writing." Alfred Butterfield

A tiny English village is the scene of this novel. It is old in time and in sin, but beautiful in appearance, so has attracted an artist to it. Later a young film actress comes to the village for a rest. The evil doings of the village overlord are pictured thru the reactions of the two "from away." Gradually his infamy is unmasked to their horrified gaze, but all they can do is run away from it.

"Moon in the River" might be explained as an absurdly set parable on the corrupting influence of power. It might even be explained as a joke. But its sedulousness suggests that it is a panting endeavor to concoct an English 'Tobacco Road' that will make the sins of the original look peaky." James Sandoe

"His undisputed brilliance of talent refutes those who call him a blundering fake, and his tinge of what might be charlatanism confuses but never defeats his most fervent followers. At any rate he has been at it now for a half-century, and the event has been observed by Mr. Barr with a careful scrutiny of his work that has the calm enthusiasm of a skillful autopsy. It presents a view of the church which is consistent in itself but which is hard for Protestants and most Anglicans to accept. He is quite right in insisting that the church is a 'divine creation,' a new Israel guided by the Holy Spirit which evolved into an undivided church. The result of the fact of Christ was the fact of the church. . . The word, 'catholic,' is interpreted in terms of an 'integrated organism,' with universality the ideal rather than an 'inclusive organism' as a starting point." (*Churchman*) Index.

Witness not only the title-poem, but notably the touching piece at the close of the book on Funeral Wreaths: the tasteless wasteful ornaments stacked in the entrance to the factory, offerings to the dead from those whom the poet calls 'the lost, the betrayed ones . . . the Crowd.' It is a sharply done poem. . . It is not alone because Miss Pitter is aware of the gulf to be bridged and of the engineering feat required that her little book commands attention. She has the gift of compassion, bred of pity and indignation, and she has also a fine discernment of the requirements of the lonely mind, a delicate discrimination of those essences on which the solitary soul must feed. Such poems as Better Than Love, Man Accuses Man, Wild Honey, Lament for Oneself are distinguished by a perceptiveness that is of the spirit as well as of the senses. Nevertheless, taken in its entirety, the book fails to satisfy. . . Seldom does one come upon verse that leaves one balanced so cruelly between admiration and disappointment." Babette Deutsch

"If Mr. Plagemann is relentlessly tough, the thing that he is warning against is dead-serious: he warns the veteran, now that the war and its snafu are over, not to rush unthinking, unknowing, back to where he started. And that's about the only ostensible moral to the book, in case you're looking for moral. The rest is clever argumentation, brilliant writing and continual warning by use of examples from an extraordinary set of characters. This is a fine companion piece to Philip Wylie's 'Generation of Vipers,' a book that has been widely applauded during the war by exactly the same fighting men whom Bentz Plagemann is trying to reach." 610.9 Medicine

SG46-126

"The magnitude of the medical field covered in this book almost leaves one gasping. It purports to tell what modern medicine has done and is doing to banish disease and prolong life. But in the telling, a goodly amount of history is related and processes are described whereby certain remedies were discovered and became beneficial. . . Dr. Podolsky starts with the most modern weapons used in heart disease, then discusses 'healers of the brain, the mind and the nerves.' Under 'The Lame, the Halt and the Blind' he describes such marvels as skin and cornea grafting, efforts to help the dumb to speak, reconstruction and transplantation surgery. The most recent treatments for tuberculosis, leprosy, syphilis, and cancer are recorded, the use of the bronchoscope and new victories over lung diseases are chronicled. The various facets of the study of childbirth are given." (Scientific Bk Club R) Index.

"A most worth-while contribution in our present-day thinking regarding the relation of medicine to our national well-being." T. L. Hazlett

+ Am J Pub Health 36:929 Ag '46 140w

"If we agree that the purpose of popular writing on medicine is to present to the lay readers achievements of medical science lucidly and true to facts, then Dr. Podolsky may be credited with 50 per cent success. He is a good writer, he holds the attention of the reader from the beginning to the last page, but he includes some material, prematurely. . . Hasty acceptance, into lay literature, of medical hypotheses, some of them short lived, serves no good purpose, and may cause a great deal of harm by creating false hopes. . . There is lack of perspective and of proper evaluation of relative merits of medical advances. . . It is regrettable that popular writers on medical topics succumb too frequently to the tendency to exaggerate and to speak glibly of studies which are in their earliest experimental stage, when there is so much important, fascinating and well established information available." "This complete Poe is intended primarily for the general reader, but it is the student who wishes the correct text and certain biographical and bibliographical information, who will be most enthusiastic about it. . . The volumes contain all of Poe's 68 stories and

47 poems, 13 of his most important critical essays (including 'The Poetic Principle,' 'The Rationale of Verse' and 'Letter to B'), a selection from the 'Marginalia' and the long 'Narrative of Arthur Gordon Pym of Nantucket.' The explanatory and bibliographical notes by Edward H. O'Neill indicate the different appearances of the poem, short story or criticism during Poe's lifetime, and also that one which has been chosen as the standard text. Interweaving his professional and personal history, the author has produced an extensive study of Dickens against his contemporary background, has interrelated his experiences with his writing, has chronicled his rise from obscurity to international fame, with intense attention to detail, and research on all available material. His relations with his family, friends, publishers and public are scrutinized for all their worth, doubt is cast on the value of John Forster's association with Dickens, Dickens'

attachment for another woman is sought out and proved, and his place in the world of literature is examined." Kirkus

"Like many another prairie-born poet who has traveled from his native locale, Mr. Porter has lost something along the way; but his gain in experience and perception should compensate for that loss. . . . For his present dilemma of what he calls 'death-in-life,' Porter—ironically enough—can offer no solution, can find no outlet other than one of discovery through travel. Turning from the social themes which gave to his writing during the '30s its greatest vitality, Porter escapes to Mexico, Ireland, Scotland, etc. His folk ballads from the Seminole Negroes are new and authentic; but they will probably be of more interest to students of folklore than to the general reader. His descriptive comments on the Irish and Scottish scenes are comparatively superficial. In view of these weaknesses in his recent work, it is regrettable that Mr. Porter has found less to interest him in the American scene of the '40s than he found in the '30s. And it is to be hoped that in future travels, he won't forget to purchase a return ticket." Ruth Lechlitter

The promptness with which the spirits claim possession of their earthly lovers is only one of its charms. 940.547243 World war, 1939-1945—Personal narratives, French 46-7392

The author was a Swiss clergyman who was arrested by the Gestapo in France and imprisoned for five months before he got back to Switzerland by exchange. This journal of his prison experiences is brief because of the difficulties of getting writing materials, and because the writing had to be done in secret.

"This is no horror tale, in the cruder sense. But this small book, which deserves at least three stars of distinction in any current catalogue, has four values: first, as a piece of beautiful writing; second, as a factual record which is part of the history of the war; third, as a study in the psychology of imprisonment; fourth, and most important, as a religious interpretation of the total experience. Dealing with concrete, poignant and intensely personal events, it is nevertheless a searching inquiry into the problem of evil and a triumphant testimony to the validity and power of faith under conditions of utmost stress." + — Christian Century 63:1248 O 16 '46 140w

The nervous, staccato style in which it is written makes for swift and easy reading, although some may feel a certain lack of harmony between subject and treatment. But if Death Valley does not seem to lend itself altogether naturally to this sort of breezy, anecdotal treatment, the fault may lie not with Mr. Putnam but with his predecessors, who in general were so impressed by the grandeur and solemnity of the setting that they approached it with a sort of hushed respect. RABEL, ERNST. *Conflict of laws; a comparative study*; foreword by William Draper Lewis and Hessel E. Yntema; v. 1, Introduction: family law. 801p \$12.50 Univ. of Mich. 341.5 International law, Private (45-37126)

"Published under the auspices of the University of Michigan in cooperation with the American Law Institute, this volume is the first of a series designed to supplement the Restatement of the Law of Conflict of Laws by a comparative study of the law of foreign countries in the same field. . . The range of the book is enormous, including not only an analysis of the world's major legal systems,

a review of their basic principles, and a searching discussion of the principal legal theories involved, but also a presentation of the practical problem of defective mechanics in law-enforcement. . . The basic theme of the treatise is an eloquent plea for reform in this chaotic and confused body of law." Am Pol Sci R

"The author's profound scholarship is reflected in the careful and extensive documentation of this work, obviously involving monumental research, including references to principal pertinent statutes and cases of American and leading foreign jurisdictions, to international conventions and treaties, and to legal literature on the subject. For this alone, the work is of incalculable value to judges, legal practitioners, and specialists in the field, and, since this volume relates to family law, to sociologists. But Dr. Rabel's deep insight and wide experience with the conflict of laws have enriched this study so that the result is not a mere annotation of foreign law to the American Restatement, but is an independent and comprehensive study of both American and foreign law." Marcia Maylott

+ Am Pol Sci R 39:1194 D '45 800w

"Dr. Rabel's universal breadth of knowledge of Conflict rules is little short of awe-inspiring. Virtually no civilized system of law in any country in the world seems to have escaped his analysis. Few here could attempt to question the accuracy of his statements on foreign law. . . The book is far more than a collection of diverse rules. Throughout, the author makes a scholarly analysis and appraisal of these rules with admirable skill and persuasiveness." D. J. Farage

"The Old Country" is the best of the Sholom Aleichem in translation I have read. Maurice Samuels' excellent book, 'The World of Sholom Aleichem,' is not shamed in any fashion by the appearance of his hero in English clothes. Almost, the fresh, desperate wit of the great Yiddish writer animates these English tales. Almost the immortal hilarity of Sholom Aleichem lives in their American pages. That they lack the earthy impact of the original masterpieces is no fault of the translators, Julius and Frances Butwin. The Butwins have done an inspired job. Romantic tale of Santo Domingo, Nova Scotia, the seas between and the men who sailed them as privateersmen in colonial times. The hero is a red-headed daredevil named Nathan Cain from Nova Scotia, and the heroine is Lia-Marie Dolainde, from the West Indies.

"His adventures in the pirate-ridden Caribbean and off the coast of Hispaniola—known on modern charts as Haiti—make good reading for the adventure-minded. There is history, too: grim record of oppression by white man and murderous revolt by black. At times it seems the author is not too kind in his attitude toward the oppressed islanders. Savages they were, yet no more savage than their masters, the Spaniards, the British and the French. But 'Pride's Fancy' is a rousing tale, and well told. "Radin's reporting is plain, straightforward and unemotional, commonplace but adequate. The cases themselves are absorbing. They will recommend themselves particularly to the readers of detective stories who find too little surprise in real murder. Writers of hard boiled detective stories could read them with profit as well, to observe that the police have a number of alternatives for the rubber hose. "This book was written by experts in the fields of economics, rural power development, cooperative practices, and agriculture, who must remain anonymous since they are in the employ of our government. These practical essays on electrification, farm management and relief activities are addressed to all Balkan countries and particularly to ravaged Yugoslavia; but the advice contained in them is suited to any farmer anywhere whose main job is rehabilitation" (Publisher's note) No index.

341.1 League of nations. Secretariat 45-7969

"This volume is the first comprehensive study of the experience in international administration gained by the League of Nations in the twenty years of its active existence. It describes and evaluates the history and evolution of the League Secretariat, its peculiar problems of leadership, its structural development and personnel problems. It furnishes the reader with a new insight into the administrative technique developed through trial and error at Geneva, into the constant interplay of political and technical necessities, and into the unique problems created by the existence of a large supranational civil service with exclusively international duties. Particular attention is paid throughout the volume to those elements in the experience of the past which have a direct bearing upon administrative problems that will have to be solved by the architects of the international organs of the future. The author had ten years' personal experience as an official of the Secretariat of the League of Nations from 1930 to 1940." Pref

It deserves a painstaking examination by Mr. Trygve Lie and his chief associates in organizing the UN secretariat and in recruiting its personnel. They are more respectable than books which are much clearer, more consistent, and not as much torn by passions and prejudices. Such a work is H. Rauschning's 'Time of Delirium'. . . The new book of Rauschning, his first since 1942, suffers from the absence of a dominating central approach. . . Many excellent remarks and wise statements are made by the author, who is a very cultured reader of authors such as Burckhardt and Donoso Cortes and who knows how to utilize such contemporary students as Plessner and Bauhofer (much too little known in the USA). This general approach is combined with a special interest in modern revolutionary tactics: we find here many valuable observations for which Rauschning is indebted to his study of Lenin. And finally Rauschning is very much concerned with present-day foreign politics, particularly with the fate of Germany. . . Rauschning's book may be very helpful for those who believe that present difficulties can be overcome by manipulating some gadgets, organizing conferences, and inventing new techniques. . . "'Time of Delirium' is neither informative nor well written. Oracular in tone, with a tendency toward metaphysical phrasology, its most striking characteristic is the frankness, almost brashness, with which its author draws conclusions from his rich store of prejudice and opinion. Without the slightest inhibition, for example, he equates democracy and economic privilege or defends Italian fascism as essentially democratic in inspiration. As a result, the apologists of the extreme left will be as delighted as if one of their reactionary men of straw had come to life; and most proponents of democracy will be embarrassed. "There is one admirable and powerful episode. It is the description of the birth of Anne's child, Patrick. . . The honesty and the knowledge with which this is written create the drama—not the true but melodramatic realities of the raid. This one homely triumph intensifies the tawdriness of other scenes and other actions. Most of the characters and the desires by which they are impelled seem too familiar in fiction. Familiarity and facility touch all characters except Anne. This facility is unworthy of the intentions of the book. It is certainly unworthy of the true meaning of this century." Lawrence Lee

Tyler; The organization and financing of rural schools, by H. A. Dawson; Library service to rural communities, by Leon Carnovsky; Economic co-operation and adult education, by E. R. Bowen; Philosophy and activities of the Michigan State Farm bureau in adult education, by E. A. Smaltz; Training rural youth for leadership, by B. F. Hennink; The educational program of the Farmers union, by Mrs. Jerome Evanson. Index.

"Aside from a number of pathetic misinterpretations of facts and their implications,

principally by educationists who have stepped outside their fields of competence, the little book is well written. It would furnish a local chapter of the A.A.U.W., a district teachers' conference, or a community forum on education, fuel for discussion for a session or two. It offers little to the scientific student of rural society, either in fact or in principle, that has not been known for a generation. Yet, it leaves the sum of existing human knowledge very well intact, a thing which cannot be said for the majority of books of similar type." O. D. Duncan

There are those who consider his position in science peripheral, not to say eccentric. Others see him as one who provides a progressive and revolutionary psychology. In my opinion Reich's book is typical of widely prevalent reactionary trends in current psychopathology: exaggeration of the individual and the biological, misconception or neglect of the social and historical, and a pseudo-objectivity which under the guise of studying the repressive forces of the individual capitulates before the oppressive forces of society. This book, therefore, is a symptom of more than academic interest." Frederic Wertham

REMARQUE, ERICH MARIA. *Arch of triumph*; tr. from the German by Walter Sorrell and Denver Lindley. 455p \$3 Appleton-Century

45-9381

Paris just before the outbreak of World War II is the scene of this novel. The two central figures are Ravic, a famous Berlin doctor escaped from the Nazis; and Joan Madon, an actress who became his mistress. Ravic is reduced to operating for more fortunate doctors, performing abortions, and to making routine examinations of the inmates of a brothel. Joan proves faithless, and when she dies after an accident, Ravic, still loving her, finds courage to face the concentration camp.

"On the surface this is a hard story, a story of gynecology and of brothels, of abortion and death. The author must provide us with some sentimental or comic relief from these sordid details, and he does so in two ways: by showing us Ravic's occasional nostalgia for the Germany that has perished, and by high-lighting the doctor on his nocturnal adventures in Paris. . . The dialogues drone on too long for their best effect. The mood of loneliness is repeated with variations that become wearisome. The surgery is painfully excessive, and in his alcoholic fortitude, Ravic becomes superman. Powerful writing and many fine touches of characterization are clotted for want of selection." *Edward Weeks*

"A moving theme, in some respects movingly handled. But the working out of the plot involves a number of subjects which are most unpleasant, such as the less reputable situations taking place in night clubs and in houses of ill repute. Seldom in fiction, too, would one be likely to come upon so many gruesome descriptions of surgical operations. Surely, even if the hero is a German surgeon operating illegally in Paris, fewer examples of his skill would have sufficed. . . "Remarque admirably sustains his note of unrelieved anguish. It is as if he had doggedly written the whole book in a single minor key. The humorous episodes at Madame Rolande's establishment, written in the best Maupassant tradition, are no exception. Because of this monotony of style, and because of the late start of the main plot, the book is not easy to read. Yet Remarque's novel has something to say about the homeless and the exiled which we here are only too willing to forget. It depicts a world which, to us in America, seems alien in its wretchedness and passive acceptance of the on-rushing apocalypse, but which is probably more like ours than we care to know." *Richard Plant*

"Remarque has dealt with a tremendously tragic and moving theme, but he has been defeated intellectually by his own wholly German absorption with pathological curiosa and disregard for man as a human being. For example, his obsession with the operating theater has no relation to the cleansing sharpness of the surgeon's scalpel, since he pokes into the very entrails of mankind not to heal but to pry. Much of *'Arch of Triumph'* is revolting, but it is also taut and powerful. "Poignant, beautifully told story. In the history of one little man in one little town, Ferdinand Reyher has presented our American society in microcosm over a 50-year span. 'I Heard Them Sing' is good on a first reading and better on a second. Best of all is its loving portrait of the 1890s. Though no women were allowed in Ben's shop—and the women seem to have had no counterpart for the barbershop fraternity—so skillfully has Reyher presented the period that even a woman of these days will suffer with Ben a nostalgic pang for the days when 'men had time in their souls, harmony in their throats, and the cakewalk in their feet.'" Character study of a determined, forceful woman. From the time she was able to know anything Mona Biro was sure of herself. She was ashamed of her poverty-stricken background, so she denied it. By degrees she rose to prominence as a fashion designer, married a young playwright, succeeded in completely dominating him for a time. But in love and marriage, Mona found her first encounters with despair.

In a series of separate episodes, each a complete unit in itself, Mr. Richter has shown through the life of one family the transformation of a hunting society into a farming one. Without needless display of his vast antiquarian background and with none of the cheap melodrama that degrades most historical fiction, he has told a wise and deeply moving story about a weak and very human man and about a woman who is almost great in her simple strength of character. Seldom in fiction has the atmosphere of another age been so completely realized. But neither captures the magic of Rimbaud; and without the magic, the material is mere self-conscious, self-pitying, self-debasing gibberish." Sterling North

"Louise Varèse's translation, now published in the same series as the Schwartz version, reveals a much sounder understanding of both the French language and the poet's thought. In a few details of wording, Delmore Schwartz, with a poet's sense of English diction, translated Rimbaud more pungently, when he understood him correctly. . . Neither translator's ear for English idiom, however, is unerring, so that both seem, at times, not to be fully conversant with the English equivalents of the terms that Rimbaud borrows from the vocabularies of various types of French. . . Such minor details of diction do not detract from the general correctness of the new translation, which renders most faithfully nearly all of Rimbaud's complex meanings. With Louise Varèse's interpretations of some of the more obscure passages, one might, of course, yet disagree." Edouard Roditi

Poetry 67:278 F '46 1150w

"There is nothing in the Varèse translation, taken piecemeal, that does not make sense, by itself and in the immediate context. . . This was not true of the other versions of 'A Season in Hell' which this reviewer has seen. Miss Varèse knows her French well enough not to commit boners, and American English well enough to make smooth reading—although I must cavil at 'those poor saps' (a sadly dated bit of slang) for 'ces bonhommes.' The problem of Rimbaud's interpolated verse-poems, alas, is no more solved in the Varèse translation than it was in the others. . . But these faults are minor in the total picture. If Rimbaud's 'Season in Hell' did not end with the writing of 'Une Saison en Enfer,' but lasted his lifetime, one may at least suggest that the translation of 'A Season in Hell' has reached a conclusive point with the Varèse version, and commend it to all and several." He is a Peace Democrat, solidly against the war and for a compromise with Jefferson Davis to restore the Union without further bloodshed. His new wife, an active Southern sympathizer, influences her two susceptible stepsons to such an extent that they both espouse wholeheartedly her nineteenth-century version of the 'peace in our time' philosophy, throwing themselves into the fight against the draft, only to learn too late that her motives and the cause they have joined both stem from a desire for a Confederate victory." "Unfortunately, the novel is not so good as its situation. Ran's 'loyal opposition' to the war is never clearly presented; his stepmother's machinations are pallidly obvious; his father is never more than a weary voice. External events—riots, lynchings, assemblies—are re-created with some vigor and with an obvious respect for historical fact. But even there, the style is flat, is more like reportorial than imaginative writing. One is left with a new knowledge of the horrors of civil war but with no more intense feeling of them. It will not, perhaps, be unfair to say that as history the volume is eminently satisfactory; as fiction, it is somewhat less so." D. S.

It sometimes happens that the re-creation of the past affords more pleasure to an author than to the reader. Miss Robertson avoids this pitfall fairly well, although the opening sections of 'The Unterrified' are a little heavy, a little overloaded with politics. "The central theme of this small book is American democracy and its survival in an age of science, totalitarianism, and world cultural interaction. The text, composed of articles and addresses to which a few essays have been added, offers an interpretation from the last decade of the nineteenth to the fifth decade of the twentieth century. The author conceives of American democracy as a twofold development; on the one hand, the establishment of opportunities for individual achievement, and, on the other, the organization of social equality. The general basis of this democracy is education." (U S Quarterly Bkl) No index.

It gives a highly colorful portrait of an egocentric woman, a questing, if not an original, mind, and a very talented artist. It is one of the many interesting contradictions in Miss Robinson's character that, while she carries a large amount of excess baggage as a writer, she shows a highly disciplined skill in her work as a painter and sketcher. The reproductions of her drawings which make some of the illustrations in the book possess a fine delicacy and purity of line. "Victory over Pain is pleasantly written and in the main is accurate. Dr. Robinson sees the endless controversies in a sensible light. He has, too, a good eye for the drama in his material, and presents it well. Although an unsound appraisal of recent 'advances' reflects the difficulties of the contemporary historian and weakens the book, it is better than most on the subject. For all its modesty, its frank and unashamed sentiment and its delighted concern with the sensitive sweetness of its little-girl heroine, Lettie Rogers' novel possesses keen insight and deceptive sturdiness in its contemplation of Chinese character, American missionary zeal and the social relationship between disparate races." A novel based on the subject of syphilis, and the fact that it is curable. A beautiful and fastidious English girl contracts the disease, following the news of her fiancé's death at Dunkirk, and her own complete demoralization. The story of her heartbreaking course on the way to health and mental rehabilitation is worked out against the background of England at war.

"Despite a tendency to arrive at climaxes too suddenly, Miss Roland is usually adroit at anticipating the moment at which the reader will lose his enthusiasm for melodrama and she has created a group of people who are plausibly motivated." A. J. Hiken

Book Week p4 Mr 17 '46 230w

"This is a very lurid novel with a very serious purpose. That purpose is to say that syphilis is curable. Ten years ago an American physician wrote a novel on this theme, not lurid at all but thoroughly earnest and well written, and no publisher would touch it. The war has changed all that. This one, by the wife of a British physician, was written with the encouragement of the British ministry of health. . . . The revolting though often clever frivolity of most of the characters in their effort to escape from the horror and boredom of war should not obscure the basic seriousness of the novel. It is like Huxley's *Eyeless in Gaza* in that it drags the reader through a lot of glittering filth but gives him a real message at the end."

"Attempts have been made through the years to sum up, at several stages, the value of this long novel. Now we are near the end; the evidence will soon be complete. We shall soon be able to view and judge 'Men of Good Will' as a whole, measure its proportions, and decide how far intentions have been realized in execution. . . Meanwhile, we know that it is one of the most ambitious enterprises that have been undertaken in fiction. We know, too, whatever the value of his story—whether it proves finally to be an enduring work of literary art, or a pretentious but exciting serial of only temporary interest—that Jules Romaines is a born and practised story-teller, acutely intelligent, wealthy in material, and possessed of remarkable fluency." "'Escape in Passion' cannot be judged outside its context in the whole series, and the series itself is difficult to define. Though it has the skeleton structure of great narrative, it has neither the muscles nor the nerves. It unfurls with scarcely more tensility than a documentary film. Yet the evidence of life which M. Romaines presents cannot be brushed aside. For with his camera-like brain, devoid, as the in-

strument itself, of an insight beyond what the lens reflects, he has nevertheless managed to engrave his photographs upon the memory."

ROMAINS, JULES, pseud. (LOUIS FARI-GOULE). Seventh of October; tr. from the French by Gerard Hopkins. (Men of good will, v14) 296p \$3 Knopf

"This is the last volume of 'Men of Good Will,' the twenty-seventh of the French edition, the fourteenth of the American edition. . . Twenty-five years of European life, such is the central theme of Romaines' epic. The work began with the story of a day: the sixth of October, 1908; it ends (in an evident device for artistic symmetry) with the story of another day: the seventh of October, 1933. Between those two days unfolds the sad tale of Europe's disintegration." (N Y Times) Index of characters.

Booklist 43:118 D 15 '46

"Romaines is a good reporter, but is lacking in the creative spark. What he has done by amazing industry is to build an enormous picture of futility, in endless detail. His attitude is detached, but the effect on the reader who manages to endure to the end is one of pity, regret, and active compassion, that this lovely house of Europe, so rich in resources, inventions, and courage, could not be saved by her men of good will because there was too little urgency in them." W. K. R.

Christian Science Monitor p18 D 18 '46 480w

"The scenes are fragmentary, unresolved, and as a whole the book stands less on its feet than any of the others. . . For anyone who has followed the fourteen volumes, it is a sad thing to remember how certain it seemed at the start that, despite their deviousness, they would lead eventually to some new light of truth. But the promise of the vast scheme M. Romaines had in mind, dwindling gradually ever since the high-pitched recapitulation of France's great battle in the volume called 'Verdun,' has now faded away. The book closes with an unfinished platitude about our imperfect world and a tacit admission of its futility." Virgilia Peterson

Romaines' very acute impression of the Europe of 1933 and particularly of the atmosphere of fearful waiting in France at that time; it is among the memorable ones. Most of the characters who have not died along the way turn up for this grand finale—some of them, it must be admitted, just dragged on-stage. On the whole, however, a harmonious conclusion to a monumental work."

"Perhaps Jules Romaines had originally no more plan than just to write a successful novel, longer than anyone had ever attempted before, which would please all classes of readers at once and for very different reasons. In this he has succeeded—if we expect the readers who, misled by the elaborate warnings of the preface, looked for something more than an excellent popular novel of unaccustomed dimensions." When Mr. Roosevelt came to write it he had the official logs of the conferences, 'supplemented from notes which I took myself, at the time, and from my memory.' Just when and how the notes were made, just what parts of the book are based on notes and what parts on memory Mr. Roosevelt does not tell us. . . But in the second portion of the book, which carries an exhaustive analysis of motives to the point of tediousness (a tediousness often found in Kierkegaard and occasionally in Henry James), novelistic problems are attempted, and partially solved, of such formidable difficulty that I shall call this a 'failure' only tentatively, in quotes." "The prose is warm, neat and eminently readable. At times its simple, direct clarity is brilliant; at other times, particularly in passages of analysis, its subtlety becomes a trifle burdensome. More explanatory than evocative, more reflective than dramatic, it is always

completely controlled writing that never sprawls or spills; and though it is often slow, it is always full of a quiet, almost deliberate energy. But despite the sound craftsmanship of the writing, and despite the potential importance of the matters treated—the son and father, boy and life conflicts—there remains a peculiar insufficiency in this novel. It is as if a dimension were missing, or a part suppressed." Richard Sullivan

Its maps, the colored pages that introduce its five parts, the suggestive cuts before each section, the end papers with their imaginative highways veining our One World, all indicate that for the publishers this production is a labor of love. For the poet, the documentation and acknowledgments show also a love of labor: a poem is more than a pipe dream, and may spring from solid fact. . . In spite of its limpid ease and myriad camera-shots, this book is serious. The big road is not used as a temporal symbol: the long road or voyage which each individual takes through life; but as a spatial or social symbol, like Hart Crane's 'The Bridge': the road to union and understanding. "I'm afraid I shall have to turn in a dissenting opinion. I am sorry to do this, for Mr. Rosten has written a genuine book, one that is obviously the product of a fine writer properly involved in his subject; and his subject . . . is an epic one in itself, well worth celebrating in verse. . . The book is full of good poetry. That, in itself, is no mean accomplishment. . . The pity is that more did not come out of so seriously conceived an endeavor. The narrative poem is a difficult and treacherous medium. It has certain absolute limits and makes equally absolute demands. Perhaps the most important demand is that the poet shall have answered satisfactorily to himself, for every part and for the whole of his poem, the hard question: 'Why is this in poetry rather than in prose?' 320.9 Political science 46-5721

Twenty-eight long essays by a group of eminent sociologists, political scientists, and historians, designed to give a comprehensive picture of the present-day political field. Index.

"A text on contemporary political thought demands a clear delimitation of the field and a synoptic organization of its content. In both respects, Roucek's book is a failure. While only a few chapters deal with political ideology and theory proper, a goodly number are devoted to the discussion of political and even social and economic attitudes, relationships, and processes. . . . As regards the subject matter of the various chapters, one encounters a possibly unavoidable amount of duplication, but one is struck also by the number of serious omissions and gaps. . . . In all fairness, it must be said that the work contains a few excellent contributions, such as Morgenthau's chapter on 'Nazism'; Rodée's chapter on 'Defenders and Critics of American Capitalism and Constitutionalism, Conservatism, and Liberalism,' and Rumney's contribution on 'British Political Thought.' It goes without saying that the discriminating reader will also

find some useful information in the remaining several hundred pages. If, because of the serious shortcomings previously touched upon, we feel unable to recommend the use of this work as a text in its present shape, nevertheless we hope that a thoroughly revised and overhauled edition will prove a real contribution to a field which is in great need of textbooks combining a comprehensive treatment with accuracy and imaginative interpretation." Some chapters are masterly in their condensation and lucid in their presentation; others give the impression of a sightseeing tour through a library—'just time to look at some book titles'; a few are moody and aggressively disillusioned, which is in itself an index of the state of political theory of certain schools; still others express partisan viewpoints. . . . Nevertheless, the volume should prove stimulating to the discerning student. It contains a great deal of information and erudition. As a whole, it is 'adult'; it is 'to the point'; and where it is biased, the bias is not concealed. Although several authors rightly stress the relativity of political thought, and its dependence on time, place and circumstance, the background information demanded by the sociology of knowledge is often not given when the views of scores of writers are summarized; this information will have to be supplemented by further reading to which Twentieth Century Political Thought might open the door." Besides the active part they took in the Resistance, they fought at home in every way they knew. Who but a Frenchwoman would have thought of grotesque hats as a weapon in the war of nerves? . . . 'The Time of Our Lives' won a literary prize in its own country; it is written with a captivating freshness, a child's merciless clarity, and what one Frenchman called 'that gaiety which is an amiable form of courage,' Martine Rouchaud has the grace of an artist and a Frenchwoman." "Many engineering schools have conducted courses in both aerodynamics and hydraulics, but Professor Rouse's book treats the fundamental aspects of both somewhat differently, recognising that 'the principles of fluid motion stem from the same physical laws as the principles of motion of rigid and elastic solids.' Thus, the study of fluid motion is presented as an essential branch of engineering mechanics. There are discussions of flow in channels and pipes, pressure on immersed bodies, fluid couplings, streamlining, etc. The word 'elementary' in the title refers to engineering schools, and it is intended for students of sophomore grade, who would have some acquaintance with engineering mathematics." His essay on the Duchy will appeal only to those whom strings of fact delight; that of Kilvert in Cornwall is hardly more than another string—this time of quotations from the famous diary; and the story of how Mr. Rowse travelled to Cornwall in a sleeper is really too trivial for inclusion. Fortunately for its subject, though not for the paintings themselves, the major part of the book deals with the schools of painting in which color played a secondary role to the artist's prime interest of telling the story. "The book is so eminently readable that persons unacquainted with philosophy will go to it for information; they must be exhorted to complete their information from some less genial but more impersonal account. . . It is here evident why Russell could not have produced a balanced history of philosophy. He excludes from consideration at least half the questions which occupy the chief attention of philosophers. He can find interest and beauty in a metaphysical system, as in the thought of Plotinus and of Spinoza, only when it is in no way connected with an orthodoxy or with a political opinion of which he disapproves. . . With all his wit and acumen and apparent modernity, Russell is really a survival from the past. Politically he is a nineteenth century Radical; intellectually his position reaches farther back. 709 Art—History. Music—History and criticism. Dancing—History 48-8437

"The author divides his book in three parts. The first is a fairly rapid survey of the arts of painting, architecture, music, sculpture and the dance (with side excursions into poetry, drama and fashion), which attempts to show how all these creative activities have been consistently inter-related and how they have influenced each other throughout history. The second part is an investigation into the nature of style in art. . . . The third part, 'the Fate of Style,' is an interpretive and speculative essay on the hidden 'law' that governs art, and the 'fate' toward which art moves." (N Y Times) Dr Sachs left Germany in 1933 and is now connected with New York University and the New York Public Library. Index.

"Large divisions . . . contain stimulating information on architecture, art, music, dance—even fashion and poetry—and an understanding and analysis of man's achievement in successive centuries. Libraries, pigeonholing the arts, will need duplicate copies." A. S. Plaut

"If the author takes more than 400 pages just to write an approach to his subject, a brief review such as this cannot begin to suggest the content of so rich a book. Obviously the fruit of much informed observation and philosophical insight, 'The Commonwealth of Art' is a valuable book because it stimulates the reader to look at pictures and buildings and to hear music with a reawakened interest; it is exciting because it excites thought. Perhaps that is what is meant by creative criticism." Albert Hubbell

"A companion piece to her poem, *The Land*, which is enchanting, melodious, and inordinately gifted. . . . All those who know Miss Sackville-West either as a poet, or as the author of the novels . . . will recognize and welcome this last display of her rich imaginative gifts, her delicacy of thought, and her poetic powers, often as melodically sensuous as Shelley's or Spenser's."
+ Kirkus 14:335 J1 15 '46 120w

"Perhaps there is the key to the lack of a deep and satisfying philosophy in a poem that has the pretensions toward a personal and perhaps even a universal summing up. The idea of writing about a garden against the background of war-torn England is magnificent. There is continuity, there is hope and courage, in even one broken rose bush with a single bloom against the ruins of a bombed-out home. There is more than visual beauty in a garden, and one wishes that Miss

Sackville-West had put it in her pages." Hal Borland

N Y Times p10 S 15 '46 600w

"Miss Sackville-West not only follows the time-honoured device of dividing up her poem into seasons but varies her blank verse with rhyme and with lyrics (even using italics to make a break for the eye). But even then one asks: Is there sufficient matter to sustain 120 pages of verse? For a poem of that length cannot be all on one high note. The level of emotion must vary; there must be a solid core of subject. From this aspect *The Garden* is a little thin. Miss Sackville-West muses, very much as she did in *The Land*, on plants, flowers, cultivation and creatures . . . with the addition of war-themes and emphasis on the passing of time and shortness of life. It is not quite enough; nor is there quite enough growth or shape to the poem. On the other hand the texture of the verse is satisfying." Gwendolen Freeman

Spec 176:562 My 31 '46 450w

"The characteristic quality in Miss Sackville-West's art is its modesty. Never stretching thought or language beyond the range which comes to her naturally, she accomplishes a quiet perfection from restrained poetic speech which is likely to be listened to after louder and more singular voices have wearied their audience."

SADLEIR, MICHAEL. Forlorn sunset. 496p \$3 Farrar, Straus

46-7876

This novel by the author of *Fanny by Gaslight* (Book Review Digest 1941) pictures another side of London life in the 60s and 70s of the nineteenth century—a London of hideous slums, of vicious poverty, of degradation and crime. The chief characters are two young men and a girl whom they rescue—temporarily—from her evil life.

Reviewed by John Hay
Commonweal 45:214 D 6 '46 230w

"A crowded canvas, with multiplicity of plot and subplot, but the whole conveying a vigorous picture of a sordid and murky undercurrent of a great city's story. Somehow, as one reads, it is the city itself that dominates plot and characters. Sadleir can write—but it is not pleasant reading."

+ Kirkus 14:394 Ag 15 '46 170w

"Author's abrupt changes from one person's story to that of another are at times confusing to the reader, yet interest never lags and all threads are woven together as the book progresses. A well-written novel of considerable social import." M. A. Johnson

+ Library J 71:1465 O 15 '46 70w

"Mr. Sadleir's characters are the flat figures of melodrama, which is inevitable, since they were contrived to sustain an action which was itself contrived to display the wares of Mr. Sadleir's erudition. If their action demands motive is supplied, but rather in the manner of a coroner's inquest than that of an intelligible artistic demonstration. The complex career of one of the more grandiose figures, for example, is accounted for quite simply by the fact that he is 'endowed with a mysterious quality which can only be termed an innate sexual fascination.'" John Farrelly

N Y Times p12 N 17 '46 400w

"The trouble with Mr. Sadleir's novel is that the author is so interested in documenting and describing this fantastically evil London that his book is more often like a report on social conditions than it is like a novel. For its background, to which the author has paid extraordinary attention, is by all odds more important than the story, in which far too many characters are automata, moving about as though the author were a touch impatient with them, knowing very well that they are simply symbols for what he's trying to describe." J. H. Jackson

San Francisco Chronicle p12 N 1 '46 700w

"'Forlorn Sunset' is not so much a novel as it is a brisk and scholarly collection of London curiosities. As such, it is highly readable. For there is probably no other living author who, in this very special field, could write one half as well as Mr. Sadleir does. . . In the course of reading the book one acquires a good deal of information about London in the '60s and '70s; and there are some very remarkable sketches of Londoners, particularly of a certain kind of flash bully and a certain kind of heroic clergyman which are obviously authentic." Her descriptions are sharply realistic, yet they seem to have an unearthly shimmer, as though they were ready to dissolve into the unreal and the surreal. . . The curse of the book is its second-hand airiness. The authoress dwells on the coast of Bohemia. Her simplicity is sophisticated; her 'distinction' is banal. The central scene, in which Consuelo dubs all her comrades Knights of the Rocks, and gives them rings and scarfs as pledges, is insufferably 'beautiful.' . . The book is far from indifferent. It is irritating only because it is so constantly on the verge of being good. In its pretentiousness it has charm. It should appeal to a wide audience. In recalling her memories of hardship and suffering, of hope and faith renewed, she evokes a mood that sends the reader back into a nostalgic world of his own. The book itself defies definition or classification for the reason that Madame de St. Exupéry, widow of the French aviator and writer, defies classification. From her pages she emerges as a highly sensitive woman, lost in memories and dreams, caught between a world of realism and

"The ideological root of this book is found in an article of the Bahá'í faith: 'It is not for him to pride himself who loveth his own country, but rather for him who loveth the whole world. The earth is but one country, and mankind its citizens.' Throughout the volume the universality of Bahá'í mentality is frequently called to the reader's attention. One is not allowed to forget that the essential lack of such mentality was the weakness of earlier religions. Christianity, for instance, is held to be a religion in which the individual loves other individuals, but not groups. It can unite neighbors as individuals, but it cannot project love into communal affairs. Mohammedanism is held to be able to organize people upon a national state basis and is, indeed, given credit for introducing this form of societal organization into the life of the world, but it cannot create a world community. Only Bahá'ism is capable of infusing into human life a divine love which is transformed into divine justice in the community. Hence, it alone holds the key to the future of world organization if the world is to be saved. Knowing no racial or nationalistic loyalties which are more primary than the love of mankind, it alone points the way to the supranational community." (Crozer Q) Index.

Book Week p6 D 23 '45 60w

"Many Christians and Mohammedans will, of course, take issue with some of the criticisms leveled against them throughout this volume to the corresponding exaltation of the Bahá'í faith. Christians, in particular, will find considerable difficulty in accepting the thesis that their religion has no social drive and is entirely ineffective in creating a sense of world brotherhood and of the equal worth of all peoples. Certainly such a position is not easily defensible. . . . Yet even with its limitations this is a worth-while book to read. Its central convictions of the constitutional unity of mankind and the possibility of an effective union of the various peoples of the earth need very much to be considered in our day. Many will agree that the only hope for the future lies in increasing union among the nations. Only thus can we come to the crux of our contemporary problem which resides in the issue of national sovereignty. Those who long to live for a few hours with a warm presentation of the idealism which religion presents to the contemporary world situation will be greatly benefited by This Earth One Country." G. W. Symposium on government in the United States as personified by leading figures of the present. "The writers are mostly professors of history and political science, plus a few newspapermen, and the collective tone of their essays is temperate—some of it very temperate. The list of subjects includes serious thinkers, such as Henry Wallace; what are known as 'spittoon senators,' such as Cotton Ed Smith; and even more peculiar characters, such as Theodore G. Bilbo (subject of a brilliant piece by Roman J. Zorn)." (New Yorker) Index.

"The volume shows the elements of both strength and weakness commonly associated with books similarly prepared. In spite of the effort of the editor to secure some uniformity in method of treatment, the sketches still show a great deal of diversity in this respect; in spite of effort to secure an objective evaluation of the work of the individuals discussed, some show a strong tendency toward hero worship. . . The sketches, themselves, interesting as they are, are made far more significant by the excellent Introduction and Interpretation (or post-script) prepared by the editor." W. B. Graves

"The sketches are of varying value and importance. Some are examples of creative art and a few are a more literal statement of facts and events." The authors maintain exceptional readability, a tribute to them and to the editor. Most of them write in complimentary veins about their subjects, but the essay on John W. Bricker is a bitter attack by another Ohioan distinguished in politics. There are internal evidences that many of the biographies were prepared two years before publication; the sketch of Harry S. But it can't be done, for the simple reason that making a book is a matter of several months, and it is a certainty that before you can get your book published some of your choices will no longer be prominent political figures." Lord Samuel writes: 'In July, 1911, the Kaiser's demonstrative visit to Tangier and the provocative dispatch of the German warship Panther to Agadir seemed likely to bring Europe to the verge of war.' But the Kaiser's descent on Tangier had taken place in 1905. And is it accurate to include Lord Hugh Cecil among the Conservatives like Churchill and Seely who in 1903 'aligned themselves with the Liberal Party'? But these are trifles. The book as a whole is one of the most notable autobiographies of a generation." Wilson Harris

"Santayana discusses the character of the several Gospels, the miracles, the parables, the prophecies and precepts, the prayers. Having interpreted the idea of Christ as it appears in the Gospels, Santayana, in the second part, raises the question: How far is this idea of Christ, as being God in Man, a philosophical idea, valid for all men and all religions? With few reservations he makes the answer that it is a philosophical idea and is valid." Weekly Book Review

"To read the book is a beautiful, cleansing, enlightening, challenging experience. We can close our eyes and be whisked back six hundred years to the age of the great Schoolmen, and listen to Abelard or Erigena as he investigates a point that has little utility but is its own justification. Together with the poet's feeling for words, he has the poet's ability to recollect emotion and his observing eye. There are many portraits of celebrities in his book, and all of them are alive and significant; so that we seldom come away from meeting Hardy, Galsworthy, Wilfred Owen, Bridges, or whoever it may be, without a real insight into the essential quality of the man." But the writer he describes best of all is the young poet he once was, at once delighted and embarrassed by sudden celebrity. He examines this past self with a mixture of amused detachment and avuncular affection. But it seems to me—indeed, I am quite sure—that the quality of 'Siegfried's Journey' is not quite up to that of 'The Old Century' and 'The Weald of Youth.' Is it, perhaps, that at this stage of his story, the author has relied too much upon the stimulation of diary jottings, and the attractive power of famous names, instead of bringing his material to full literary life by a sustained effort of brooding memory? Whatever the answer, and whatever the exact qualitative position of this latest volume in the Sassoon corpus, there is no doubt that 'Siegfried's Journey' is a most enjoyable book." B. R. Redman

A new biography of Alexander Hamilton, based upon some new material obtained from original documents and sources. Bibliography. Index.

"This book is likely to remain the definitive biography of Hamilton for a long time to come. Mr. Schachner spent more than ten years in its preparation. Of the fifty-five manuscript sources he lists, some thirty or thirty-one were not used by previous biographers of Hamilton. Others, including the Hamilton manuscripts in the Library of Congress, are exploited fully for the first time in such a work. In addition to manuscript material, the author used over one hundred printed original sources and over seventy-three printed secondary ones. On the basis of all this impressive research, Mr. Schachner is able to make many corrections in the standard edition of Hamilton's Works by J. C. Hamilton and by Henry Cabot Lodge. Yet this is all done without the slightest taint of pedantry or affectation. The material is marshalled with the skill of a master and the story told in good workmanlike prose." T. P. Peardon

"As Mr. Schachner has found, Hamilton possessed traits at once repelling and attractive. A philanderer, often on a sordid level, a statesman not above using his office to aid the speculations of his friends, Hamilton was at the same time witty, charming, courageous, and willing to sacrifice the greater part of his lifetime to the public service. He was fascinating in the way that all brilliant, self-made men are fascinating. . . There are occasional evidences of carelessness, such as referring to John Beckley of Virginia as a congressman from Pennsylvania instead of clerk of the federal House of Representatives (p. 302), and failing to give in the footnotes the promised documentation for an important statement (p. 392). On the whole, however, Mr. Schachner has written a readable, judicious, well-proportioned, and reasonably thorough life of Hamilton which may well remain for some years the standard biography of the greatest American conservative." "What is lacking in this book is proof that the justification for this mathematical approach to music is valid. The editors say that another work by Schillinger, *The Mathematical Basis of the Arts*, is to be published shortly. Perhaps the proof will be found in this other work. In its absence, this publication must be judged by itself, and the impression is inescapable that the work is scientific in a superficial sense only, that is, its mathematical approach. It would have been truly scientific if it had demonstrated that the great composers in the past had utilized the methods of the Schillinger system even if only unconsciously."

"Hunterdon County, its chief business agriculture, lies along the Delaware and Musconetcong Rivers in western New Jersey. Settled around 1700 by English, French, Dutch and German settlers (among the latter were Wanamakers and Rockefellers), the county has since become home also to Irishmen, Italians, Poles, Hungarians and others. As early as 1790 one-fifteenth of the county was Negro. Hubert G. Schmidt has written a full, well-documented history of Hunterdon County, making use of a rich variety of historical material—diaries, letters, account books, church records, Government statistics, newspapers." *N Y Times*

Her book seems to have been conceived in light and written with justice; it is a thing splendidly and truly done. Genuine humor such as his stems from a profound sense of confidence. How this man sustained this abiding confidence in the midst of Nazi degeneration is one of the marvels of his story. "A masterly analysis of the mind and art of a poet who above all others believed that man was the only secret in the universe, and that the secret could be learned under the pretense of looking for God. . . . Schorer has done what so many Blake admirers have wanted to do, and what obviously only a well trained scholar with real sensibility to the full depth and backward reach of our present disorder could have done. He has taken Blake out of the company of the mystics, the formally religious, the late-nineteenth-century yearners who revived him in their guise, and has shown him as a poet and thinker who accepted and corrected the revolutionary thought of his time. We, who have never corrected it enough but show signs of abandoning it altogether, can now better than ever appreciate Blake's relation to our age." (New Repub) Index.

"This is one of the series of volumes embodying research sponsored by the Committee for Economic Development. Professor Schultz is widely recognized as an agricultural economist. Agriculture, which one might expect to be one of the most stable forms of industry, is in fact one of the most unstable. Besides its own peculiar hazards of weather and crop failure, it shares in all the fluctuations of prices, wages, labor supply, demand and whatever enters into the total picture of the national economy. The author presents abundant data, analyzes the problem, and suggests a solution which avoids price control and limitation of production. Russia—Foreign relations 46-2063

"Within the space of its 600-odd pages, the author has attempted to give an outline of the

course of Russian history and of the Russian revolutionary movement, a brief summary of the fundamentals of the Marxian theory, a story of Lenin's political career, of the conquest of power by the Bolsheviks in 1917, of the internal evolution of the Soviet Union up to the outbreak of the second World War, and of the Russian military effort during the war. Throughout the narrative, 'vital connections between internal and foreign affairs' are constantly emphasized, and the latter occupy as much space as the former, being presented against the background of world politics. But above all, Mr. Schuman's book is a work of interpretation dealing with the significance of the Soviet revolution both for the Russian people and for the world." (N Y Times) Index and glossary.

"Written with all the fire, the force, and the eloquence that one has come to expect from Schuman, the book nevertheless manifests weaknesses of analysis that are not altogether obscured by its rhetorical brilliance. The analysis, particularly in internal affairs, is vitiated by a curious dichotomy. Essentially, Schuman cannot make up his mind whether the Soviet polity is a dictatorship or whether it embodies a new and higher form of democratic leadership. Writing from the vantage point of a professed adherence to Western liberal values, Schuman seeks at one and the same time to differentiate the U. S. S. R. from the West and to equate its values and objectives with the loftiest aspirations of Western liberalism. Thus illiberal methods are justified in terms of their liberal ends. Thus dictatorship is both explained and explained away." Merle Fainsod

SCOTTFORD, JOHN RYLAND. The church beautiful; a practical discussion of church architecture. 161p il \$3.50 Pilgrim press

726.5 Church architecture 46-1067

"While this book is designed primarily for the use of those who are building or improving non-liturgical churches, it is full of wise and helpful advice for the building of any sort of church, especially as regards such details as lighting, the location of a church in relation to the street, the style of architecture suitable to certain surroundings, and so on. The chapter 'Arthur and Mary Seek a Church,' tells us in what neighborhood they must look in different sections of the country. . . There is much wise advice regarding the raising of funds for the building of a church, and for the construction of parish houses." Churchman

"The author is an intelligent layman in architecture but an expert on the operations of the church. He has done much investigation of the relation of the church's work to its building, and he commands the style of an experienced and facile journalist. The book is in no sense a technical discussion of church architecture. The chapter on 'styles,' for example, is a thoroughly intelligent introduction to this subject but not a great deal can be said about it in 2,000 words, even when supplemented by eight pictures. Building committees will, however, find this chapter useful as an approach. . . If the author occasionally lays down as law what seems to be rather a matter of personal opinion, the discreet and mature reader will give respectful consideration and then form his own judgments."

SCOTT, ERNEST FINDLAY. Man and society in the New Testament. 299p \$2.75 Scribner
225.8301 Sociology, Biblical. Bible. New Testament 46-5934

A study of the social aspects of New Testament thought. In it an attempt has been made "to trace back the Christian conception of society to its roots in a religion, which was concerned with the relation of the soul to God." (Pref) The author, an English-born theologian, is at present giving a course at Amherst. Index.

"The volume is in no sense a retreat from social consciousness or responsibility on the part of the Christian. It is rather a reiterated recall to fundamentals; to the sacredness of the self from which all communal well-being must spring. With his accustomed thorough scholarship the author has presented a point of view that needs emphasis." J. H. Titus

Churchman 160:17 N 15 '46 200w

"With the general position that an adequate Christian social ethic waits upon the lives and efforts of good people there can be no disagreement. This thesis, frequently presented in the pages of this book with skill and power, does not need a labored and questionable interpretation of the canonical documents of early Christianity as a support. It must be said regretfully that the author is not at his scholarly best in this volume." E. W. Parsons

SCOTT, NATALIE ANDERSON. *The sisters Livingston.* 437p \$3 Dutton

46-4256

"Richard Livingston, a widower, has centered all his hopes and plans in his three daughters. Charming, cultivated, decent and honorable, with a Micawber-like optimism, Livingston is a failure as bread-winner. By profession an engineer, he has once written a book, 'Life is What You Make It,' and on the strength of its success has taken up writing as a career. From that time on he has been chronically unsuccessful. The world of the Livingston girls, in turn, revolves around Father. Sporadically, they make excursions into the world outside in a wild, panic-stricken effort to live their own lives, but, relieved and chastened, they always return to the cocoon-life at home with Father." N Y Times

"'The Sisters Livingston' is a fascinating and disillusioning study of family relationships. It is also, purposefully or not, a powerful argument for extended state social insurance, which would provide for men like Richard Livingston the bare necessities of food and medical care that they are too proud to accept as charity." "As a first novel, this study of family relationships is a good try, not always credibly thought out, but honestly written. . . Miss Scott's inconsistency leaves her main theme unwieldy and her ideas inert. Her novel suffers from over-exuberance and verbosity. She has written too much too richly, without sufficient restraint and choice in incident and detail." Catherine Maher

+ N Y Times p18 Je 2 '46 250w

+ Springfield Republican p4d Je 9 '46 250w

"This first novel has effective flashes of insight into emotion. It has a great deal of evidence on how it feels to go hungry, scrimp on carfare and try to placate landladies while keeping up a respectable, even smart, appearance. It shows how terrible sickness can be for the poor and proud. But the weight of its woes is too much, and the duality of the motif is self-contradictory. . . Piling circumstances on people who, by definition, can't fight back is hardly fair to them or the reader." Mary Ross

620 Civil engineering (46-25043)

"This second volume of a useful reference work for civil engineers provides typical contract documents and specifications for building operations in connection with airports, roads, bridges, dams, sewage treatment plants, water supply systems, and large buildings. Among the contract documents are forms for the invitation to bidders, proposals for lump sum contract and unit price construction contract, and suggested agreements to cover special conditions. A special feature of the specifications is that the common and controversial term 'first-class workmanship' is not used but definite data or tolerances have been given instead. In addition there are a section on engineering costs and thirteen glossaries of terms used in connection with various structures such as airports, cofferdams and underpinning, plywood, roads, and steel. The cost data are specific and are identified with the locality and year." (N Y New Tech Bks) Glossary. Specifications index.

SEID, RUTH (JO SINCLAIR, pseud). Wasteland. 321p \$2.50 Harper
46-1556

Psychological character study of Jake Braunovitz, who for eighteen years had worked as news photographer in a newspaper office under the name of John Brown. His denial of his heritage finally brought with it too many complications and he went to a psychoanalyst. His talks in the doctor's office provide a portrait of Jake and his whole family, and reveal his attempts at his own regeneration.

"Slow and sure and thorough, the analyst-office technique certainly is, and as a novel of character Wasteland will stand with Harper Prize Novels of the past. But it should be remarked that there are weaknesses as well as strengths in Jo Sinclair's method. For one thing, there is the suspicion more or less constantly present that one function of the book is to justify and demonstrate psychoanalysis, and whenever that suspicion intrudes, the book suffers." SEID, RUTH—Continued

"Skillful and heartening novel recommended for small libraries." F. A. Boyle
+ Library J 71:182 F 1 '46 120w

"Wasteland at times appears more of a case history than a novel, despite the extreme care the author has given every small detail. The basic structure of psychiatric treatment excludes the dramatic and forces the reader into an observing, scientific, rather than a participating, emotional attitude. That Miss Sinclair has nevertheless succeeded in writing a book that impresses one as genuine and clear-cut, never in bad taste and even with some truly moving episodes, is a triumph of her craftsmanship. She never aims too high, is rather too simple than too dazzling, and handles the many scenes of poverty and despair without sentimentality or preaching. Her book has a disarming forthrightness which helps her avoid the traps into which most first novelists are likely to fall." Richard Plant
+ New Repub 114:843 Je 10 '46 700w

"'Wasteland' is a novel in which form and style are almost overwhelmed by the content, in which the writer's sense of life and character is so compelling that it ultimately becomes itself an informing principle, the reality of the characters transcending imperfections in the medium of their development. Miss Sinclair's novel is the winner of the last Harper Prize Novel Contest, and both in its virtues and in its defects it is an interesting selection. . . The use of psychoanalysis, the modern confessional, with the psychiatrist as father confessor, obviously contains many pitfalls for the novelist. 'Wasteland' illustrates two of them, the ease with which the doctor himself may be utilized for the point of view of omniscience, and the danger of falling into the style of our popular jargon of psychoanalysis even when presenting real people within the terms of their own consciousness. These weaknesses in the form and style of Miss Sinclair's novel give it, to a degree, the mark of immaturity. They are, however, transcended by the intense realization she possesses both of the people she is writing about and the universality of their fate." W. M. Lowry
+ N Y Times p5 F 17 '46 700w

"In the hands of a writer of keener psychological insight or of more subtle and satiric cast of thought, this device for giving us the complete biography of this miserable man might have been successful. As it is, Miss Sinclair, who attempts to make up for the lack of these qualities (and a good many others) by a terrible earnestness, has given us a sincere, deadly serious, and rather flabby story with no implications left unexplained."

+ New Yorker 22:95 F 16 '46 120w

"Such a portrayal is effective when it is harshly realistic in its approach, and such the author has made it. This story of the loneliness in one man's soul, and its liberation through self-appraisal and frank recognition, must of necessity have a fundamental appeal where suffering prevails. The author has spared us the vapid homilectics with which such a theme could easily be embroidered; there is no moralizing and there is no philosophizing. The story sweeps along with such emotional power that the reader shares Jackie Brown's own conflict and victory." Harold Fields
+ Sat R of Lit 29:18 F 16 '46 1000w

"The framework of psychoanalysis is a tricky device for a novelist to employ, calling as it does for considerable mental agility on the part of the reader in appraising and relating the tortuous revelations dredged out of memory. To this reader, Miss Sinclair seems to have used it with great skill, for the most part avoiding the pitfalls both of over-elaboration and over-simplification. She has written an absorbing book which stretches the reader's understanding of people far beyond the characters she portrays." Gertrude Springer
+ Survey G 35:174 My '46 650w

"Many may feel that Author Sinclair's strength is not Joycean imaginative power, but brisk, down-to-earth reporting. Unlike most contemporary prize-winners, Wasteland tries to reflect a state of mind that is relevant and timely. Such poetry as it has derives not from the Roman Catholic confessional of Joyce's

stories, but from the clinical efficiency of the psychoanalytic confession."

For it is not primarily a Jewish story; Jake and his family might have been Polish, Lithuanian, Italian, Romanian. It is an American story, the story of a predominantly Anglo-Saxon culture and the differences it presents to people reared in the peasant societies of Slavic and Latin countries. . . It is a powerful, solemn story as Miss Sinclair tells it, gently and with understanding. Grant himself is a friendly, lovable man, imbued with a hardness that asserts itself unobtrusively when needed. However, the author's approach to her principal character is thoroughly feminine, and it is difficult to reconcile this typical 'family man' and member of temperance societies with the hard-drinking general who was to order his men 'to fight it out on this line if it takes all summer.' "Dr. Seward's book is well organized and well substantiated by the some seven hundred references in the bibliography. With the possible exception of a slightly feministic bias, it is very objective and argues from the evidence. Moreover, it is refreshing to read an author who frankly and dispassionately presents in a textbook materials on highly charged moral issues without seeming to cast a furtive eye at the bigots who tolerate no discussion of the pro's and con's on questions of sexual morality. Psychological study of the disintegration of a human mind. Hester was born on a large Hawaiian plantation; when she was very young she married and went to live in California; by the time she was twenty-one she had gone insane. Beginning with her illegitimate birth, the author traces every step in the breakdown of Hester's mind, from her fear ridden childhood to her flight to Hollywood and its resultant madness.

"The writing has impassioned truthfulness. The style is thick, luxuriant, without emotional control, which means that—though the language is generally strong and imaginative—it permits phrases like 'lie still, my heart.' There is no room for embarrassment in Miss Sexton's expression. Hester's life is seen entirely, and with complete subjectivity, and perhaps it would have been presumptuous to treat this theme in any other way. 'Count Me Among the Living' was written at fever pitch. What makes the book important is that it was a fever of understanding." Isa Kapp

"As long as the action stays in Hawaii, things move along interestingly enough; it is when the child grows up, marries an old playmate, and goes to live in California that Miss Sexton loses her grip. To make a very long story short (it's a pity the author did not think of this), the marriage is a failure and the young woman very, very slowly goes stark, staring mad. An extremely careful piece of writing, but an unsuccessful one."

As an exploration of a mind seeking refuge from phobias and fears and loneliness, this book holds a certain amount of interest. As a novel it has many shortcomings. SHAKESPEARE, WILLIAM. Shakespeare arranged for modern reading, by Frank W. Cady and Van H. Cartmell; il. by Rockwell Kent. 1165p \$5 Doubleday

822.33

47-162

Abridgements of all of Shakespeare's plays together with Venus and Adonis and The Rape of Lucrece, and thirty of the sonnets. In the plays the famous speeches and songs are intact, and in their proper places to show the development of the plot.

"It is high time, this reviewer thoroughly agrees, that scholars come out of their cubicles and serve the intelligent public. Shakespeare, especially, needs judicious paring and modernizing. But these editors are to be praised more for their good intentions than for their accomplishment. Unfortunately, they felt obliged to present all the plays, even the doubtful ones. They waste valuable space, supposedly dedicated only to what is enduringly great, on such inferior works as 'Two Gentlemen of Verona,' 'Comedy of Errors,' 'Henry VI,' 'Henry VIII,' 'Timon of Athens,' all of which (for the general reader) are quite negligible and some of which are not even completely by Shakespeare. As a result, they have all too little space into which to cram the truly great plays. . . The type and format are pleasing, the workmanship is painstaking; but this reviewer can recommend the volume with little enthusiasm. The laudable purpose behind the work could have been carried out much better." Robert Berkelman

SHAKESPEARE, WILLIAM—Continued

"Oddly, in a book 'arranged for modern reading,' what I consider its two fundamental mistakes are of a pedantic nature. The more serious is including the complete orthodox canon of plays, which means that several are mediocre, a few downright bad, some only part Shakespeare's. The second fault is hoary, though brief, 'data' on plot sources, disputes over dates of composition—again out of key with the editors' purpose. Depending on the play, one might substitute: generally accepted date; brief mention of stage history or popularity in different ages; one or two conflicting interpretations in various ages—for instance, some recent opinion on 'Measure for Measure' to contrast with the view of Coleridge here published. . . Mr. Cady and Mr. Cartmell thread together with clear, unobtrusive prose extensive quotations, selected with fine judgment, from poetry which has never been equaled in English nor surpassed in any language." W. B. C. Watkins

"A conscientious effort to take the pain out of reading Shakespeare, which is exactly the kind of thing that brings yelps from the pedants. . . Unimportant events that serve only to forward the story have been condensed, in prose, and much of the rich confusion of plot and action has been cleared up."

SHARP, MARGERY. *Britannia Mews.* 377p
\$2.75 Little

46-4506

A long chronicle of English life and customs over a period from 1865 to the 1940's, in which the central character is Adelaide Culver. Adelaide rebelled against her Victorian family, eloped with her drunken drawing master, and went to live with him in Britannia Mews, where once her father's coachman had lived. Thru the years while the Mews were undergoing their change from slums, to fashionable quarters, Adelaide continued to live there, and in time achieved the very Victorian virtues against which she had once rebelled.

"Miss Sharp has attempted within the compass of a single book what Galsworthy accomplished in a trilogy, and I do not think her talent is equal to the undertaking. In her effort to compass the eighty years her chronicle requires, she cannot give her transitions the attention they deserve. . . Miss Sharp is also handicapped with having to work with too large a cast. She makes her people of passing interest but she leaves them again and again flat rather than developed characters. The social contrast seems forced to me, and usually too obvious to be important." Edward Weeks

Up to the death of the drunken puppet maker, the book, in the sight of the reviewer, was not only vivid but convincing. It would be wrong to say that it stops being vivid there, for Miss Sharp writes with spirit and economy at all times. But there were several things that taxed belief at that point. And it seemed that, after a truly brilliant beginning, Miss Sharp had wearied of her theme. In spite of this stricture the book is diverting, often extremely so. . . Her account of the stables, the slum, the smart Bohemia, where the Victorian spirit, although in full rebellion against itself, ran true to form, is a parable, and by no means a dull one, of all England. If the figures of her fancy had as much reality as the background against which they move, and as much vitality as her symbolic overtones, 'Britannia Mews' would have been something more than a clever book." As a result, once met, his stories stay in the mind. Most readers who open 'Act of Faith and Other Stories' will vividly recall at least two or three of the twelve war fictions the book brings together. Shaw's stories were written during the war about the war, but they cannot be taken retrospectively as an account of what has been. "The assassination of Darian constitutes a rather pointless footnote to the history of the confusion that followed our troops' arrival in North Africa. Irwin Shaw has sought in this episode a simple and significant narrative; but his simplicity has become merely static and his significance grandiose and foggy. . . . The play text is the merest pretext. In this case the preface, not the play, is the thing. Here, in twenty-three pages, Mr. Shaw has distilled the heart-breaking futility and hopelessness of being an American playwright. . . . This preface is one of the theatrical documents of our time. It is all the more effective because it is hysterical, immoderate, and occasionally downright unfair. It proves only one thing, and that only in a symptomatic way: that one of our major playwrights has been clean untinged by the condition of the American theatre." Russell Maloney

Two-thirds of it—a central portion narrating Mr. Sheean's personal experience as an Army officer and correspondent in French North Africa, Italy, India, China and Germany—is full of the warmth of feeling, the sensitivity of perception and the fine literary flavor which, as in his earlier books, make persons and places come to life. . . The narrative itself is less important than the introductory meditation, 'Free Born,' and the concluding anticipation, 'Shadows of the Peace.' "This volume combines the philosophical and psychological approaches to one of the basic problems of Christian theology and human existence. The author, who is dean of the Louisville Presbyterian Theological Seminary, first presented this material as the Sprunt lectures at Union Theological Seminary, Richmond, Virginia, in 1945. In the preparation of the lectures Dr. Sherrill had the counsel of an impressive array of psychiatrists, philosophers and theologians, and the constant cooperation of his wife, who is a professional psychiatric case worker. . . . The book begins in historical vein with a survey of the ancient conflict between guilt and innocence on the battleground of the human soul. This is followed by a brief survey of the development of psychology. . . . Two main questions are involved in the entire discussion. The first has to do

with the nature of the conflict which man finds in himself, a conflict that results in feelings of guilt, anxiety and hostility. The second is concerned with the cure of the soul thus harassed. Guilt itself may be a fact or a feeling." Christian Century

"Every minister concerned with the care and cure of souls will find in this volume an immense amount of inspiration and practical help for both preaching and pastoral counseling when the problem at hand has anything to do with man's sense of guilt and his deliverance from it. . . . A fascinating human interest story is connected with this volume. When Dr. Sherrill was invited to deliver the Sprunt lectures, his eyesight was impaired to the point where reading was impossible. However, his friends and associates rallied around him, and by reading aloud to him and assisting in the preparation of the manuscript made this a cooperative project in a very unusual sense. Hence the excellence of the work, while primarily to the credit of Dr. Sherrill, was made possible by a genuine effort of Christian brotherhood and sharing." F. L. Rearick

"Because of his belief that, in these critical postwar years, 'emotionally healthy people must give friendship and understanding to repair wounded minds,' the rector of Calvary Protestant Episcopal Church, New York City, presents practical, forthright discussions of everyday problems that can be helped by Christian faith. Citing specific examples, he considers, among other subjects, our fundamental responsibility for our own lives and the lives about us, the need for spiritual fellowship, helping people to keep normal, helping the physically and mentally sick, the defeated and the self-deceived." Yet Krishnalal Shridharani, with his exceptional understanding of the East and West, succeeds in this to a remarkable degree. His book suffers in places from lack of continuity and detail, or from over-condensation. At its close, so it seems to me, it fails to tie Gandhi himself sufficiently into the world scene. The treatment is episodic rather than an organized whole. Much of Silone's feeling for peasant humor and wisdom is present, but not to the degree of the novels. . . The scenes of the play are too episodic and static, and the exits and entrances constitute practically all the action that occurs on stage. . . The success with which the novels join action and conscience is not achieved here. The play, moreover, has the over-all quality of secular drama. "Twenty years ago the Theater Guild might have produced it, but it seems unlikely that a Broadway manager will venture it today, with production costs what they are. It is closely geared to local events and to local thought and feeling, and the author is more concerned with the message of his play to his fellow countrymen than with its construction to communicate sustained dramatic excitement. But it could appeal to a limited theater audience even here, and it richly repays reading." W. P. Eaton

SIMMONS, ERNEST JOSEPH. Leo Tolstoy. (Atlantic monthly press bk) 852p il \$5; special ltd ed \$7.50 Little

B or 92 Tolstol, Lev Nikolaevich, graf
47-1423

Comprehensive biography of Tolstoy, written by the chairman of the department of Slavic languages at Columbia university, and based on years of historical research. In his preface the author states that he "has made full use of the vast amount of new manuscript and printed material about Tolstoy that has become available during the last twenty years in Russia." Index.

"Prof. Simmons set himself an enormous task. As chairman of the department of Slavic language at Columbia University he has brought immense scholarship to his work and much experience as a biographer. He worked many years on this book, having access to the yet unfinished feat of Soviet scholarship in the 93 volumes planned for the Tolstoy Jubilee Edition commenced in 1928, 40 volumes of which have already appeared in Russian. . . This vast mass of material is condensed to readable length so that one can follow Tolstoy from birth to death, comprehending each turn in his development and the effect of his experiences upon his literary work. As a source book it is invaluable. But as a creative biography it is not so successful. Prof. Simmons' style is often labored when he attempts to penetrate into Tolstoy's inner nature. His use of words is neither vital nor sensitive enough to illuminate the complexity of his hero; he creates no vivid images and, sometimes, he is guilty of giving an impression of sentimentality quite at variance with the virility and intensity of Tolstoy's own approach to life." "Mr. Simmons's new biography of Tolstoy puts a great deal of material in good order; perhaps as much material as any American will ever need—except a full edition of the letters—in supplement to Tolstoy's own works. The book is written with reserve, care, and out of an almost anonymous sensibility; it assumes greatness in Tolstoy's works and it displays a good deal of the complexity and stress in Tolstoy's life; it makes few interpretations and forces no conclusions. The shape of the book is chronological and factual; it tells what happened when. It is also a warm book. To those who read biography for amorphous pleasure and to mull the habits of men, the book should be interesting enough to reread. But much more than that, the rich material Mr. Simmons presents—much of it new—should be permanently useful to critical students of Tolstoy from several points of view." R. P. Blackmur

"Examines the status and treatment of the aged in primitive societies all over the world. The author seeks to discover what securities for long life may be provided by the various social milieus and what the aged may do as individuals to safeguard their interests. To this end, he has studied the ways in which various primitive societies have ascribed positions of security and prestige to the aged, and in what ways old people have been able to achieve such stakes through personal initiative. . . His over-all comparative analysis reveals apparent uniformities that cut across and underlie the separate cultural unities, and he places special emphasis upon such general trends and their implications for old-age security." SIMON, HENRY WILLIAM, ed. *Treasury of grand opera*: piano arrangements by Albert Sirmay; tr. by George Mead; ill. by Raffaello Busoni; music supervisor: William Steinberg. 403p pa \$5 Simon & Schuster

782.1 Opera—Stories, plots, etc. 46-6446

Covers the principal overtures, arias, duets, etc. of seven operas: Don Giovanni, Lohengrin, La Traviata, Faust, Aida, Carmen, and Pagliacci. Plot or story of each opera is explained, and original text and translations of the arias, etc. are given. The book is the exact size of the standard music sheet, and the book is so bound that it will rest conveniently on a piano rack.

"This fine volume, bound in a limp cover for the convenience of a pianist, and very attractively illustrated in color and black and white, contains over 300 pages of musical text. . . The outstanding merit of this volume, however, is that these operatic pieces have been presented with simple, ingenious piano accompaniments and that 'the vocal line is given separately, and when the range is too high for the average drawing-room singer, the numbers are transposed to a lower key.'" R. E. Danielson

+ Atlantic 178:156 N '46 2050w

"The charm of this volume is not only that you get the arias, but special translations of the words have been supplied by George Mead, and the music of each opera is introduced with a sketch of that opera (and now and then a theme) delightfully written by Simon and adorned with atmospheric illustrations of various scenes by Raffaello Busoni. No mere anthology, here is the product of an inspired collaboration by a group of cultured opera lovers who have approached their task imaginatively and as a labor of love." J. W. Rogers

The titles of two famous 'flower songs'—one from 'Carmen' and the other from 'Faust'—are transposed; and it might be advisable to print the title of the opera above each individual aria. And, while any reader will enjoy the editor's breezy discussion of the operas, there will be argument about the English translations of the arias that appear above the French, Italian and German in this 'Treasury.' But these are minor faults. On the whole 'A Treasury of Grand Opera' is a bright, helpful and extremely likable book edited by a man who admirably communicates his belief that 'grand opera, as developed in the eighteenth and nineteenth centuries, has given us the most enduring, the most popular, and in their own way, the most emotionally realistic of all stage works.'" SITWELL, EDITH. Fanfare for Elizabeth. 227p \$2.50 Macmillan

942.052 Great Britain—History—Henry VIII, 1509-1547. Elizabeth, queen of England, Great Britain—Court and courtiers 46-5244

A picture of the England into which Queen Elizabeth was born, which gives more space

to Henry VIII and his wives than to Elizabeth herself. Thru the story of poverty, love, grime, intrigue, murder and luxurious living which made up court and London life in those days, Elizabeth appears at times, and her life up to the age of fifteen is traced, more as an adjunct to her father's life, than as the main character.

"It takes effort and concentration to get through the book straight, but it would be a joy to read it in a series of intellectual snatches on the way to and from home on a commuters' train (air-conditioned). The diet throughout is terribly rich, and every mouthful must be chewed with care, or the diamond ring, the stuffed and roasted stag, brace of murdering dukes, pitiful ghost with an artificial pansy, and basic reference to Elizabeth, might otherwise be swallowed without proper notice. And the over-all nourishment in fleshy vitamins is slight. However, let it be said clearly and with emphasis, this is the writing of an intelligent and contemplative woman." Donald Fairchild

"To read this book as history is to be merely irritated or perhaps bewildered. But straightforward history is not Miss Sitwell's design, nor is it to her liking. This is a theme with variations, a meditation, a reverie, a nightmare evoking the terrible and tremendous milieu in which were shaped the character and fortunes of Queen Elizabeth. . . . Miss Sitwell's style is, of course, often brilliant and sometimes moving, conveying as it does a sense of dark passions and dire consequences; but it is also sometimes slovenly and occasionally ungrammatical." "In spite of its title 'Fanfare for Elizabeth' is mainly about Henry VIII and his six wives. And any review of a book about Henry VIII that appears in a Catholic magazine must make the point that Henry was a terrible man. . . . But there is another point that is almost more interesting. . . . Edith Sitwell writes very well, and perhaps it was her sensitive ear for the sound and rhythm of strong, poetic language that led her to sprinkle her book profusely with quotes from the contemporaries of Henry and Elizabeth. At any rate, this admirable device has not only served to conjure up the rich and sordid atmosphere of London in the sixteenth century, but has also brought to light a lot of good prose." J. C. Cort

"The story is a little hard to follow, partly because it was long ago, partly because, like the time's language, it was involved with complication: no one knew all that was happening, and many, who knew a part, were crafty dissemblers and liars. And in this account it is a little hard to follow, also, because Miss Sitwell's sentences come by in such caparison and panoply that their gorgeousness distracts

the reader's attention from the direction in which the procession is going. . . . Rich prose, spirited prose, delightful because delighted, fine, not always fancy, writing, with just now and then a human instance where the baroque lapses into bathos." Rolfe Humphries

"Miss Sitwell's chief means of enlivening her subject matter is to shorten her paragraphs into one or two sentences. . . . But the method results in a sense of strain on the part of the reader and in the end defeats its purpose. There are other criticisms, beyond this relatively minor stylistic one, to be made of Miss Sitwell's book. She assumes, too unquestionably, that Henry VIII was the author of that famous lyric 'Oh, Western Wind.' And why does she not use as her frontispiece, instead of a portrait of Elizabeth in her middle age, the delightful Windsor portrait of Elizabeth at thirteen? It would be far more appropriate in a book concerned only with Elizabeth's childhood. Her footnotes are also annoying and inconsistent. . . . But its chief weakness, on the artistic rather than the historical side, is in its scope. It ends with the execution of Seymour in 1549, when Elizabeth was sixteen and had still nine years to wait before becoming Queen." Theodore Spencer

The second volume of Sir Osbert Sitwell's autobiography, of which Left Hand, Right Hand (Book Review Digest, 1944, 1945) was the first. The present book, which carries the account from his seventh to his seventeenth year "is a child's-eye picture of Edwardian England, a portrait of a great family, and an astringent commentary on the adage that schooldays are 'the happiest days of our lives.' But it is, above all, the story of an artist's faltering voyage through boyhood, a remembrance of things past that fashioned the writer and critic who has played so prominent a role in 'the Modern Movement' in England." The spacious country house and the Edwardian manner of living seem now as remote as the Mayans, so that this book is as good as a trip to a museum. In a world of pressures toward dead levels of mediocrity and conformity, such a book as this is a boon, for it breathes back the full illusion of life into human types of independence and integrity as well as of idiosyncrasy. . . Sir Osbert's achievement is considerable, for with the aid of his visual memories still fresh and clear, his gathering and selecting of sensuous impressions, and the leisurely embellishments of his rippling style, he causes the fragile scarlet tree of an individual life to grow again with a completeness that the average biographer, not being also an imaginative artist, does not even dream can exist." "The story of a girl who by sixteen was thoroughly bad, not in the sense in which that word is ordinarily applied to a girl, but by every canon of decent human behavior. She loved no one and respected only those who were tougher than she. Her mainsprings of action were fear, hatred, and greed—fear of her father and of the reform school of which her paralyzed old grandmother told lurid and once-true tales; hatred of the only life she had known, of wearing other people's smelly castoff clothing and living in a vermin-ridden tenement; and greed for money, which meant at once escape, pleasure, and power. These last she got, for a time, by procuring little girls for a group of elderly and well heeled pervers. Tragedy inevitably followed, and the men scuttled, leaving her to hold the bag." "When I pass from the purpose of the work to its 'art,' I cannot report that 'Margaret' excels as a work of fiction. The tough little girl who gives her name to the story has a certain three-dimensional quality, but the other 'characters' are, from the point of view of fiction, mere cardboard personages—the innocent little girl led astray by seducers, the suffering parents, the drunken father and the peasant-type wife, the wicked old gentlemen in their den of depravity, and so on. The fictional formula is a bit frayed, and I do not see that the author has brought much enrichment to it, however excellent her sociology may be." H. M. Jones

"Mrs. Slade makes this girl uncomfortably real and credible. You see her as the outcome of a heritage and circumstances that perhaps could hardly have eventuated otherwise. Yet this story is not a blanket protestation of the evil partnership of avarice and vice. In the same house where Margaret's family brawled lived other people among whom privation had deepened ties of affection, strengthened mutual help, and engendered the terrible wisdom of the meek. The driving force of evil came from men who had money to buy protection and whatever else they wanted. . . . The story will inevitably shock many readers, not only because of its subject matter but also because of the unsparing realism of some of its portraits of human wreckage. That realism, however, is very different from sensationalism. Behind it lies the author's concern for children whose parents, love notwithstanding, cannot ward off the pressures and exposures of penury or who have themselves been warped by those strains." This will prove useful to medical students and to clinicians in evaluating their experience in the treatment of disease, as well as in the preparation of papers for presentation before medical bodies. The author covers the field thoroughly, presenting the various subjects usually found in a book on public health. . . "Tells what it is like to be a White House correspondent, and also a good deal about two Presidents and their associates. Mr. Smith is one of three 'wire service' correspondents assigned to cover the President full-time. He has been at this job since 1941, and in that time has seen something of Berlin, Algiers, Hawaii, Independence, Hyde Park, and Washington. . . His account of the scene at Warm Springs, on the day of Mr. Roosevelt's passing, is vivid and moving. SMITH, CHARD POWERS. Housatonic, Puritan river; il. by Armin Landeck. (Rivers of America) 532p \$3 Rinehart

917.44 Housatonic river 46-4413

A description and history of life along the Housatonic river from the Indian days. In 1639 a band of Puritans landed at the mouth of the river, and with their advent the modern history of the Housatonic valley began. The author stresses the intellectual life of the valley, with much detailed history of the Sedgewicks, Longfellow, Melville, Hawthorne, Fanny Kemble, and others who lived or summered in the Massachusetts section of the valley. Bibliography. Index.

"Mr. Smith knows the Valley, past and present. He has read widely in its local histories. He writes with authority. This is the first Rivers of America book I have read which stresses the intellectual history of its valley. Mr. Smith knows that place is people. What interests him and us, his readers, is the effect of event on the people. He traces the man of the Valley from Puritan days to today, noting all the important changes in his psychology, showing how the Yankee of today got his sense of humor. The trace makes interesting reading." Horace Reynolds

"In addition to his theses and analyses—some you will agree with, some you probably won't—his preachments and his occasional purple patches about cosmic forces and symbols of eternal truth, Mr. Smith has assembled a wealth of interesting and instructive Housatonic lore from every period of its history. . . As a native midwesterner, I must also thank him for this remark, apropos the 'first billion and a half years' of the Housatonic's history: 'New England has never quite forgotten that in the old days it was a separate continent.'" "The book that Chard Powers Smith has written about the Housatonic is one of the best in the generally disappointing Rivers of America series. It is one of the best because Smith has put more work into it than most of the other authors have put into their volumes: he has consulted more records, talked and written to more people, traveled more extensively through the valley and lived there long enough to play a part in town politics. . . I should like to recommend it to all the valley people; and yet, as a critic and former Pennsylvanian, I can't help pointing out its faults, most of which it shares with the other volumes

in the same series. Its emphasis, like theirs, is historical or antiquarian rather than geographical and social." Malcolm Cowley

"It is true that Chard Powers Smith's pages lack almost completely the wit, urbanity and magic that made the Cabell-Hanna book about the St. Johns at least a minor miracle of belles-lettres, and it is regrettable that it is not less diffuse and more selective. But it partly compensates for this by its veritable spring flood of facts and information so that it is as much a guidebook as an essay. Nor is it without a sort of pinched and dry New England humor. Moreover, when Mr. Smith tells us about its geology, when he writes about its Indians and their relations with the white man, when he tells us about the literary group there, and of the tally-ho days at Lenox and at Stockbridge, he shows that understanding can be just as good a tool as inspiration, and does very well indeed." "Mr. Smith, or his proof-reader, has made a good many errors, such as a rather gratuitous reduction in the age of Harvard College; he has Hawthorne's red house visible from the Aspinwall Hotel, which wasn't built till ten years after Hawthorne's house burned down, and he skips up and down the river at times somewhat disconcertingly, on the whole rather neglecting the southern reaches. But he has probed deeply into regional records, and made the river a microcosm of New England history." W. P. Eaton

"No resident of the valley, summer or permanent, can afford to miss Mr. Smith's review of its past and its probable future. Nor is the interest of the volume confined to the locality it explores. A great deal of American history gets told in the end, and always from a point of view which the author keeps clearly defined. . . Armin Landeck's designs for the book, distinguished as the work of this artist always is, lose some of their effect in the printing, for the paper is too soft for them. This is a pity, since Mr. Landeck is celebrated for the incisive drama of his blacks and whites. Some of the plates, fortunately, suffer less than others; but it happens that I have seen the original of the Lenox church, and I sadly observe that now the great clock has no hands." Mark Van Doren

"A work-study book for the serious student of short story techniques, done in the form of a duet between a writer and a teacher of English (at Smith), discussing the specific fictional problems of short story writing. First Ware prefaces a short story with a skeleton showing his approach to it; then the story itself is followed by comments by Bailey, underlining the methods of construction in the specific story, and in writing in general. There are twelve stories, springboarding techniques of ideas, exploration of the same development of the mechanisms, the solutions for handling character, dialog, background, etc. There are practical suggestions, descriptions of useful mechanisms, bald devices, the workability of the commonplace and familiar, the uses of notes, the process of transforming actual events and characters into fictional material, attitudes toward work, machinery for creating plausibility, development of self-criticism." *Kirkus*

"Lady authors with perpetually incompleting manuscript in escrittores will simply adore this book. It makes everything so easy, sugar-coating the creative writing process with Author Ware's definitely readable but by no means typical published stories to divert and only a modicum of Teacher Bailey's precepts to digest. Still, 'The Aluminum Heart' is limited in scope by its theme. The dynamic truth of social interdependence is difficult to project on the marriage screen without dramatic force. Perhaps overdramatic in his avoidance of melodrama, Mr. Smith does so adequately but not forcefully. Since the material is so refractory, should not the preparation of the book have been deferred until, for instance, at least all the results of the 1940 census were available? I believe not. Discussion and further study, which should be lively in both the United States and Brazil, will serve to bring us more data, in the light of which some of Dr. Smith's conclusions may have to be modified. "His 'conclusion' occupies only 7 of his 800 pages. Too brief to be anything but suggestive, it is valuable in what it says on 'cultural lag,' on needed changes in agrarian, immigration, and hygienic policies, and on necessary reforms in landholding, property tenure, social legislation, and trade and municipal systems. He is sound when he says that 'Brazil would be wise to double, double again, and then redouble the number of students it is sending to study in foreign universities,' though here one must correct his preference of 'scientific training' to 'training in the humanities,' the latter being nowhere so necessary as where the former combines the lure of novelty with the chance of reckless commercial exploitation. But in these few pages Dr. Smith adds to his monumental encyclopedia of facts a clue to some of the measures for 'valorizing its people' whereby the physically largest among the American republics might bring its size into some favorable ratio to its nationalistic ambitions, its latent potentialities, and its importance to the economic and military strategy of the Western Hemisphere." It is to furnish just such a background that this book is written, and it succeeds splendidly in its set task, partly because the author knows his subject so well, partly because he knows how to write for the general reader. These chapters maintain the previous high quality and simplicity of the text... The highest praise that can be accorded the book is that it is as graphic a record as the best popularizer of scientific work could write, and considerably more accurate, as befits an author with his training in Princeton, Harvard, and the Cavendish Laboratory, Cambridge, England. 940.63493 World war, 1939-1945—Personal narratives, Belgian. Belgium—History—German occupation, 1940-1945 46-25104

The diary of a Belgian lawyer's wife kept during the five years of the Nazi occupation of Belgium: from May, 1940, to May, 1945. The author's husband, a former Labor member of the Belgian parliament, was a prisoner of war in Germany, and to the author fell the work of feeding and raising their three sons. In the course of those years she also aided many fleeing Jews, and saved from slave labor almost a hundred people.

"The total effect of 'Age of Assassins' is far from dull. After all, M. Soupault is a writer, and when the matter that lends itself to good writing comes to hand he makes excellent use of it. Perhaps the best is in his treatment of the psychological and moral influences of prison life. He reveals to us, for example, the mental workings, the psychological preparation for death, of men who believe they have been chosen as hostages. He tells us of the art of dreams which the imprisoned man must cultivate. And through the days spent in listening to the dreams retailed by his cellmates, he thinks he discovers richer visions possessed by innocent or ignorant men." W. M. Lowry

In an age in which the dominant question is getting to be whether you believe in the police state or not, we should

all know at least what we are being asked to accept. Hannah Josephson's translation is, as usual, admirable." A. M. Schlesinger, Jr.

+ — Sat R of Lit 29:13 My 4 '46 950w

"More moving than the actual contents of the book is his motive for having written it. Filled, as he had been since the armistice of 1940, with contempt for the meanness, mediocrity and utter cowardice engendered in many of his countrymen by the Vichy regime, Soupault, still looking for men who loved liberty more than life, found them where no liberty existed save in the mind: he found them in prison. For these men, his companions in the north cell block of the Tunis prison, for these outcasts from a weasel-hearted society, more than for his own sake, M. Soupault set down his prison experience. . . . 'Age of Assassins,' another testimonial to human suffering, lacks neither dignity nor conviction, but it is a repetitious, formless book. Had M. Soupault been willing to employ the skill of the artist in setting down his tale it might have become an abiding record and commanded a hearing for prisoners throughout the world." Virgilia Peterson

His volume is written in the form of sketches of incidents, portraits of personalities encountered in his journeys, and follows the sequence of the diary which forms the skeleton of the book. Thus there are impressions of the British army of the Rhineland, conversations with German intellectuals, meetings with Polish and Russian displaced persons—in Cologne, Bonn and the Ruhr in Germany. The French sections present a brilliant picture of Paris after the war—meetings with soldiers returning from prison camps, as well as accounts of personalities such as André Gide and Picasso." These scholars and librarians compose a microcosm of the human society of Germany and an example of the problems of administration on the loftiest level. . . Spender has the good English quality of seeking always the good answer to the matter in hand, whatever the ideology says. He sees through such debating points as 'Ought we to treat the Germans kindly or strictly?' and 'Are all Germans responsible?' and he discovers through his own patience the essential need to treat every German as an individual whose civic duty is on trial, no less but not much more than the victor's own." But a far more serious fault is the omission of all discussion of the British occupation policies and personnel. This is particularly to be deplored because the British, in their very polite but nonetheless effective way, had drawn what amounts to a silken curtain over their German zone, as this reviewer has occasion to know. . . It is a pity that so discerning a witness as Spender has found it necessary to be reticent on the subject. Apart from this, however, 'European Witness' is an important book in that it adds to our understanding of contemporary Europe of which Germany, sick though it may be, is still a vital part." S. K. "Now there were and are some millions of Nazis in Germany, and it is strange that Mr. Spender never talked to any of them. They would all be flattered to read his portrait of themselves. Yet the Nazi is neither daemonic nor diabolic. He is short and fat, carries a leather dispatch case and even among his ruins he presses his trousers neatly every night. He is a human being who is entirely at the mercy of social and economic conditions; and one is inclined to think that whenever and wherever these conditions degenerate below a certain level he turns and rends himself in panic. He is far more frightening than Mr. Spender's demons; moreover, he exists. Mr. Spender will not agree with this because he has a genuine and sincere liberal optimism that will not allow him to think so badly of human nature; though in recompense he suffers from nightmares. Let us hope that Mr. Spender is right; and in the meantime we should thank him for the best piece of reporting that has come out of Germany." Goronwy Rees

Yet this is a troubled book, with a kind of visible embarrassment running through it, and, therefore, less than first-rate. The reason lies partly in the nature of Spender's mind and partly in the conflict he felt between the claims of his sensibility and his official duties. . . Hence the uneven mixture in his book of impressionistic detail and dutifulness; the feeling one gets all through it of

a man who did not feel free to speak his own mind, and who for all his own humaneness, his automatic good will, was without any controlling political ideas by which to organize his material and thus to wed himself solidly to his subject." Alfred Kazin

To that end, Dean Sperry examines such problems and situations as Christian tolerance in the face of a sense of mission; the attractiveness of an evasion of life's strictures; the demands of conscience and the truths about habit, the sense of the unique and the new, with an entailed loneliness; the worth of the individual and the apparent unfairness of God. All these are woven around the idea of Christianity as 'a way' and of Jesus as 'The Way.'" (Crozer Q)

574.971 Natural history—British Columbia 46-6675

Account of the life and adventures of a British naturalist and his American wife during the years they spent in Driftwood Valley, in the British Columbian wilderness. They were 240 miles from the nearest railroad and telephone. From their cabin headquarters they collected plant specimens and animal skins and made motion pictures of the region for the provincial museum at Victoria. Lists of plants and animals in the region are included.

"Mrs. Stanwell-Fletcher does a thoroughly satisfying job in her descriptions of nature and animals. Her characterization of the horses endows them with real personalities, and her portrayal of the wolf with his intelligence and dignity and his mating call of unearthly beauty is one that will forever remain part of the reader's conception of wolves. It is too bad she does not love mankind as well as she does animals. Except in her endless praise of the dauntless and perfect 'J,' as she calls her husband, and of her parents, she has some small, rather unpleasant things to say of all the human beings who enter the story. . . Nevertheless, she is sensitive, observant, and almost poetic about wildlife, and her book makes good armchair escape from too much civilization." E. L. Stewart

Looking from their currently rare angle, this couple evidently did not work around to anything very near the traditional Christian viewpoint, but their naturalism is not like most, and is decidedly freer and broader, and rather spectacularly healthy." 423 Lexicography

46-5776

"About ten years ago the authors became interested, each independently of the other, in investigating the beginning and the development of English lexicography. Having each published an essay on the subject and having discovered a common objective, they decided that, in the study of so large and complicated a body of materials, it would be wise economy to pool their efforts. The result is this book. . . The method is historical. Questions of philology and etymology have been discussed only in so far as they contribute to the history of the English dictionary in the seventeenth and the first half of the eighteenth centuries. Of the dictionaries, expositors, and glossographies which were printed between 1604 and 1755, the authors give, within the stated limitations, as full, specific, and accurate information as they have been able to ascertain. The qualifications of dictionary-makers for the tasks which they set for themselves, their expressed aims (as far as possible in the language of the compilers themselves), their sources, their methods of compilation, the interrelationships of the various texts, the relation of English dictionaries to contemporary bilingual dictionaries, the readers for whom each work is intended, the vogue and usefulness of the various dictionaries—these are among the more important topics treated in this book." "This book aims to develop the faculty of making judgments about literature. It does not pretend to tell how to read 'efficiently'; it is not a systematic discussion of literary 'types,' nor is it a treatise on aesthetics. It makes no claim to new and startling theories; rather it attempts to reaffirm certain basic

"This is an excellent account of the nature—the unifying principles—of poetry. It is original as a reordering, and valuable as a synthesis of the commonplaces in modern critical theory and practice. The commonplaces are borrowed chiefly from Allen Tate, John Crowe Ransom and Yvor Winters; the technical approach from I. A. Richards and Cleanth Brooks. Whether the single and insistent argument—that a poem is like a person—be rejected or accepted, there remains a core of valuable dogmas and definitions, and a chain of poetic analyses brilliant in individual perceptions, though seldom more than superficial as *explications de texte*. "Miss Stead's excursion into the world of erotic experience is satiric and coldly intellectual; her material earthy, lusty and lustful, and

highly eccentric. One's attention is caught by her individual characters as the work of a highly creative and many-faceted mind; and one's mind rejects them, in the aggregate, as improbable members of a recognizable bourgeois society. While the Morgans and the Foxes, who mainly dominate her scene, are brightly and mercilessly delineated, they fail, as a group, to give the picture of an American family. . . There are pages here of beauty, preceptiveness and sensitive writing. Miss Stead's portrait of Grandmother Fox, an old woman confused and shattered by the vagaries of her son and his dual household, is in the genre of the best European literature. "To look at Mr. Steele's work in perspective is to recognize the merits and defects, as well as the literary models, of the group to which he once belonged. Let it be said first, and with emphasis, that whatever his weaknesses, Mr. Steele wrote stories. Not sketches, not psychotic manderings; stories. . . . When everything has been said in depreciation, the fact remains that Mr. Steele has produced some memorable stories. 'The Man Who Saw Through Heaven' is a remarkable dramatization of a religious theme. . . . 'Can't Cross Jordan by Myself' is a farcical ghost-story so well done that it leaves one wondering why Mr. Steele has so seldom allowed himself to be funny." De Lancey Ferguson

STEEN, MARGUERITE. Bell Timson [Eng title: Rose Timson] 373p \$2.75 Doubleday [10s 6d Collins]

46-5870

Character study of an English woman, divorced from an unstable husband. Bell Timson determines to bring up her two daughters to respectability and wealth, and with that in view she takes up the profession of a masseuse. Gradually the idea seeps into the reader's consciousness that Bell has other ways of earning her living. The climax comes when one of her daughters is about to become an unmarried mother. Then Bell's real "profession" comes to view.

"In all her dealings with [the heroine] Miss Steen has a sure touch, the only uncertainty in the reader's mind being about [her] origin. She is made so real that one takes her for granted as sprung from the small shop or the bar, and it comes as a surprise to learn that she is the daughter of a veterinary surgeon and spent her girlhood in comparatively cultivated surroundings." Manchester Guardian p3 Ja 11 '46 240w

"Marguerite Steen, in her latest, has put between covers the very essence and distillation of a soap opera without, however, benefit of the soap. The story of Bell Timson is indeed an unsavory one. . . . To make a poor book worse, Miss Steen does all the things that no other writer of long novels should ever do. . . . In addition to its inconsistencies of action and character, Miss Steen's book is poorly written within its very word frame." Florence Crowther

— N Y Times p14 J1 28 '46 500w

"Miss Steen's earlier novels, even though some of them were very bad, generally gave

the impression that she would eventually produce a first-rate piece of fiction. This story . . . is not first-rate, or anywhere near it, but it is written in such vigorous, if rather unbuttoned, prose that the reader will probably once more expect Miss Steen to do better next time."

— + New Yorker 22:67 J1 27 '46 100w

"This is a masterful job. One is a little puzzled, however, as to just how much Miss Steen is a critic and observer, and how much, at times, she identifies herself with her heroine. There is often a curious mixture of the objective and subjective. Like all Miss Steen's novels this one is filled with vigor, and the power and drive that vigor, directed, begets. Once you pick the book up, you will read it." Struthers Burt

Sat R of Lit 29:14 S 7 '46 700w

"Marguerite Steen's new character is not in the least dull. It would be a mistake to disclose how this unscrupulous woman fights her way from poverty to riches, for it is a point of skill in Miss Steen's design that she gives her plan away inch by inch and holds a conscientious reader tantalised for a long time. . . The characters of a novel are easily punctured, and these silly small mistakes leave their inevitable mark on the upper ranks of Miss Steen's society. Which is a pity, for most of the book is firmly written and the suspense is admirable." V. C. Clinton-Baddeley

"[Bell] is always the central figure of this long novel; she is far from being an admirable or even a sympathetic woman, but she is thoroughly and convincingly real and alive. Miss Steen is not always perfectly successful with her characters in high society . . . but she seldom fails with the vivid, comfort-loving, slightly off-colour inhabitants of the circle to which [Bell] Timson naturally belongs."

+ — Times [London] Lit Sup p41 Ja 26 '46 330w

"Miss Steen possesses lively inventiveness, a keen dramatic sense and excellent grasp of character. For the first hundred-odd pages, while Bell is allowed to tell her story in the first person, the narrative moves with burly animation, colored by her personality. In the second and fourth sections of the book, however, the author has elected to shift to the third person, obviously in order to study the two daughters, especially Kathy, from within and to present Bell through other eyes than her own. While the picture of an imaginative, fifteen-year-old girl in love with a middle-aged man is skillfully drawn, it lacks the vitality of the earlier pages and a fundamental unevenness results." The thesis of this book is that man can remain healthy on a diet of meat only. The author describes the book as a first installment of a series of books under title: *The Lives of Hunters*. "In this first volume, he furnishes ample material for a sounder comparison between our lives as agricultural people and the lives of those others who still live by hunting. Thus he begins with the home life of Stone-Age man and gives us a fascinating account of his life with the Eskimos. It changed the man Stefansson, his tastes, and dietetic beliefs completely. Because he was able to observe these changes intelligently and uncompromisingly, he soon recognized as a myth the established view that man cannot live on meat alone." (Sat R of Lit) Bibliography. The word 'associated' is likewise interpreted broadly to include relationships ranging from true symbiosis to those in which the insect or tick appears to act merely as a mechanical carrier of the micro-organism. Some idea of the comprehensiveness of the work is indicated by the fact that the bibliography, which includes only references cited in the text, contains approximately one thousand seven hundred references. The material is arranged by type of microbe, thus: Intracellular bacteriumlike and rickettsia-like symbiotes, Yeasts and insects, and Protozoa in termites. The great virtue of 'The Reasonable Shores,' however, is that it gives us an honest story of family life in England in the war years which, while the war is always there, shows how normal, under so terribly abnormal conditions, life in the country remained." The treatment of the servants is too nearly caricature; more frequently shown in bawdry and buffoonery than the tale requires, they are the peasants of an American observer who can never forego regarding them as quaint. Complete enjoyment is further hampered by a nagging suspicion that Pia's story never successfully blends with Lucy's, though her presence is helpful to the action." D. S.

Neither in her own attitude nor in the sympathies of her characters does the author show any concern for or against the great catastrophe in which they moved. Lucy, the American girl, is untorn by conflicting emotions during the war, is never troubled by the quite alien feudal attitude of

her husband, and never stirred beyond the immediate problems of her own son's emotional life. The author, looking through Lucy's eyes, is neither ironic, bitter nor kindly toward the class she describes. The result is a book which resembles a photograph rather than a portrait—perfect in its details but lacking a point of view that would give meaning to the whole."

On the other hand, he is often fascinating when he presents the mighty fact of the discovery of the spear, for instance, and shows in vivid passages how it hastened man's development and changed his viewpoint. . . Just why this is so—when getting through the usual collection of miscellaneous facts is like chewing reinforced concrete—would be hard to say. Perhaps it is because genuine enjoyment is bound to spread, and here it spreads at once to the reader from a man who, without trying to do so, makes it apparent that he is having a wonderful time with his snapping up of well considered trifles. For they are well and truly considered, these small matters about which so many of us have meant to ask somebody some time, only we just don't get around to it." M. L. Becker

"This distinguished correspondent reports here significant observations and opinions which resulted from his travels and experiences in 44 countries between 1939 and 1945. Americans cannot afford to ignore his conclusions. Discussions of our revolutionary world, of the new Europe and new Soviet power, precede 'Which Way China and Japan,' 'What is Fascism,' and 'The What and Why of Communism.' Sections on Greece and socialism, 'the middle ground,' lead directly to his final query 'Are we educated for peace?' The deadline date for our survival will shock readers who have avoided warnings of atomic experts." (Library J) Index.

For descriptive note see Annual for 1945.

"With the treatment of population and raw materials, the experts in these fields may quibble, and the data are presented less exhaustively and critically than would have been possible in a book addressed to a technical audience. Yet the author has had the courage to tackle big questions, has synthesized a broad range of technical data bearing on these questions, and has presented his findings in well-organized fashion with admirable literary skill. Between the time of its printing and publication the book's thesis that prediction is difficult was fulfilled by the first use of atomic power in war; and a special preface was inserted dealing with the power implications of atomic fission." "An honest effort to evaluate the changing distribution of power in the world, especially industrial power, in terms of political rivalries. The inevitable result is to fix attention on the power potential of Russia and of the Far East. Where readers may dissent from the author's analysis is in his use of a rather narrow range of power components, psychological and related factors seemingly being excluded."

Foreign Affairs 24:550 Ap '46 110w

"The internationalist and the political idealist will find Mr. Strausz-Hupe's book somewhat less than satisfying. Underlying it there seems to be a resignation, not too reluctant, to the continuation of the system of national states, a rather unquestioning acceptance of economic *laissez faire*, a fundamental submission to a determinism, if not geographic, of subtler but no less unyielding forces. To call such a treatment 'realism' is to beg a fundamental question. Perhaps restrained by the nature and purpose of his book, the author impresses one as an academician rather than a global thinker. His approach to the basic problems of a rational world order is somewhat too halting to be inspirational."

At times the reader gets the impression that Dr. Strecker would improve a revolting situation by the procedure of beating people's brains out. This might give him the emotional satisfaction that his profession, by definition, denies him, but it hardly illuminates the problem in hand." E. B. Garside

"Professor Stringham's enthusiasm for his subject and experience in dealing with it are clearly evident. There is only one major criticism that can be levelled against his book, but that, it seems to me, is a fundamental one. It is a question of approach. Throughout most of the work the emphasis is on romantic and post-romantic music... The author's approach might be understandable if his work were directed toward casual listeners who know very little about serious music and want to learn more about that part of it which they hear on the radio. But college students who are interested enough in music to take a course in appreciation are entitled to be introduced to the riches of sixteenth-century music as well

as to the extraordinary creative activity that has been going on for the last decade or more, especially in this country. Surely such students have a livelier curiosity about the art than Professor Stringham gives them credit for, and if they haven't, is it not the teacher's duty to arouse it?" Nathan Broder

"American-born Mrs. Strong was the first woman correspondent permitted to enter Poland, close at the heels of the Russian army. She was able to witness Poland's liberation and the formation of the Lublin government. And she has made the most of this unique opportunity. She writes with much skill and such a warmth of feeling that her book is likely to further substantially President Boleslav Bierut's cause among Americans not prejudiced in favor of the London Poles. . . . What gives the work a definite value, despite [some] reservations, is the author's love for people and her ability to make them come alive in a single short sentence. The political claims she supports may be disputable; so may be the economic program she accepts. But, after reading her book, no one can doubt the genuineness and depth of the feeling that drives on the Polish people in their groping toward a brighter future." E. S. P.

"Faintly satiric, warmly sympathetic humor characterizes Foretaste of Glory. . . . The book should not be read as one would read a novel, but dipped into as one dips into a volume of stories or examines a series of portraits. Yet it has unity of time and place and a compelling central theme. "The achievement of this book is a very real one. Yet one may detect in it, as in other works of Jesse Stuart, a sometimes uncontrolled and distracting tendency to caricature. Here and there characters are simplified into distortion. The real gusto, the genuine life of the novel, is in no way dependent upon quaintness or grotesquerie; yet unfortunate touches of both these qualities break in. Some of the excessive folksiness is at best suspicious. It is not that people like these could not exist; it is merely that here their existence seems exploited either for laughter or for surprise. And the fact that there is so much good and honest rendering, within a design that admittedly allows for more breadth than depth of

treatment, makes the occasional exaggerations stand out. They are like small accidents, understandable, but still faintly disturbing." Richard Sullivan

"We are reminded of Masters's 'Spoon River,' although Stuart's book is neither as poetic nor as exalted in vision as Masters's. But we are reminded nevertheless, by Stuart's genuine feeling for the essential moments and gestures that make people significant, by his intuitive sympathy. Every one of these Blakesburg sketches has something to tell us of the ways of mankind in a manner quite earthy and realistic and unspoiled by any kind of cliché. "Don Sturzo's 'Nationalism and Internationalism' is especially valuable as an historical and analytical treatment by such a Catholic of the political and social (and therefore economic) tendencies in the nineteenth century which led to the present phenomenon of nationalism—the phenomenon of a good thing, love of country and a desire for self-government, exaggerating itself into a very bad thing, worship of country, 'right or wrong,' coupled with active contempt or even hatred for all other countries. . . But in fairness to him it must be said that his publishers have been remiss in their editing of the translation of this work. It is not only full of what might be called Latinisms—constructions characteristic of Italian, French or Spanish, but terribly awkward in

English—it is replete with faulty grammar. Too bad, since such minor defects could so easily have been remedied." H. L. Binsse

B or 92 Monroe, James. U.S.—History—1783-1865 45-10307

For descriptive note see *Annual* for 1945.

"The wealth of historical allusion, the dubious interpretation, the meagerness of biographical narrative which characterize the volume make it obvious that Mr. Styron has read widely but indiscriminately. This conclusion is corroborated by his extensive, atrociously edited bibliography. Mr. Styron lists one of the two major collections of Monroe manuscripts, as well as twelve minor collections of the period; but there is little evidence of their use in his pages. He cites as authorities such marginal writers in the historical field as Walter Lippmann, Paul Winkler, Sumner Welles, and Porter Sargent; he appears oblivious to the information bearing directly on Monroe's career which he might have gleaned from the monographs of Dexter Perkins, Beverly W. Bond, Jr., E. Wilson Lyon, and E. H. Tatum, Jr.—to mention only examples from the field of foreign relations. The University of Oklahoma Press has made Mr. Styron's always stimulating and frequently provoking book into a compact and attractive volume, with a format charmingly redolent of the age of Monroe." "To sustain his 480-page biography, Styron has written a long disquisition on the times, and has focused attention on Monroe only at intervals. The material which he presents specifically on Monroe's career could probably be included in a hundred pages: for long periods Monroe is lost in the background. The volume is particularly slow in getting under way, with a detailed discussion of the Birth of an Era, the sixteenth to the eighteenth centuries. Styron, who seems to be something of a Southern agrarian on the defensive, obtrudes himself throughout the volume in these long asides. The narrative is further interrupted by hundreds of footnotes rarely containing anything which, given the author's discursive method, could not be better included in the text. Much of the volume is needlessly complex and drearily written, but it is dotted with brilliant vignettes of lucid prose. . . 'The Last of the

Cocked Hats' would be far the better for a comprehensive and astringent job of editing." Coleman Rosenberger

"Mr. Styron treats any historical event of the years when Monroe was alive as an excuse for variations on any theme that appeals to him. He is no more bound to his ostensible subject than is a filibustering senator. . . But as, unfortunately, he is decidedly inaccurate in his illustrative anecdotes, he has also a very defective command of chronology, so that we have Charles James Fox and Joseph II both commenting on events that occurred after their deaths. Something of the same spirit seems to have affected the illustrations. . . But if rather an odd, this is an interesting and highly readable book, even if it attains readability by devoting, at a rough calculation, half its space to topics only remotely connected with that dull, dim, worthy man James Monroe."

SWISHER, CARL BRENT. Growth of constitutional power in the United States. 261p \$2.50 Univ. of Chicago press

342.739 U.S.—Constitutional history

A46-542

A discussion and interpretation of the United States constitution, its growth and development, and its effect on today's constitutional problems. Partial contents: Democratic conceptions of the Constitution; Shifting boundaries of federalism; Constitutional sources of expanding power; Constitutional barriers to the exercise of power; The growth of administrative justice; The Constitution and world affairs; New horizons for the judiciary. Index.

"A particularly fresh and interesting portion of this book is that in which the point is made that in argument of counsel in court and in geographic or economic divisions of opinion, the attack on federalism is often masked. . . In addition to its fairness, temperateness, and breadth of understanding of the progress of the Constitution, Professor Swisher's book has the merit of being exceedingly readable." Charles Warren

+ Am Hist R 61:722 Jl '46 700w

"It is in the last chapter that the book's most original contribution is to be found. Here Mr. Swisher comes to grips with the development of 'private government' in the United States (and on the international scene), chiefly in the form of great corporations. . . It is no reflection on the scholarship or profundity of this book to state that its greatest usefulness will perhaps be to the general reader, and to students in classes in American government. No political scientist has yet produced an abler non-technical, yet critical, analysis of our constitutional system than is to be found in Professor Swisher's volume. It deserves, and undoubtedly will enjoy, a wide audience." R. K. Carr

"Professor Swisher's book justifies the claim made for it that it is a stimulating text for courses on the Constitution and good reading for the people in whose hands rests the future of federalism. The courses and the lay

reading should, though, be supplemented by more critical writings which are less ready to accept the present state of our governmental machinery as adequate for the hugely increased demands, especially in foreign affairs, which are now bearing on it." T. K. Finletter

"It is probable that there will be less agreement with basic propositions in the opening chapter of the volume than with particular theses developed in subsequent lectures. Some, for instance, will hesitate to accept the broad assertion that 'every state has a constitution' and that 'without a constitution there is no government and no state.' Neither logic nor history would seem to support this generalization. . . These comments, however, are carping. For readers who seek a timely and discriminating treatment of current constitutional issues set in their background of history, this volume is of great value." M. DeW. Howe

"Mr. Sylvester's story is simple and unpretentious. . . With a restraint rarely found in first novelists he has condensed his observations into something under 300 pages, has avoided using sex as a Roman candle. For all that it occasionally lampoons the Hollywood overlords, it's conceivable that this story may have its hour on the screen. "In this volume, author deals with the dynamics of adjustment; he aims to uncover the psychological needs for which the individual seeks satisfaction from his physical and social environment, and to explain human behavior in terms of the mechanisms which develop as frustration is met. Not that frustration is all bad; it is, indeed, necessary to growth and, if met effectively, contributes to the development of adequate personality. But too severe frustration, or frustration badly handled, is the causative factor of neurosis. Dr. Symonds' approach is frankly psychoanalytical." Christian Century

"Working within the picaresque fiction tradition—representing, perhaps, the best form for the so-called socially conscious fiction—Pen has written a novel which is most effective when it dramatizes the routine events of the peasant life in the country villages or of the hounded existence of the Budapest workers." Fredrick Brantley

N Y Times p28 N 17 '46 550w

"Mr. Pen is talented enough to make you feel, solidly and tangibly, the misery of the hero's home life, the vicious extravagance of the luxurious hotel in which he works and the perverseness of his love affair. The young man's acceptance of a revolutionary ideology that now seems rather dated is less convincing, and you may wonder what problem the author believes he has solved by having his hero move away from the scene of his humiliation and defeat. A somberly effective narrative, all the same."

+ New Yorker 22:124 N 2 '46 100w

"Mr. Pen may be honestly intent on showing the impact of the moves of a licentious upper crust on an under-privileged boy. But the manner in which he writes his sex scenes defeats their purpose through overstrong colors. Nor does he make credible his young hero's preservation of decency and integrity. Toward its end, moreover, the story becomes rather hectic, its incidents more violent. There is a bit too much of everything in it, although it is by no means dull reading." Robert Pick

"There can be no question, I think, of the power, drive and passion of this long novel of boyhood and youth at the lower depths. Decidedly it is not for the family circle in conventional homes. Mr. Pen wields a bludgeon—but with as much dexterity as that weapon permits. And for the tough minded and generous hearted it is relieved from sordidness. For it is not a document but a story packed with emotion—with all the emotions—even to overflowing. It is an angry book but not a bitter one; one flooded with pity flowing over into sentiment which the author is unable to conceal. It is, however, a novel without reticences." F. T. Marsh

Novel based on the time between the two wars in Italy. The author, who was a revolutionary before he became a writer, shows how the breakdown of the middle classes helped prepare the way for Fascism, and pictures some aspects of life under Mussolini.

"As in Taddai's first novel, 'The Pine Tree and the Mole,' his characters drift in and out. In this book there are fewer of them and they are perhaps less vivid. Nevertheless they and the episodes in which they appear recreate that special atmosphere of life under Fascism which has been too seldom stressed—that of life existing as if it were under glass where thoughts and plans were only whispered and every face was masked." Marie Seton

Book Week p7 Ja 5 '47 350w

"I do not think that as a writer Taddai has the stature of his fellow-countryman Ignazio Silone, but I believe that, in one episode of approximately a thousand words, he has caught the essential quality of Fascism—its human dirtiness—better than it has ever been got hold of before: One of his characters . . . is placed in charge of Rome's milk supply. Before long, he is taking baths in the vats of one of the city's milk stations with a young lady who works there. Mr. Taddai goes into none of the scabrous details, but I can't imagine a more terrible symbol of the whole Fascist corruption." Hamilton Basso

+ New Yorker 22:95 D 21 '46 200w

"While the incidents in this novel are convincing, carefully selected and handled with craftsmanship, some of the threads are left dangling. The author, in shifting from one character to another, has left undeveloped several of his more interesting ones, presenting them as mere vignettes, although they could easily have stood further expansion as part of his main theme. The book also suffers from a too sketchy delineation of its main characters. . . . But Mr. Taddai makes his point, and the job, as a whole, is interesting and readable." J. D. Ross

"As in her previous publications, Miss Taggard shows taste and artistic skill. There is light, if not heat, in her lyrics. While they are, perhaps inevitably, a part of the groping output of a bewildered period in history, they indicate nevertheless a mature personal adjustment and poise. "Professor Taylor's book is concerned with reference works and bibliographies published between 1500 and 1700. . . . The work is divided into two parts: an analytical section, and a list of all the bibliographical works mentioned in the introductory analysis. . . . Its usefulness is increased by the fact that Professor Taylor has indicated the libraries in which those volumes available in the United States are to be found. The main purpose of the analytical section is to discuss the various types of reference works and bibliographical guides available in the sixteenth and seventeenth centuries. The impression left by the essay is that the bibliographical apparatus possessed by sixteenth and seventeenth century scholars, though somewhat more difficult to use, was hardly less comprehensive than our own. In this sense, the study is a useful reminder concerning the advanced state of the scholarly techniques of the period." (Am Hist R) Indexes.

"Because Tchaikovsky continues to be one of the constantly performed composers of the nineteenth century, it was a happy idea to translate into English the diaries that constitute one of the principal sources of biographical information about him. The translation has been rendered faithfully, largely into equivalent colloquial English, as was desirable. A compact explanatory preface, helpful footnotes, and a well-compiled dictionary of the persons mentioned have been added for the assistance of readers and those using the diaries for research. A pointless introduction by Grigory Bernard and a few minor editorial slips—to be corrected in any later edition—are all that mar the book as presented. Unfortunately, however, the book as presented lacks what must be considered its prime desideratum: an index. "Any boy who picks up this present-day story and begins to read it is likely not to lay the book down until he has finished it. . . Johnny was thirteen when he went from a ranch in Wyoming to a little village in France just after the war ended, and his experiences as he tells them here are full of vitality and suspense. But the most ingenious feature of the book is the fascinating way in which Johnny learned to speak French. This is a wholly new idea in a story, worthy of special notice. The drawings are slight but expressive." A. M. Jordan

"This is a lively yarn about an American boy in France after the war. There is also a well-meant attempt to teach French words and sentences, in order to help along an understanding of a strange country; but the reader trips over French words in English sentences, and the story bogs down while French sentences are explained. Even more unfortunately, some of the French is not idiomatic, and some of it is actually incorrect. The illustrations by Richard Floethe have his consistent wit and good humor." Marjorie Fischer

THOBY-MARCELIN, PHILIPPE, and MARCELIN, PIERRE. Beast of the Haitian hills; tr. from the French *La bête du Musseau*, by Peter C. Rhodes. 210p \$2.50 Rinehart 46-8130

"This is the story of Morin Dutilleul, a well-to-do city grocer and a full-blooded man who after the tragic death of his wife fulfills an odd wish of his, and returns to live on the countryside. The happenings that follow 'Mist' Dutilleul's settling down at Musseau, a heretofore peaceful mountain community, form a fantastic voodoo tale—a story about the paganized Christianity of Haitian folk, . . . about werewolves, witchcraft midwifery, greedy sorcerers, about the 'Great Baron Samedi' and about the 'Cigouave,' the ferocious man-faced giant dog of the tropical hills." Sat R of Lit

"Among the weird things that come to pass in its pages are some at which the adult mind would rebel, were it not for the narrative skill and the poetic prose used in telling the story. . . "The novel itself is something like an anecdote or a tall tale—part fable, part Haitian Boccaccio. Despite some grim doings, despite the elaborate voodoo rituals, the pattern does not impede the naturalistic tempo. There is an invigorating freshness and a sinewy power in the style of these authors which defy popular notions about tropical characteristics. It is a proof of their genuine talent and the earnestness of their artistic pursuits, as well as of the ability of Peter C. + Sat R of Lit 29:12 N 23 '46 270w

"The story is one of simple tragedy, the powerlessness of human beings at the hands of evil spirits. Against a background of jungle life is cast a belief in the occult, the supernatural, malignant and inimical to the human race. How much of this the authors actually believe is hard to determine. They are cultured Haitians with poetical fluency and unique skill in depicting exotic emotions; yet there seems to be a residual acceptance of Voodooism, a resignation to the dark powers. Certainly the book gives no explanation of phenomena which are utterly unacceptable to a foreigner. . . It is a book that will seize the reader's imagination, a glimpse into ancient demonology, written with persuasion and

deep acquaintance with primeval minds. To read it is to understand the depths of a strange land and the spirit of a forlorn people." P. J. Searles

"The qualities of Thomas' poems, and much of their method, are carried over into his short stories, which already comprise a body of work representing a significant development in recent prose. They are notable for a continual fusion of fantasy and realism and, often, for their grim, dry humor reminiscent of the stories of Kafka, yet conceived always under Thomas' view of experience as traumatic, even when on the surface it is commonplace. John L. Sweeney's introduction is remarkable for its concision and range. Volumes can be written around the matters of information and interpretation which he selects as keystones to understanding." The American correspondent for the London Daily Express, who some years ago wrote I Lost My English Accent (Book Review Digest 1939) here sets forth his views on improving Anglo-American relations. "Although Mr. Thompson ends each of his twelve chapters with a sage bit of advice on how to get along with an Englishman, and although he maintains that England is his heart's home, he does seem to have a time keeping his mind off America. Indeed, his most acute comments are about the United States. With very few alterations his book can be published in England as 'How to Like an American.'" (N Y Times)

Book Week p7 D 22 '46 90w

"The latest essay by the United States correspondent of The London Daily Express is, like his first, somewhat on the elementary side. It often seems addressed to persons to whom England and English traits, in Mr. Emerson's phrase, are approximately as remote as the Hittites. But if there is little to startle or impress members of the English-Speaking Union, there is a good deal to please those to whom mention of Anglo-American relations appears as an excuse for a lively

argument. There is also Mr. Thompson's personality, which is sprightly, good-humored and altogether engaging." Herbert Lyons

THOREAU, HENRY DAVID. *Walden; or Life in the woods*; il. with 142 photographs, an introduction and interpretative comments by Edwin Way Teale. 386p \$5 Dodd

818

47-163

The text of Thoreau's well-known classic illustrated with photographs of Walden and its surroundings today. An introduction and interpretative comments by the editor tend to place Thoreau as the authority on natural history, rather than as a social critic, as has been the recent tendency.

"Provided with brief introductions to each chapter, illustrated with many related photographs and printed from large type, Mr. Teale's edition is an enthusiastic and lively contribution to the long shelf of editions of this great book. . . Mr. Teale's photographs are mostly conventional, and nearly all of them have been poorly reproduced. Excepting for a few hasty ice scenes they neglect the white masonic sorcery of winter which overlays many of the most glorious pages of 'Walden.' As illustrations they lack the distinction and the familiarity of the photographs recently published by Henry Bugbee Kane, who lives close by and can therefore keep a sharper watch on Walden and the seasons. Nor can any photographs capture the beauty not of Walden but of Thoreau's Walden. There is not enough sky, altitude and light in them." Brooks Atkinson
+ N Y Times p7 Ja 5 '47 1850w

"A person who is about to encounter the text of 'Walden' for the first time should buy a small, unadorned edition, such as the pocket Oxford, which will allow him to travel light and on a high plane. I rather imagine that Henry Thoreau would feel that Mr. Teale, roaming the Concord woods on his second-hand errand, was not fronting the essential facts, not living deliberately. Nevertheless, it is easy to understand why Mr. Teale was there, easy to share his vicarious excitement and to enjoy his tardy and beautiful photographs. . . A book of this sort is a personal tribute rather than an illustrative work. . . As long as there are men and muskrats, there will be readers who will ache to identify themselves with the spirit and the sense of this revolutionary book, this solid and everlasting book; and they will be drawn to Deep Cove in all weather and in all seasons, armed with whatever they can substitute for a borrowed axe. In the first place it is impossible to say how far it has achieved its author's purpose, for no outstanding purpose impresses itself in the reading, and the author's summing up at the end sounds more like an account of where he has got to than a statement of what he set out to reach. It is not even easy to describe the scope of the book. . . . Mr. Tillyard is most illuminating when he discriminates the qualities of the pre-Shakespearean chroniclers; he helps us to see an Elizabethan significance easy to miss in *A Mirror for Magistrates*. There may not be general agreement with his interpretation of many details of character, design, allusion, and imagery. He evinces a tendency to explain away defects as due to Shakespeare's general plan. But the general conclusion to be drawn from Tillyard's exposition is an important one, for it presents us with a Shakespeare more thoughtful, more intellectual, more philosophical than that which many people even today have inherited from the nineteenth century, a Shakespeare ranking not only as poet but as thinker with Dante and Milton." Such retreats (?) are to what extent appeasement towards recementing the Russians to the beneficent paternalism of government; to what extent recognition that to progress toward ultimate goal of international communism, course must be laid out with flexibility to allow for occasions of severe pressure from grouped individuals who are but rebounding against pressure from dictation of an [oligarchy]. TODRIN, BORIS. Paradise walk. 317p \$3 Dutton

Greenwich Village and the Williamsburg section of Brooklyn are the scenes of this novel portraying the struggles of two women of very different types to hold the same man. The time is 1937, and Nick Gordon is the man. His young wife Jerry, and an older and more sophisticated woman, are the two who battle to hold Nick's affection.

"Nick finally resolves his problem, but not before the star-crossed pair has gushed some of the most pretentious prose in many moons. Todrin, a poet by trade himself, leans toward metaphors and similes in profusion. Now and then, for instance, Martha's words should be just plain words, and not always 'shuffling leaves in the dry gully of her throat.' The author is also a great one for details. Sometimes they point up a scene very sharply. Sometimes, though, depending on the subject, they make his story sound like a subway guide, an architect's prospectus, or a Good Housekeeping recipe." Perhaps Mr. Todrin's difficulty is that he is a technician of the contrived phrase, which is never an aid to clarity. 780.81 Beethoven, Ludwig van 45-10300

For descriptive note see Annual for 1945.

"The book is not a biography, but rather a series of essays on Beethoven's material and the use he made of it. The author infused this discussion with the erudition, as well as the humor, which made his six volumes of 'Essays in Musical Analysis' [Book Review Digest, 1935, '37, '40] so readable. . . In the opening pages of 'Beethoven' the author undertook to make the master's technical style understandable to lay readers ignorant even of musical notation. The author died from wounds inflicted by an assassin before he could complete the manuscript. The book was ready for publication at the time of the attack on Pearl Harbor, but (by the decision of the publishers) its appearance was postponed until after the end of the war. It now is made available to the public at a moment when the man it attempts to appraise is at the height of his power and influence. As we learn from the editor, only the seven first chapters and the appendix (an article on the 'Three Concepts of the Russian Revolution') were written and revised by the author. B or 92 Dostoevskii, Fedor Mikhailovich

A biography of the Russian writer, which, tho it reads at times like a novel, is, according to the author, substantiated in every detail by documents.

"The style of this biography has integrity. It approaches the subject in a manner in keeping with the nature of Dostoevski himself, tor-

tured by guilt for sins he never committed, trapped in his psychopathic web of gambling and thrown behind 'the wall' of reality by his recurrent epileptic fits. The forceful woodcuts by Stefan Mrozevski enhance the reader's sense of Dostoevski's struggle and the strivings of Russia. They catch the spirit of the real and fantastic elements." Marie Seton

+ Book Week p21 N 24 '46 550w

"The very emotional, romantic treatment, and the narrative style, perhaps unduly, lends an air of unreality to the picturing of a real man's life. The facts of Dostoevsky's life are here, but the main emphasis is on his emotional development. The man seems almost to live in a vacuum. Anyone looking for a picture of Russian life along with the life story of the man will be disappointed."

Kirkus 14:452 S 1 '46 170w

"Author, young French novelist of great promise who won the Goncourt Prize and whose works *One Minus Two* and *Judith Madrier* were rather well received by American critics, wrote forceful story of Dostoevsky's life in 1940. This translation should have considerable appeal, since literature on Russian master is not plentiful in English." F. E. Hirsch

+ Library J 71:1541 N 1 '46 130w

"Henry Troyat has concentrated on his hero with the single-mindedness of the true biographer. He never even attempts to draw a picture of the nineteenth-century Russia, of its ambivalent attitude toward the West, of the literary tradition in which the young Dostoevsky was rooted. His hero therefore appears like a dazzling star moving against an almost empty sky. M. Troyat's book is never superficial or cheap. It could be called a brilliant but furiously partial biography." Richard Plant

San Francisco Chronicle p34 D 1 '46 80w

"The translation is adequate, though there are a number of errors, especially in connection with Russian names, and there are also infelicities of rendering. Part of the introductory material is left out; there are some deletions in the treatment of 'Poor Folk'; and the final section, 'Post Mortem,' which contains original conclusions of the author, fresh information concerning critical opinions on Dostoevsky's life and works after his death, and an account of the subsequent fate of his wife and children, is omitted entirely. And with that peculiar scorn which American publishers have for scholarly 'trifling,' the valuable bibliography of the author's sources at the end is lopped off as an excrescence of no consequence." E. J. Simmons

Sat R of Lit 29:15 N 16 '46 950w

"It is a grim, fantastically extreme life story, and Mr. Troyat brings to its telling all the warmth and understanding that it requires. Under his guidance the reader follows Dostoevsky's spiritual and physical agonies with classic pity and fear, as he would in watching a great drama unfold, for in the titanic figures of the Russian's battle he can recognize all the caged demons and submerged promptings of his own soul. Mr. Troyat's only major deficiency is his lack of a critical vocabulary for the handling of Dostoevsky's novels as works of art. . . Nevertheless the 'Firebrand' is clearly one of the notable biographies of the year. Its special value derives not from the newness of its facts but from its admirable synthesis of old material. It will take a very unusual biography of Dostoevsky indeed to surpass it in speed, vividness and emotional power." Stephen Stepanchey

Some leftover of the scientific monograph way of thinking, presumably, has caused the author to lead off with a dry, factual passage. This book starts off with a bang on page six. Begin there and read the earlier pages at the end of the first chapter. There is an excessive use of Spanish words where English words would not only do as well but do better. . . TURNBULL, ELEANOR LAURELLE, ed. & tr.
Contemporary Spanish poetry; selections from ten poets; with Spanish originals and personal reminiscences of the poets by Pedro Salinas. 401p \$3.50 Johns Hopkins press [23s 6d Oxford]

861.08 Spanish poetry—Collections. Spanish poetry—Translations into English. A45-3516
For descriptive note see Annual for 1945.

"Contemporary Spanish Poetry is an impressive addition to the slowly-growing list of books on the subject. If its contemporaneity is not quite up to the minute, the fault is probably less Miss Turnbull's than that of the chaotic state of the Spanish-speaking world of poetry in which she must move. And if her preferences tend slightly in the direction of what is most widely accepted, that is her personal taste, and it does not reduce the value of her book. As for Nueve o diez poetas, the personal reminiscences of the poets by Pedro Salinas, I find it far less satisfying than his poems. It is a bit too personal, too whimsical, perhaps even a bit too irresponsible to his English-speaking readers. His essay will be of interest only to initiates, not to the wider audience which I hope this book will find." Edwin Rolfe

+ Poetry 67:265 F '46 1450w

"It is a pity that Miss Turnbull's selection reflects scarcely a trace of the Spanish agony: a pity the more strange because these very poets were so much involved in it and wrote about it so movingly. Pedro Salinas's prefatory 'Personal Reminiscences of the Poets,' charming though it is, is equally reticent. But while I cannot account for this, and personally deplore it, the more useful fact remains that Miss Turnbull has given us a generous corpus of important poetry in the original language with translations more than adequate on the opposite pages." Dudley Fitts

+ Sat R of Lit 29:20 Mr 23 '46 550w

"Gratitude is due to Miss Turnbull for her faithful and perceptive translations. She has succeeded in interpreting the meaning and indicating the rhythm. The harsh sonority of Castilian has a dramatic quality that will not be rendered by our diphthongs and soft consonants, and where music and meaning are so interwoven as in Garcia Lorca, one of the best of modern European poets, the English leaves a weaker, more tenuous impression. Garcia Lorca is difficult to translate, but Miss Turnbull has made a courageous choice from his many sided genius. . . The anthology gains much from the biographical notices, and from Pedro Salinas's affectionate reminiscences of his friends."

Frequently, one would believe that the Duke was merely a creation of events—until a sentence now and then stresses his acknowledged perceptive and imaginative qualities. 370.1 Education—Philosophy. Education—History 45-3127

"Professor Ulich, who teaches the philosophy of education at Harvard University, presents his history chiefly through a series of concise

interpretations of leading thinkers from Plato to John Dewey. . . . Professor Ulich is especially sympathetic with educational thinkers who ground their positions in some conception of the spiritual wholeness of life. Thus although socially liberal himself, he is severely critical of Dewey for being 'radical' in over-stressing the importance of scientific method to the neglect of ultimate values. At the same time, he believes he has discovered a fundamental shift in Dewey's own thinking which, in recent years, has led to a recognition of the need for such values. Although it is debatable whether the author is sound in this particular interpretation, there can be no doubt that he is thoroughly conversant with the thought of the educational theorists to whom he gives attention. Some of his discussions are perhaps too brief, but his treatments of Aristotle, Luther, Bacon, Descartes, Comenius, Locke, Rousseau, Pestalozzi, Froebel, and others are enlightening and to the point." "Anticipating some action by the UN on the control of atomic energy in war and peace, the Secretary of State on Jan. 7, 1946, appointed a five-member committee to study safeguards and controls. UPDEGRAFF, CLARENCE MILTON, and MC-COY, WHITLEY PETERSON. Arbitration of labor disputes. 291p \$3.75 Commerce clearing house

331.155 Arbitration, Industrial 46-4335

"In their Introduction, the authors state that 'with some misgivings' they have attempted to accomplish two objectives: (1) an exposition of the law of arbitration, as applied particularly to labor disputes, to serve as a useful reference work for lawyers, and (2) a practical and not-too-technical guide for the layman who may be called upon to conduct an arbitration without benefit of legal counsel. They have attempted to minimize the unfortunate effects of their decision to address two audiences at the same time by identifying clearly the parts of the book they think will be of most interest to each." (Am Pol Sci R) Index.

"The authors lay down several criteria of personal judgment and standards of conduct whose general authenticity would undoubtedly be confirmed by an analysis of the practice of top labor arbitrators throughout the country. Users of this book will find it more valuable, however, as an exposition of the law of arbitration applied to labor disputes than as a description of labor arbitration as it exists in practice. The reason for this lies in (1) the authors' professional and social conception of arbitration, and (2) the traditional attitudes of the courts, and definitely not in any lack of scholarship or practical experience." "The story of Hitler's Reich and of World War Two come somewhat as an anticlimax. In writing on recent events, the author obviously could not rely on the same abundance of documents and inside information which he used for the earlier part of his book. It is also regrettable that Mr. Valentin has deemed it necessary to write a complete history of Germany from the days of Charles the Great to our time. . . . Another shortcoming of the book is probably a consequence of the author's striving for 'completeness.' His judgments on German cultural achievements, especially in the fine arts, are superficial, conventional, and adapted to the taste of the former German middle class. Few art critics will agree with them." E. K.

Instead of a history of the German people, it is a catalogue of their rulers and leaders, kings, clerics, generals and prophets parading by as in a tapestry. However, it may be stated here that his present book is a monument of fairness. There is only one instance in which this reviewer feels bound to take exception. He does not share at all Valentin's rather unfriendly opinion of the great liberal leader Friedrich Naumann, whom he tries to tie somehow to Adolf Hitler. . . . Exile has been for Valentin the historian a blessing in disguise. It gave him a wider view and a ripper wisdom than any of his fine earlier writings showed. To his own personality certainly applies what he says about some of his learned fellow refugees: 'They were forced to re-examine and re-evaluate all their intellectual possessions. VANCE, RUPERT BAYLESS, and DANILEVSKY, NADIA. All these people: the nation's human resources in the South. 503p maps \$5 Univ. of N.C. press

312 South—Population. South—Social conditions 46-3393

"[A] careful analysis of the nation's human resources in the South. Replete with figures and tables, it is divided into five major sections, dealing successively with 'The Dynamics of Population,' 'Population and Agrarian Economy,' 'Population and the Industrial Program,' 'Cultural Adequacy of the People,' and 'Social Policy and Regional-National Planning.' The great mass of data regarding fertility in terms of population composition, specific birth rates, family size and replacements, and the trend of migration since 1850 constitutes the chief discussions of the first part of the book, and has a distinct bearing on the problem as a national issue. There follow considerations on the use of the land, the crop system, on the contrasting use of machines and mules, and on tenancy, that lead to a discussion of the changing structure of race and class on the land. An analysis of population in relation to the industrial economy includes an examination of the regional distribution of income, in-

dustry, and employment with a view to ascertaining what would be involved in a fuller use of material and human resources for the regions and the nation. In succeeding chapters the effects of industrialization are examined in case studies of rural areas in the southern Piedmont. Cultural adequacy is examined in terms of the health and vitality of the people, their education, and leadership in the nation. Finally, the book demonstrates how regional planning for the South will loom large in the overall picture of a national economic and political policy." (Scientific Bk Club R) Index.

"One of the most important books ever written on an American region. . . Vance deals with the people in the Southeast from the beginning. Through statistics and keen analysis he presents trends, describes conditions as they were in the late nineteen-thirties and the early nineteen-forties, and has a keen eye out for what the future of the region and the country at large holds for 'all these people.' . . The voluminous statistics-trends-prospects presentation are made all the more convincing by case studies. . . If there is a weak point in the book, it is its failure to deal adequately with the many and basic qualitative ways in which the bi-racial situation is related to the distinctive economic, social, religious, and political character of the Southeast. This is, of course, a subject all its own, but it reaches into the heart of the materials with which Vance has otherwise dealt so masterfully."

The patriotism of the compilation is sound and inspiring. One picks up the book and fingers through it with happy anticipations, feeling as though he had received a letter full of fine new family pictures. Unfortunately, the book has defects—in the eyes of this reviewer, at least. First, the title is misleading. To be sure, 'scriptures' could mean 'anything written,' although current American dictionaries call that meaning archaic. Most Americans consider that 'Scriptures' means the Bible. Therefore, 'American Scriptures' will impress some readers or prospective readers as suggesting that the compilers are pretending to present an American Bible." R. H. M.

There are, both warmth and poignancy in 'Afterward,' 'Bailey's Hands' is in the best Robert Frost tradition. But one closes the volume wishing there were more

"This critical analysis of Dryden's poetry, long out of print, is now reissued with a new preface by Mr. Van Doren. . . The appearance of the book is coincident with a renewal of interest in Dryden, evident among the cerebral poets who have been rallying around the figure of Gerard Manley Hopkins, himself an admirer and disciple of the great Restoration poet. The book is lengthy, with plenty of room in which to explore the genius of the man who was accepted by his contemporaries as one of the greatest English poets but who, a century later, had become little more than a literary mummy." 914.92 Gorinchen, Netherlands. World war, 1939-1945—Netherlands 46-25111

Recollections of life in Gorcum, the town in Holland from which the author came. It was a town dating back before the Spanish invasion, and its citizens were Catholics, Jews, and Dutch Reformed protestants. The lives and personalities of his schoolmates are described by Van Paassen; then he pictures what happened to them and their town when the Nazis came.

"There is magic in Pierre van Paassen's pen—the kind of magic one does not expect from the usual run of today's writing. Beauty and suppleness of prose are wedded, in these pages, to rare gifts of observation of human character, a powerful and highly sensitive imagination, humor, and such devotion to human kindness and intellectual integrity as one seldom encounters amid the scurry and rush of post-war publications." "'Earth Could Be Fair' is an account of life in the little Netherlands town of Gorcum. This is no mere vignette set down for its potential biographical and human interest to a wide-reading public and for those who have followed Pierre van Paassen's work in the past. Every character, every incident has been carefully selected as contributing to a grand finale—a storm that will engulf the souls and bodies of good men and women. That is why this book is so stirring. It is the story of something that is done to a people, a whole people—a something that is not exclusively material in terms of loss of wealth and physical happiness, but goes down deep into their very in-being and affects their very ethos. VAN TIL, CORNELIUS. The new modernism: an appraisal of the theology of Barth and Brunner. 384p \$3.75 Presbyterian & Reformed pub.

230 Theology. Modernism. Barth, Karl. Brunner, Heinrich Emil 46-3318

"An attempt to prove that the common view with respect to the theology of Barth and Brunner is mistaken, that instead of being antimodernistic it is in fact fundamentally modernistic and may properly be designated 'The New Modernism.' . . . The book before us divides itself into two main parts. The first deals with the philosophical background of both Barth and Brunner, and the second with their theological views and their personal relation to each other during the past twenty-five years. . . . The second and main part gives a critical account of the 'Crisis' theology since it first took on a distinctive character in Barth's commentary on Romans, published in 1919." (Crozer Q) Index.

"If Dr. Van Til were as critical with respect to his own presuppositions as he seeks to be with Barth and Brunner, his book would have a good deal more of scholarly interest. As it is, he simply assumes that orthodoxy is defined for the Christian church by Calvin's Institute. Most Presbyterians have discovered that there are other classics in our Christian literature, but not Dr. Van Til. As a consequence, the book breathes with the dead spirit of Protestant scholasticism. There is nothing in it of the life of the ecumenical church. That there are points of suggestive and even searching criticism, particularly of Barth, seems clear, but it is regrettable that they could not have had a setting that would invite more sympathetic and critical attention." VAZAKAS, BYRON. Transfigured night; poems. 77p \$2 Macmillan

46-6401

First book of poems by a young American poet. "In his enthusiastic introduction to this book of poems, William Carlos Williams describes the author as 'that important phenomenon among writers, an inventor,' and announces that Mr. Vazakas has 'picked up the thread where Whitman dropped it,' discovering 'a measure based not upon convention, but upon music.'" (N Y Times)

"Although 'Transfigured Night' is Byron Vazakas' first book of poems, it is an exciting fulfillment as well as a promise. In his illuminating introduction, William Carlos Williams says Vazakas is an inventor of a 'line loose as Whitman's, but measured as his was not.' In all but a few of his poems, he is a good deal more than that. Vazakas is a better and more illuminating poet than T. S. Eliot, Miss Sakville-West or Miss McGinley, though I am afraid there will be fewer who will rush to buy him." H. C. Webster

"A slim volume of modern poetry of definite distinction. . . All interested in modern poetry will do well to give this book their attention."

+ Kirkus 14:378 Ag 1 '46 130w

"What distinguishes his work is his ability to convey the more delicate nuances of a mood, to suggest the sensitively apprehended atmosphere of a doctor's waiting-room, a photographer's studio, a railway terminal. . . Perhaps the lack of a unifying belief that characterizes our time, the sense of our diversion, together with a lively awareness of the need for some common basis of communication and action while retaining our integrity, make distinctions between the public and the private matter of peculiar significance for us. Mr. Vazakas' emphasis upon this double aspect of everyday life, and his hints, never obvious or insistent, at the absurd and tragic quality of that life, are what give his poems value for us. As a result they sometimes read like excerpts from a psychological novel or like notations on the insights of Kafka and Kierkegaard. Their memorableness would be increased if they exhibited as close a relationship to music as Dr. Williams seems to find in them." Babette Deutsch

N Y Times p30 N 24 '46 320w

"Vazakas' cadenced prose—if we may call it that in default of a better term—is for the most part extremely perceptive and, *mutatis mutandis*, as rich in poetic overtones as Eliot's or St.-J. Perse's. Both his imagination and his craftsmanship are remarkable. He is a master of definition. . . He knows how to sustain a mood and stick to his frame—usually one of scenery, either actual or allegorical. Why, then, do so many of his poems refuse to 'jell,' to form integral imaginative units? . . . I want to register, incidentally, my regret at the omission of several previously published poems from this book. Being a prolific writer, Vazakas has been wise to select, but a selection that leaves out pieces like *The Equal Tribunals*, *The Christmas Tree* and *The Immobile Street* strikes me as highly capricious."

"Von Abele tells the story of Stephens's life and examines its significance in a highly readable volume—and one which is remarkably mature for a biographer in his twenty-third year. "The author has so pruned the story of Stephens' political career, on the doubtlessly correct grounds that the subject is not important enough to support a longer book, that he will not satisfy the historical fraternity nor sufficiently inform the novice. Moreover, most of Stephens' associates and rivals, and even Linton, seem vague figures, not tied firmly to the story, or so it seems to this reviewer. However, Von Abele did not undertake a definitive life. . . Von Abele's remarks on the matrix of his subject are insufficient to fulfill this promise, unless we are to draw for ourselves the conclusion that the South was emotional, intellectual, neurotic, arrogant, kind, legalistic, power-seeking, proud, and sick. Perhaps it is as well Von Abele did not make a wholehearted attempt; many a man has come to literary grief trying to say what was, or is, the South. What the book does do is give a psychological interpretation of a strange man in admirably restrained and moderate conclusions." W. B. Hamilton

"A report to the nation on a subject of nationwide importance, which continues the public's enlightenment on the socially taboo social diseases. Here in a second book by chiefs of the Venereal Control Division of the Public Health Service, is a discussion of the

diseases, and the projection of the wartime effort into a peacetime program. Here is the history of the first efforts, political and medical, to curb the diseases; the diseases themselves, their cause, effect and treatment, from the old cures to the newer sulfa drugs and penicillin. Prostitution, the big obstacle, and allied aspects—promiscuity and delinquency. Finally, the control measures used today, the serologic dragnet, which must be extended, the contact tracers and case-finding program; the need for wider measures, and quicker measures in detection, in cure, with the hope that research will develop some means of providing immunity." "It is regrettable that the official history of a scholarly society should be deficient in such essentials of good writing as firmly organized paragraphs and careful documentation. Of course, the source of most quotations from chapter records and archives is clear enough without footnotes, but there are numerous references to inadequately identified writings. Still, we must be grateful for the author's singleminded devotion and industry, in the face of recurrent disappointments and for long periods without sufficient secretarial assistance. No one but Dr. Voorhees could or would have written this book; no one else would have had the persistence to make a comprehensive collection of these often misplaced or neglected materials. "Writing a detailed history of the evolution of programs and men, Mr. Wachman traces the development of what was, at least for a time, the most successful local Socialist party in America—a group which in 1910 had gained legislative and administrative control of the city of Milwaukee and of Milwaukee county. The story starts on Friday night, July 9, 1897, at a meeting in Ethical Hall addressed by Eugene Victor Debs, and at which Victor L. Historians may well feel that he has not—at least in discussing Canadian development up to 1867—brought out much that is new. Perhaps so. That was hardly to be expected. Nevertheless, his emphasis is often neither conventional nor traditional. His indication, for instance, of the long-time effects of the projection of seventeenth-century French religious quarrels and cultural attitudes into the Canadian scene will come as a distinct novelty to most readers. Vic Norman, resigning from an overseas assignment in the OWI, returns to radio advertising as an account executive for a mammoth soap concern. On the train bound for California he meets Kay Dorrance and her two children and thru them finds the meaning of true love as contrasted with temporary infatuation. The book is intended as a satire on the radio-advertising business.

"The clever Variety patter will carry most readers halfway through this story before certain questions become insistent. Those children Vic meets on the train. Cute talk and all, they are dreadful little caricatures. And Kay Dorrance, their mother, in whom Vic awakes the sleeping tigress. Tigress, my foot! Mr. Wakeman writes a biting line when he feels satirical, but when he is in earnest he gets soft. The love story is undevious and much too thin for any climax. Vic's final showdown with Mr. Evans is disappointing. What we come away with is a contempt for salesmanship that can be as noisome, as double-dealing, and as successful as that in which our hero took part. Even he was disgusted." Edward Weeks

The same qualities are exhibited in The Hucksters, but once again the total effect of his novel is dissipated by the author's wallowing (the word is used advisedly) in what has passed since A Farewell to Arms for 'romantic love.' . . . Mr. Wakeman is just a copywriter at heart, which is a shame, for when he isn't selling something without price-tags like love or honor, or time, he's an accurate reporter of the way too many of us live now. B or 92 Elizabeth, queen of England. Leicester, Robert Dudley, earl of 46-9900

For descriptive note see Annual for 1945.

"Mr. Waldman is interesting and clever, he writes in a style that is pleasingly informal, and he strikes off an occasional bon mot that is most apt. But his history is of a very popular kind. . . Mr. Waldman works from sources and from the best secondary materials. But his grasp of the period is superficial. . . Finally, [he] has a trick always irritating to historians: he throws about his theme an atmosphere of mystery which, one would suppose, was his duty to clarify and not to deepen." D. H. Willson

"The value of Waldman's 'Elizabeth and Leicester' is of increased understanding—real understanding, because the interpretation of character and motive and event is never forced or arbitrary. All that is done is to select and present the significant facts and the possible conclusions about the relationship, over a period of thirty years, of Robert Dudley and Elizabeth Tudor. Since that relationship, with all its obscurities and complexities, was one of the major facts in English history from the accession of Elizabeth to the defeat of the Armada, you will find, after considering the evidence and Mr. Waldman's carefully identified and modestly presented conclusions that you understand better not only a number of events which the book touches but lightly, but even some which it does not mention at all. And since the bits of evidence about that strange personal relationship are put before you so sharply and tellingly, and in so clear and coherent a pattern, and then the conclusions are so cautiously drawn, you will find yourself believing that you understand the characters involved, and the bond between them, even better than Mr. Waldman himself does, and asking almost impatiently why he is not more positive about what seems so nearly certain. That is not mere artfulness. That is the art of the historian." Garrett Mattingly

The report now published, compiled from a diary kept on the trip, is a frank discussion of what Mr. Wallace saw of Soviet agriculture and commerce and of the geography and development of the little-known lands of the Yakuts, the Kazakhs, the Buryat-Mongols, and the Uzbeks." "Almost every schoolboy is aware of the fact that Japan was opened to Western intercourse by Matthew C. Perry in 1854. Not so well known, however, is the technique by which the Commodore concocted his potpourri of diplomacy, doggedness and duplicity. The presentation of that material in succinct form is the task to which Mr. Walworth addresses himself. Not only does he succeed, but he does it in a fashion that combines the best canons of scholarship and story-telling. . . Mr. Walworth has drawn on all of the available sources and, while it is clear that he is interested in relating an epic adventure tale and not in a display of erudition, it is unfortunate that he has chosen to limit the footnotes to those indicating the sources of direct quotations only. 181.1 Philosophy, Chinese. Confucius

46-4685

"In an attempt to interpret China to the Occident, the author, a member of the Chinese consular service in the U.S., has written an explanation of the thinking and philosophy of the Chinese from the time of Confucius to the present day. Hoping that a more complete understanding of the Chinese mind will tend toward more harmonious relations between China and the Western world, the author has written this book in popular style." (Book-list) No index.

"The author has performed a truly valuable service for those who know little about Chinese philosophy. . . . The only weakness in the book is the appraisal of contemporary China in the last chapter, an appraisal in which, strange as it seems, Dr. Wang can talk of the Generalissimo, the Kuomintang and Chinese unity without mentioning the Chinese Communists. . . . But the author should be forgiven readily for this single lapse from grace. His other chapters completely overshadow his one compromise with a philosophical-political force over which he has no control and to which he is too close to evaluate properly." J. O. Supple

"[Wang Gung-Hsing] has taken as his theme the main ideas that have influenced Chinese thought from 500 years before Christ up to the present. These ideas he has discussed in very readable language within the space of less than two hundred pages. His writing runs a blue pencil through many past descriptions of the Chinese as far-off creatures with weird ideas and portrays them instead as humans like ourselves with very human thoughts. The reader must remember, however, that the book is in English and therefore many ideas held by Chinese through the ages may be incorrectly expressed in our tongue."

Canadian Forum 26:186 N '46 420w

"One who has read these two hundred pages attentively and made notes on them with due diligence may feel, at least for a little while, that he has a satisfactory and sufficient understanding of the development of Chinese philosophy through its more than two thousand years. That pleasant feeling is probably an illusion. There must be more to the subject than here meets the eye. Yet this book seems to simplify without oversimplifying. The way is left open for all the further study one may want to do, though no suggestions for additional reading are offered. But the book itself has a beautiful clarity in its interpretation of the thought of the Chinese sages—not to mention the charm of an English style which is, with rare exceptions, so excellent that it deserves to be mentioned." World war, 1939-1945—Psychological aspects

46-25011

"A thoughtful answer to the question: What should the peace treaty say about outlawing psychological war? The author, deputy director of propaganda policy in the O.W.I. until 1944, speaks with authority. He summarizes the recent history of nerve warfare, emphasizing our own errors, and then offers the text of an international agreement to define and outlaw such conflict and to promote the free flow of information. He recommends a United States Department of Information, its head to be a member of the President's cabinet, to help our news services and radio tell the world what we're doing." New Yorker

"Although Unwritten Treaty contains the texts of the various administrative orders dealing with the OWI and other information agencies established during the war, the book can in no way be considered a final study of their work. It is rather an urgent argument for freer, fuller news and the control of psychological warfare. On this basis, the faults of brief analysis may be overlooked, especially since Mr. Warburg presents the book as an opening statement about a problem which he hopes will be thoroughly debated." G. S. Mr. Warren's study of a political leader is intended to investigate the moral relativism inherent in the historical process. One might describe it as a fictional demonstration of Hegel's philosophy of history. . . If the low quality of Burden's moral awareness is responsible for most of the ethical and political confusion of 'All the King's Men,' so must it in some measure account, I think, for the failure of Mr. Warren's novel to achieve the artistic stature commensurate with the author's writing gifts. . . Mr. Waterman has traced the development of the characteristic architecture of Virginia from its original British models up through the late-Georgian period. He has found out a good deal that is new about the authorship of the various mansions and has been able to classify them in groups in a way that has not previously been attempted, and he writes about them with a special sensitivity to the poetry of architecture. The book is illustrated with more than three hundred and fifty fine photographs of interiors and exteriors, as well as with ground plans, old prints, and drawings. A work of first-rate importance."

WAUGH, EVELYN. Brideshead revisited; sacred and profane memories of Charles Ryder. 351p \$2.50 Little [10s 6d Chapman]

[45-7846]

A story of England between the first and second World wars. It is concerned with a titled Roman Catholic family of wealth. The elder son is sternly religious; the younger, a man of great personal charm but a dipsomaniac. The daughter marries a Canadian who has been divorced, altho all her family are opposed. The narrator is Charles Ryder, who at one time had been the lover of Lady Julia.

"No American could conceivably have written a story like this. It is English to the core, English in its lament, English in its sensuous, evocative beauty, as in the recapture of the innocent days at Brideshead, English in the bitter, fairy laughter of Anthony Blanch, English in the hard tenacity with which Charles the artist, 'homeless, childless, middle-aged, loveless,' as he describes himself, finally faces up." Edward Weeks

Atlantic 177:151 Ja '46 700w

"What does all this add up to? I'm afraid not much. The problem presented is very simple indeed. Sebastian's drinking, Julia's sense of guilt, the father's last-minute coming to grace, the outer observance of ritual, the troubles of the idle rich—there is nothing new or startling here. . . 'Brideshead Revisited' is, in fact, a high-class British Lost Weekend, only it takes much longer than that and isn't so well written." A. C. Spector

"Make no mistake! The book is a work of art. No page, no paragraph should be passed by. Some have found it to be a sort of subtle apologia for 'the good life' and even for Catholicism; but, if it is so intended, the author has drawn his lines so fine and shaded his colors so delicately that his purpose will remain hidden from all but keen eyes. In any event, he will meet with some harsh criticisms among devout Catholics, loyal Oxonians, cultured members of the leisure class. . . Persons who know Catholicism and Oxford and England may take Brideshead Revisited in their stride, undisturbed by its mockery of superstition masquerading as religion, its bitter scorn of pompous inefficiency, its lampooning of wealth and privilege. Others, however, may easily absorb poison from these pages—religious Know-nothings, for example, and foes of higher education and class-conscious revolutionists. That is about as near as we can come to a judgment. Not even the author himself can predict how many will be edified and how many will be hurt by this story of his, which few persons would be able, and hardly anyone but himself would have dared, to write." "Easily Mr. Waugh's best book yet, some people may hardly recognize it as his. Sloughed as though they had been husks protecting the ripening kernel are the levity, the caricature, the humor, for which 'Decline and Fall,' 'Vile Bodies,' 'A Handful of Dust,' 'Scoop' and 'Put Out More Flags' are joyfully remembered. There is only one really humorous episode in this whole long story. . . But more than compensating the vanished malice is the fact that Mr. Waugh has graduated from flat, two-dimensional characters. "Contradictory as it may sound this may well be the most popular book Waugh has written and at the same time the most serious. There is none of the intense if sterile brilliance of his earlier books—their world of sybaritic pleasures and empty lives. "The disproportion between Mr. Waugh's affectation of non-belief and his protestation of belief, is the chief interest of *'Brideshead Revisited'*. Although Mr. Waugh has and uses all the old sophisticated arguments against his church, he has nothing except the sudden will-to-faith and the inevitability of death . . . to offer in its support. . . By masquerading or burying its religious convictions in cynicism, *'Brideshead Revisited'* makes, indeed, so much better a case against conviction than for it that even to grant that its author's attitude is only a device requires the help of the biographical record, the knowledge that Mr. Waugh was himself converted to Catholicism some years ago. Not that this form of religious dissembling is without precedent: Aldous Huxley, for one, is a practiced hand at it. "A novel flagrantly defective at times in artistic sensibility, yet deeply moving in its theme and its design. It is as well to describe Mr. Waugh's faults at once; they recur constantly, both while one is reading him and while one is remembering him. They radiate almost wholly from an overpowering snobbishness. . . Vulgarly goes very deep with Mr. Waugh; and it is not surprising that in embarking on his most serious novel he should show an addiction to the purple. . . "*'Brideshead Revisited'* has the depth and weight that are found in a writer working in his prime, in the full powers of an eager, good mind and a skilled hand, retaining the best of what he has already learned. It tells an absorbing story in imaginative terms. By indirection it summarizes and comments upon a time and a society. It has an almost romantic sense of wonder, together with the provocative, personal point of view of a writer who sees life realistically. It is, in short, a large, inclusive novel with which the 1946 season begins, a novel more fully realized than any of the year now ending, whatever their other virtues." J. K. Hutchens

+ N Y Times p1 D 30 '45 2200w

"The novel is a Catholic tract. The Marchmain family, in their various fashions, all yield, ultimately, to the promptings of their faith and give witness to its enduring virtue. . . Now, this reviewer may perhaps be insensible to some value the book will have for other readers, since he is unsympathetic by conviction with the point of view of the Catholic convert, but he finds it impossible to feel that the author has conveyed in all this any genuine religious experience. . . The comic parts of *'Brideshead Revisited'* are as funny as anything that the author has done, and the Catholic characters are sometimes good, when they are being observed as social types and get the same kind of relentless treatment as the characters in his satirical books. I do not mean to suggest, however, that Mr. Waugh should revert to his earlier vein. He has been steadily broadening his art, and when he next tries to be completely serious, he may have learned how to avoid bathos." Edmund Wilson

+ New Yorker 21:71 Ja 5 '46 1800w

"Despite structural flaws *'Brideshead Revisited'* has a magic that is rare in current

literature. It is a world in itself, and the reader lives in it and is loth to leave it when the last page is turned. The magic has nothing to do with pretty illusions about nature. It is the magic of knowing real people for the space of a few hours and, because of having known them, feeling one's knowledge of people deepened and intensified. There is no plot in *'Brideshead Revisited'*, nor is one needed. . . *'Brideshead Revisited'* is first and last an enchanting story which will impart wisdom and understanding to any reader. It is richly filled with the stuff of life. But it is something more. It is a portent of the probable emergence of what has been a brilliantly talented man into a major novelist. For that, as well as for this novel, we should give thanks." E. C. Chilton

"*'Brideshead Revisited'* is a story of the voice of man's conscience, and such a theme could only be expounded by a master of character creation. Anything improbable, anything unreasonable, would have been disastrous. It is the measure of Evelyn Waugh's success that every move in the untwisting of this tangle appears not merely probable but pre-ordained. As in all good novels the slender plot is created by the characters, and so careful is their development that it is long past the middle of the book before the reader can have any honest apprehension of the end. Mr. Waugh's humour is of several kinds—the ribald, the oblique and sophisticated, the intellectually astringent—and each is paraded with a careless and flowing ease. But nowhere in the book does the humour stand alone, nowhere does it suggest any sort of detachment or disinterestedness of mind. The book, indeed, is not meant to be funny, as Mr. Waugh puts it, because its comedy is always engulfed in the last resort in the author's asseveration of Catholic doctrine, in his sentiment of the aristocratic or oligarchic English past, in his feeling for whatever may be thought to be a corrective for the idea of progress. Mr. Waugh, that is, for all his apparent high spirits, is here very much the Catholic apologist and romantically conservative preacher."

The story never lags; the plot never veers; the writing is superb. . . It cannot fail to appreciate him, though it may be perplexed in both its Protestant and Catholic divisions by the religious material involved in this book and the manner in which it is presented. In this respect it is well to remember that Mr. Waugh is himself a Catholic, a convert, and that he is also an artist, not a propagandist. While setting down primarily the problems of a certain generation, he has also, for reasons of drama and symbolism, pictured a particular situation which is common in modern Catholicism, which is recognized by Catholics both lay and cleric." We see many of its qualities much of the time in his other books, but there is sometimes in these others the incredible lapse: the cheap effect of the set piece, the scene wheeled in and wheeled out (like the cocktail party aboard ship in 'Brideshead'). A volume of sermons first delivered to the congregation of the City Temple in London during wartime. "The topics range from the title sermon, 'The Significance of Silence,' to such other interests as 'Youth Looks at Christ,' 'Thou Shalt Love Thine Enemy' (including the Germans whom the English were fighting at the time), 'Thou Shalt Read the Bible,' 'The Mystery of Existence,' and an outstanding sermon to people frustrated and discouraged by the war—'Is It Really Good To Be Alive?'" (Christian Century)

"The informal style of the sermons is deceiving. They are printed in the conversational way in which they were delivered, an easy, sharing, non-oratorical style, thoroughly contemporary and straight from the shoulder. Nevertheless this informal style brings to vital expression the great truths of theology and life and the sound thinking of the preacher, profound ideas stated simply and related to those life situations in which the people of London lived. Reading this book is therefore an easy and a satisfying experience. One has the impression that Dr. Weatherhead is relaxing

"In 'Negro Labor,' Mr. Weaver provides some worth-while information to the publicist and the persuader. His is not an aggressive book, nor even a partisan book. It is a dispassionate study of the development, fluctuations and problems of Negro labor in our national economy. It is a theme for which Mr. Weaver is well qualified. . . . It is not with Mr. Weaver's facts, but with his conclusions, that the reader is most likely to disagree. The author seems to feel that racial prejudice is almost wholly economic. . . . Aside from his theorizing, Mr. Weaver has done a fine job of appraisal, and has given us a book that repays reading. 823 Hardy, Thomas. Great Britain—Relations (general) with the U.S. U.S.—Relations (general) with Great Britain 46-6620

"Thomas Hardy was a shrewd and eminently fair business man. All his life he was in communication with his American representatives regarding contracts, printing, promotion work, sales, serialization, reviews, royalties and other non-Parnassian aspects of literature. After what must have been exhaustive research, Mr. Weber writes about these activities efficiently and unpretentiously." N Y Times

"It is in a sense a pity that Mr. Weber did not confine himself to factual discussion of Hardy, for the controversial remarks into which he most unexpectedly launches about

two-thirds of the way through his book seem less well grounded. . . . One can sympathize with Mr. Weber's high ideals without being able to agree with his stormy and somewhat confused arguments. It will not do to reduce the author of 'The Dynasts' to the tidy dimensions preferred by Mr. Weber. "Trained as a jurist and economist, Max Weber was a German social scientist whose intellectual range was unusually wide. He was a most productive and scholarly writer in the fields of economic and legal history, political economy, sociology, and comparative religion. . . . The selections presented here are taken mainly from Weber's *Sociology of Religion*, *Economy and Society*, and *Collected Political Essays*. Among the topics included, the following are of particular interest: Politics as a Vocation, Bureaucracy, The Sociology of Charismatic Authority, and The Protestant Sects and the Spirit of Capitalism. . . . In addition to chapter notes, the editors of this volume provide also a seventy-page biographical introduction, and a thorough analysis of Weber's intellectual and political orientations, which were deeply rooted in the critical situation of German liberalism at the turn of the century." This lateral spread has hitherto slowed forward action. 280 Church unity 45-9082

"Dr. Wedel, canon of the Washington (Episcopal) Cathedral, delivered the substance of this book as lectures at the Philadelphia (Episcopal) Divinity School. He is thoroughly in sympathy with the ecumenical movement and recognizes the spiritual validity of non-episcopal ministries without even calling them 'irregular.' With the exception of that last point, which is perhaps merely verbal, his attitude seems virtually identical with that of the late Archbishop Temple. Both stand for union, but neither contemplates the liquidation of the Episcopal Church, any more than Mr. Churchill did the liquidation of the British empire. Dr. Wedel argues uncompromisingly for the historical episcopate, but holds that it must be detached from the Roman dogma of a vicarial Apostolic Succession and priesthood." 296 Jews—Persecution. Learning and scholarship—Germany 46-5155

"Presents in an objective and intelligent way a picture of the part which German scholarship played in the National Socialist persecution of the Jews. Anti-Semitism, an official German authority stressed, was of immense importance 'as explosive ammunition for the fifth column of the twentieth century. Because opposition against the Jews, it so happens, is the secret cue by which all those who have understood the signs of the time recognize each other.' But the scope and importance of the book are much broader than the title suggests. It gives from primary sources a well-authenticated picture of how scholarship works in a totalitarian society." (N Y Times) Index.

"Considering its purpose, its subject, and the fact that the author is a Jew, the book is objective and refrains from mere accusation and vituperation. The general conclusions are not new. . . The book does present much unpublished evidence of the campaign against the Jews, quotes liberally in the German and in translation from Nazi leaders and from lectures and books by professors hitherto not available here, and gives numerous facsimiles of orders and official documents which would be prima facie evidence before a court of law or international tribunal. All these refer to the intellectuals and professors. The section of the book least known and therefore most useful to scholars is that describing the character and work of the varied and numerous institutes." R. G. Usher

Am Hist R 52:120 O '46 700w

"The first thing that requires to be said about this book is that every intellectual worker should be required to read it. In a sense, it is the most shocking book ever written. No black book of crimes committed by one people against another approaches Dr. Weinreich's account of the part played by Nazi 'scholars' in the planned murder of millions of human beings. . . In setting out facts, Dr Weinreich has performed a difficult task with consummate distinction. After reading it, one feels like hanging one's head in shame for the human species, so prematurely defined as *Homo sapiens*." M. F. Ashley-Montagu

"There are rather few musical judgments in the book. This, however, is rather a virtue than a defect since the judgments of critics and musicologists on the excellence of Handel's music are easily consulted. What we lack is opportunity to hear his music in concert or recorded performance. It is welcome on the additional ground that, designed as a scholarly work addressed to any layman with an adult interest in music, Weinstock avoids with commendable premeditation the pernicious pitfalls both of 'popular' and 'scholarly' biography. markedly superior. . . . His view of the astonishing world of George I is as modern as this morning's newspaper. . . . But the style of the book is pruned sometimes to the verge of austerity. Yet it retains a touch of dignity, one is tempted to say of stateliness, that some may denounce as old-fashioned, but that the judicious are likely to consider not inappropriate in the life of a great man. Much of the music of George Friedrich Handel is profound and it is not for this reviewer to judge an analysis of profound music. All that will be said here of Mr. Weinstock's criticism is that, whether it is sound or unsound, it is comprehensible to the layman and therefore persuasive." G. W. Johnson

Some of this has managed to seep into the build and climate of his novel. . . . The book lacks a focal point, or rather, a central story. Some scenes, of course, are vividly drawn; some figures, particularly the Czech workers, show that Weiskopf hasn't lost his gift for characterization, and there are some touches of wholesome humor. Perhaps the novel remains unsatisfactory because the doings of the family amount to so little; perhaps it was unfortunate to have so many of the figures given over to erotic pursuits. I suspect also that Weiskopf's original text was not so dry as it now appears. It may well be that the author of the powerful Firing Squad needs another theme to show what he can really do." "The canvas is not large enough to portray the death of a social order or an empire. While Mr. Weiskopf's awareness of the social and political forces sweeping Europe in 1913 emerges in a few very effective vignettes, the total impression is one of a vague longing for the Vienna and the Prague of before Sarajevo. The elegant liberal editor who is the chief character in the novel is blurred by sentiment. . . . Since Mr. Weiskopf's vantage point toward his scenes is the very one which our imagination so popularly associates with everything about Viennese culture before 1914, it is quite probable that 'Twilight on the Danube' will find many more readers than did 'The Firing Squad,' his last published novel." Seven years after her death it brings to us again the warm, gracious, sensitive personality and lets us share her memories as she digs in the sunlight of the past. Some notice of the American—if any—development of a name would have been helpful. And, of course, etymologies in various languages would have increased the scholarly usefulness of the book. WELTY, EUDORA. Delta wedding. 247p \$2.75
Harcourt

46-3217

Quiet, uneventful story of a large southern family, the Fairchilds, living on their Mississippi delta plantation. Fairchilds of all ages, from five to sixty-five, drift thru the days, as they prepare for the wedding of Dabney, one of their loved members. The activities are seen thru the eyes of a young visiting cousin.

"Miss Welty's intentions in 'Delta Wedding' are somewhat on the subtle and intricate side. The reader who takes his realism 'neat' will probably not care too much for her. But there is a rich reality here in this study of an old Southern family in its decline—a reality so palpable that you can almost touch it with your finger tips and feel them tingle." F. H. Bullock

"I find it difficult to determine how much of my distaste for Eudora Welty's new book, 'Delta Wedding,' is dislike of its literary manner and how much is resistance to the culture out of which it grows and which it describes so fondly. But actually, I think, Miss Welty's style and her cultural attitude are not to be separated. It is impossible for me to conceive of a Northern or Western or, for that matter, a European or an Australian or an African scene that could provoke an exacerbation of poeticism to equal Miss Welty's in this novel... And yet one suspects that, for all its tenuousness, 'Delta Wedding' says precisely what it intends to say. Among evocative novelists Miss Welty is extraordinarily gifted; and if one finishes her book with a strong sense of confusion as to Miss Welty's own judgment upon certain aspects of Delta life, one has no reason to feel that it is because Miss Welty lacks the ability to communicate any content she wants to." "The portrait she gives us of a large Southern family is nothing short of wonderful, and the way she gets hold of the particular quality of Southern speech, with its nuances, obliquities, and special kind of humor, is a minor triumph. Nor do I know of any writer, with the possible exception of Faulkner and of Marjorie Kinnan Rawlings, who works a different sector, so deeply sensitive to the Southern landscape. The emphasis I have placed on locale may make it sound like a regional book, which is just what I intended. It is regional in the same way as Gogol's 'Dead Souls' is regional. I'm not even hinting that Miss Welty is a writer of Gogol's stature, but her book has some of that same universal quality, and should be read as happily in Moscow and Oslo as in Passaic, San Francisco, and Des Moines." "Admirers of Miss Welty's earlier work will certainly be surprised, and may possibly be disappointed, as they read this novel. . . I confess to having experienced a certain uneasiness as I read the opening pages of this work; and that the uneasiness rapidly turned into sheer dismay. . . The prose improves; but Miss Welty's method, like Dabney's arms, continues to be overbearing. . . Neither life nor literature can support a prolonged bout of happiness; and if the novel survives, it is because Miss Welty is far too good a writer to be able to protect the Fairchild family against her own insight. . . And so, when the book is finished, one's respect for Miss Welty remains unimpaired. After all, every writer is entitled to one fit of nostalgia, one ascent into Cloud-cuckooland. Moreover, Miss Welty retains a toehold upon solid ground." George Dangerfield

"Part of the success of the novel is attributable to the author's grasp of technique, the basis of which is her choosing to describe the family at the time of the wedding. This device imposes severe yet natural boundaries on material that is always in danger of overflowing. Among its other advantages are these: it introduces an impressionable observer, a young cousin from Jackson, a guest at the wedding, to register her impressions of the Fairchilds; it takes the family at a time when they would obviously be at their gayest, most amiable, and most eruptive; and stresses the self-renewing power of the family, its ability to absorb its in-laws and above all, its unflagging fecundity."

"The narrative is interesting, though with more detail than will likely appeal to one not having a special interest in the city. Although the author is not a native of Texas and hence is still a 'newcomer,' he declares his intent to spread the news across the land that San Antonio is a fascinating place. He writes with an absence of fulsome ballyhoo and a viewpoint that is, in the main, objective. . . The author, a working journalist well up in his trade, writes smoothly and pleasingly. WERTHEIMER, MAX. Productive thinking [ed. by S. E. Asch and others]. 224p il \$3 Harper

153 Gestalt (psychology). Thought and thinking 46-318

This posthumously published work by a professor in the New School for Social Research, attempts to answer the question: "What occurs when, now and then, thinking really works productively?" The author bases his exposition of the psychology of thinking on many examples taken from sources as varied as teaching children geometry and conversations with Einstein on the theory of relativity.

"Wertheimer left a brief but comprehensive manuscript on thinking, a topic which had engaged him for much of his active life. Psychology is the richer for it. It offers a clear statement of the Gestalt attitude upon this subject. . . . Most important is the chapter on Einstein for it records for the first time a psychological study of the development of a great discovery. . . . An estimate of this study must accept its brilliance of analysis and its clearness of statement. The study of Einstein's processes alone would make the book a remarkable contribution." W. B. It is the fruit of a long and subtle study of 'productive thinking' and, if the phrase is not wholly spoiled by now, the creative process. It is not for jargonists. It might be called the crystallization of a life study. But it recalls and uses even more than that: the stripped-down workings of thought and clear-cut insight, beginning as early as the deductive method." Genevieve Taggard

Third book of poems by an American soldier-poet. He is a veteran of five beach heads in New Guinea, the Netherlands East Indies, and Australia, and his poems reflect his reactions to his army experiences.

"It is a kind of journalistic poetry that Westerfield writes and its value lies in the immediacy of the matter, and the vividness with which he sees it. Small irritants crop up: he is fond of the words 'yellow-skinned' and 'slant-eyed,' using the former repetitiously to describe Chippewa Indians and Japanese, the latter to identify Japanese and jungles." If her present heroine seems only semi-trapped (elaborate mumbo-jumbo to the contrary notwithstanding) let us credit that to the change of air; the author's dark wood is just as fascinating to wander through; this time, Miss Weston's well-earned readers should merely find the journey less fatiguing. . . . What makes 'The Dark Wood' as fashionable as a Radio City window display is the authenticity of Stella's plight, the fact that the deceived husband is not only a returned veteran but also bears an uncanny resemblance to her lost Alec. What gives it more than facile surface interest is the added fact that Miss Weston's sympathy for her protagonists is quite genuine—even though the depth of her penetration leaves much to be desired."

WHEELER, OPAL (MRS JOHN MACRAE). *H.M.S. Pinafore; story and music arrangements adapted from Gilbert and Sullivan; il. by Fritz Kredel.* 96p \$3 Dutton

782.6 Operettas 46-11902

First in a new series of Gilbert and Sullivan operettas for home use. The story is told and music arranged for about third year pupils.

"Fritz Kredel has become designer, costumer and entire production crew. His crisp, polished, jaunty and humorous illustrations are in perfect key with traditional Gilbert and Sullivan yet they give the air of revival. This is a charming gift book for anyone of any age."

"Here is an old favorite with special family appeal. The operetta is retold with fresh vivacity as a story with plot interest separate from the music. The author has arranged the text so that it lends itself to reading aloud; vocabulary is not beyond the reading ability of big brother or sister, musical arrangements are within the playing capacity of children with limited ability." "This is the prettiest 'Pinafore' I ever saw, and in one form or another I've seen many. It was my first opera and shortly after when I was still on the sunny side of seven, our local Choral Society put on an amateur performance and all our mothers practiced for weeks beforehand without pause. There's something about these Kredel designs that combines the trim tidiness and the heightening reality of a stage performance with the childlike quality that characters in these operettas always take on when they are seen by a child."

"Perhaps one of the handsomest of all this year's juveniles. Since it consists of a series of Protestant hymns, I can scarcely recommend it for Catholic households, but as a gift for Protestant children it would be fine. What particularly adds to its value are the interesting biographical notes concerning the authors of the words and music of the various hymns. And I might note in passing that here as in many other cases there has been a deliberate attempt to indicate the universality of Christianity by having children of various races shown cooperating in their prayer and praise."

"The Opal Wheeler collections of music for children have come to be an annual event. This one seems to me, all things considered, the best long-term investment of the lot. . .

The beauty is more than enhanced, it is brought to its highest expression by the full-page pictures, many in color, some in black touched with color and some in strong black and white. Marjorie Torrey has shown true reverence both for the subject of the poems—for all these hymns are in praise of God—but also in respect for childhood itself." M. L. Becker

952 Japan—Politics and government. Japan
—Foreign relations 46-4076

"An explanation of how the people of Japan, whom Americans once pictured as spending most of their time writing inexplicable poetry and arranging flowers, suddenly grew horns and set out on a career of world conquest has been given many times by many students of the Japanese character during the last few years. Few of them have approached it with a better background, however, than did Post Wheeler, who was our first career diplomat in Tokyo in 1906. . . Mr. Wheeler does his explaining largely on the basis of personal contacts, as a diplomatist, with the men who began to shape Japan's militaristic destiny long before we Americans became aware of what was going on. A lot of it, of course, is hindsight. But it is not less valuable for having a long perspective." N Y Times

"Wheeler believes there is hope for the Japanese. He thinks that a liberal government can be achieved there if—and he admits it is a very big if—the United States will make the painstaking effort required. The bad timing of this book does not detract from the personal experiences—which are interestingly if somewhat grandiloquently described—of an American diplomat who rubbed shoulders with the Japanese who brought most of Asia tumbling down around their ears." WHITE, CHARLES DANVILLE. Camps and cottages, how to build them; with plans and diagrams by the author. rev ed 260p \$3 Crowell

728 Architecture, Domestic. Building. Cottages 46-5268

Revised and rewritten edition of a book first published in 1939 (Book Review Digest 1939). "Here are checks on favorable and unfavorable building sites, analysis of kinds of camps, step by step procedure, from materials and tools, to preparation of the site, framing and exterior work, roofing and fireplaces, on to interior work, paints and painting, water supply, costs, contractor services and finishing touches. The author outlines his own experience in starting with a small unit, eliminating errors, developing and enlarging for growth and new ideas." (Kirkus)

"Ribald, Inquisition-torn 18th century Spain is vigorously described, as is also its greatest citizen, Goya. As a lover, an adventurer, a husband and father, a friend, a stylish court painter, a moody, violent man we see him vividly, but only vaguely and superficially as a serious artist, which after all is his sole *raison d'être* in history." "Comes rather close to what a modern historical novel should be... I know only a little Goya, and not much more about eighteenth-century Spain, so I can't say how accurate or inaccurate Mr. White is on these scores. I don't think it matters; not to me anyway. Mr. White's people behave like people, talk like people, and even think like people. The portrait of Goya is excellently done, tracing his growth as an artist with no more fanciness than if he were a plumber, and I think that a lot of people would like to meet him." Hamilton Basso
